This document constitutes a securities note (the “Securities Note”) for the purposes of Article 5.3 of EU Directive 2003/71/EC (the “Prospectus Directive”). This Securities Note contains information relating to the Notes. This Securities Note shall be read in conjunction with the registration document (the “Registration Document”) dated 11 August 2009 containing information in respect of the European Bank for Reconstruction and Development (the “Issuer”) and, if applicable, the summary note (the “Summary Note”) dated 12 July 2010 conveying the essential characteristics of, and risks associated with, the Issuer and the Notes, each as prepared for the purposes of Articles 5.2 and 5.3 of the Prospectus Directive. Together, the Registration Document (including the information incorporated by reference therein), this Securities Note (including the information incorporated by reference herein) and any Summary Note shall comprise the prospectus (the “Prospectus”) for the Notes, prepared for the purposes of Article 5.1 of the Prospectus Directive.

This Securities Note itself comprises a pricing supplement (the “Pricing Supplement”) which sets out the specific terms and conditions of the Notes and certain information relating thereto. The Securities Note incorporates by reference the base terms and conditions of the Notes which are supplemented by the specific terms and conditions set out in the Pricing Supplement.

Any person (an “Investor”) intending to acquire or acquiring any securities from any person (an “Offeror”) should be aware that, in the context of an offer to the public as defined in section 102B of the FSMA, the Issuer may be responsible to the Investor for the Prospectus under section 90 of the FSMA, only if the Issuer has authorised that Offeror to make the offer to the Investor. Each Investor should therefore enquire whether the Offeror is so authorised by the Issuer. If the Offeror is not authorised by the Issuer, the Investor should check with the Offeror whether anyone is responsible for the Prospectus for the purposes of section 90 of the FSMA in the context of the offer to the public, and, if so, who that person is. If the Investor is in any doubt about whether it can rely on the Prospectus and/or who is responsible for its contents it should take legal advice.

Certain information relating to the terms of an offer by an Offeror to an Investor may not be available at the time of publication of this Securities Note. The Investor must look to the Offeror at the time of such offer for the provision of such information and it is the responsibility of the Offeror to ensure that information relating to the offer that has been omitted from this Securities Note is provided to the Investor at the time such offer is made.

J.P. Morgan

12 July 2010

The Issuer accepts responsibility for the information contained in this Securities Note and in the Summary Note. To the best of the knowledge and belief of the Issuer (which has taken all reasonable care to ensure that such is the case), the information contained in this Securities Note and in the Summary Note is in accordance with the facts and does not omit anything likely to affect the importance of such information.

The previous paragraph should be read in conjunction with the third paragraph on the first page of this Securities Note.

An Investor intending to acquire or acquiring any Notes from an Offeror will do so, and offers and sales of the Notes to an Investor by an Offeror will be made, in accordance with any terms and other arrangements in place between such Offeror and such Investor including as to price, allocations and settlement arrangements. The Issuer will not be a party to any such arrangements with Investors (other than the Dealer (as defined below)) in connection with the offer or sale of the Notes and, accordingly, this Securities Note, the Registration Document and the Summary Note will not contain such information and an Investor must obtain such information from the Offeror. Subject as provided above, neither the Issuer nor any of its affiliates shall have any responsibility to an Investor in respect of such information.

Application will be made for the Notes to be admitted to the Official List of the UK Listing Authority (the “Official List”) and to be admitted to trading on the Regulated Market (within the meaning of the Markets in Financial Instruments Directive (Directive 2004/39/EC of the European Parliament and of the Council on Markets in financial instruments) (the “MiFID”) of the London Stock Exchange plc (the “Regulated Market”). References in the Prospectus to Notes being “listed” (and all related references) shall mean that such Notes have been admitted to trading on the Regulated Market and have been admitted to the Official List. The relevant Pricing Supplement in respect of the issue of any Notes will specify whether or not such Notes will be admitted to the Official List and admitted to trading on the Regulated Market (or any other stock exchange).

In respect of the Notes, no person has been authorised to give any information or to make any representations other than those contained in the Prospectus and the documents incorporated by reference therein in connection with the issue or sale of the Notes and, if given or made, such information or representation must not be relied upon as having been authorised by the Issuer or J.P. Morgan Securities Ltd. (the “Dealer”). Neither the delivery of the Prospectus or any document forming part of that Prospectus nor any sale made in connection therewith shall imply that the information contained therein concerning the Issuer is correct at any time subsequent to the date hereof or that any other information supplied in connection with the Notes is correct as of any time subsequent to the date indicated in the document concerning the same. The Dealer expressly does not undertake to review the financial condition or affairs of the Issuer during the life of the Notes. Investors should review, *inter alia*, the most recent financial statements of the Issuer when deciding whether or not to purchase any of the Notes.

To the fullest extent permitted by law, the Dealer does not accept any responsibility for the contents of the Prospectus or for any statement, made or purported to be made by the Dealer or on its behalf in connection with the Issuer or the issue and offering of the Notes. The Dealer accordingly disclaims all and any liability whether arising in tort or contract or otherwise (save as referred to above) which it might otherwise have in respect of the Prospectus or any other information provided by the Issuer in connection with the Notes.

Neither the Prospectus nor any other information supplied in connection with the Notes is intended to provide the basis of any credit or other evaluation and should not be considered as a recommendation by the Issuer or the Dealer that any recipient of the Prospectus or any other information supplied in connection with the Notes should purchase any of the Notes. Each investor contemplating purchasing any of the Notes should make its own independent investigation of the financial condition and affairs, and its own appraisal of the creditworthiness, of the Issuer and of the tax, accounting and legal consequences of an investment in any of the Notes for such investor. Each Noteholder takes full responsibility for its decision to purchase any Notes and the terms on which it does so.

The Prospectus does not constitute an offer of, or an invitation by or on behalf of, the Issuer or the Dealer to subscribe for, or purchase, any Notes. The distribution of the Prospectus and the offering or sale of the Notes in certain jurisdictions may be restricted by law. Persons into whose possession the Prospectus comes are required by the Issuer and the Dealer to inform themselves about and to observe any such restrictions. In particular, there are restrictions on the distribution of the Prospectus and the offer or sale of the Notes in the United States, the United Kingdom, the European Economic Area (in respect of Notes having a denomination of less than €50,000 or its equivalent in any other currency as at the date of the issue of the Notes), Japan, the Republic of France, Singapore and in other jurisdictions.

The Notes have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the “Securities Act”). Accordingly, no registration statement has been filed with the U.S. Securities and Exchange Commission (the “Commission”). THE NOTES HAVE NOT BEEN APPROVED OR DISAPPROVED BY THE COMMISSION OR ANY STATE SECURITIES COMMISSION NOR HAS THE COMMISSION OR ANY STATE SECURITIES COMMISSION PASSED UPON THE ACCURACY OR ADEQUACY OF THE PROSPECTUS. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENCE.

The information set forth herein, to the extent that it comprises a description of certain provisions of the documentation relating to the transactions described herein, is a summary and is not presented as a full statement of the provisions of such documentation. Such summary’s purposes are qualified by reference to and are subject to the provisions of such documentation.

Risk Factors

The Notes may involve substantial risks and are suitable only for investors who have the knowledge and experience in financial and business matters (including but not limited to investments in currency linked investments) necessary to enable them to evaluate the risks and the merits of an investment in the Notes. Prospective investors should ensure that they understand the nature of the risks posed by, and the extent of their exposure under, the Notes.

Prospective investors should make all pertinent inquiries they deem necessary without relying on the Issuer, the Dealer, any Agent or any officers or employees of the Issuer. Prospective investors should consider the suitability of the Notes as an investment in light of their own circumstances, investment objectives, tax position and financial condition. Some or all of the risks highlighted below could adversely affect the trading price of the Notes or the rights of investors under the Notes and, as a result, investors could lose some or all of their investment.

The factors described below represent the principal risks inherent in investing in the Notes. However, an investor may receive less than the expected amount for other reasons and the Issuer does not represent that the statements below regarding the risks of holding the Notes are exhaustive. Prospective purchasers of the Notes should ensure that they understand the nature of the Notes and the extent of their exposure to loss of their initial investment and that they consider the suitability of the Notes as an investment in the light of their own circumstances and financial condition.

Prospective investors should also pay specific attention to the risks highlighted below and the risk factors below should be read in conjunction with the risk factors incorporated by reference in the Registration Document from the Prospectus.

Market, Liquidity and Yield Considerations

Notes may not have an established trading market when issued. There can be no assurance of a secondary market for any Notes or the liquidity of such market if one develops. Consequently, investors may not be able to sell their Notes readily or at prices that will enable them to realise a yield comparable to that of similar instruments, if any, with a developed secondary market.

Legal Investment Considerations

General

Investors should consult their own legal advisers in determining whether and to what extent Notes constitute legal investments for such investors and whether and to what extent Notes can be used as collateral for various types of borrowings. In addition, financial institutions should consult their legal advisers or regulators in determining the appropriate treatment of Notes under any applicable risk-based capital or similar rules.

Investors whose investment activities are subject to investment laws and regulations or to review or regulation by certain authorities may be subject to restrictions on investments in certain types of debt securities, which may include certain Notes. Investors should review and consider such restrictions prior to investing in any Notes.

Risk Warning

There are significant risks associated with the Notes including, but not limited to, exchange rate risk, price risk and liquidity risk. Investors should consult their own financial, legal, accounting and tax advisers about the risks associated with an investment in these Notes, the appropriate tools to analyse that investment, and the suitability of the investment in each investor's particular circumstances. No investor should purchase the Notes unless that investor understands and has sufficient financial resources to bear the price, market liquidity, structure and other risks associated

with an investment in these Notes (including, but not limited to, any political, economic and other factors which could affect the value of, and return on, the Notes).

Investors should be aware that the methodology for determining any foreign exchange rate may result in a Fixed Interest Amount (payable pursuant to paragraph 16 herein), the Final Redemption Amount or any Early Redemption Amount (as the case may be) of the Notes being significantly less than anticipated or even zero. Investors should also be aware that a Fixed Interest Date, the Maturity Date and/or the Early Redemption Date, as the case may be, may be postponed and that no additional amounts shall be payable by the Issuer in respect of any delay in payment resulting from such postponement.

Risks associated with Brazil and the Brazilian economy

There are a number of risks associated with Brazil and the Brazilian economy in general which may cause the occurrence of a Price Source Disruption Event, which include, but are not limited to the following:

Brazil's currency has been characterised historically by high degrees of volatility. Despite the appreciation of the real against the U.S. dollar in 2006, 2007 and 2009, the Brazilian currency has historically suffered frequent devaluations. Although over the longer term, devaluations of the Brazilian currency generally have correlated with the rate of inflation in Brazil, devaluations have resulted in significant short- to medium-term fluctuations in the value of the Brazilian currency. The relationship of Brazil's currency to the value of the U.S. dollar, the relative rates of devaluation of Brazil's currency and the prevailing rates of inflation may adversely affect the Notes.

The real may not maintain its current value or the Brazilian Federal Government may re-implement a trading band policy or other type of currency exchange control mechanism. Any governmental interference with the exchange rate, or the implementation of exchange control mechanisms, could lead to a depreciation of the real, which could make the Notes more expensive and negatively affect their market value. Recent changes made to tax regulations in Brazil by the Brazilian Federal Government may also have an adverse effect on the real.

The Brazilian economy has been subject to a number of developments, disruptions or conditions that have significantly affected the availability of credit. External factors, including the Asian and Russian economic crises of 1997 and 1998, respectively, the Argentine economic crisis of 2001 and the terrorist attacks in New York and Washington D.C. in September 2001, and internal factors, such as the Brazilian economic crisis of 1999 and elections of 2002, have from time to time resulted in significant outflows of funds and reductions in the amount of foreign currency being invested in Brazil, notwithstanding significant increases in interest rates designed to stem capital outflow. In addition, to control inflation, the Brazilian Federal Government has maintained a tight monetary policy, with associated high interest rates, and has constrained the growth of credit.

Brazil has historically experienced extremely high rates of inflation. Inflation itself and governmental measures adopted to combat inflation have in the past had significant negative effects on the Brazilian economy. There can be no assurance that the target levels of inflation for 2010 will be attained and that inflation can be contained within these targeted levels. It is uncertain whether future actions of the Brazilian Federal Government (including any further action to adjust the value of the Brazilian currency) will cause inflation at a higher rate than predicted.

Investor Suitability

The purchase of the Notes involves substantial risks and is not suitable for all investors

Each prospective investor must determine, based on its own independent review and such professional tax and accounting advice as it deems appropriate under the circumstances, that its acquisition and holding of the Notes is fully consistent with its financial needs, objectives and conditions, and complies and is fully consistent with, all investment policies, guidelines and

restrictions applicable to it. None of the Issuer, the Dealer or the Calculation Agent acts as an investment adviser, or assumes any fiduciary obligation, to any prospective purchaser of the Notes.

In particular, but without prejudice to the generality of the above paragraph, prospective investors should note that an investment in the Notes is only suitable for investors who:

- (i) have the requisite knowledge and experience in financial and business matters to evaluate the merits and risks of an investment in the Notes;
- (ii) are capable of bearing the economic risk of an investment in the Notes for an indefinite period of time;
- (iii) are acquiring the Notes for their own account for investment, not with a view to resale, distribution or other disposition of the Notes (subject to any applicable law requiring that the disposition of the investor's property be within its control); and
- (iv) who will recognise that it may not be possible to make any transfer of the Notes for a substantial period of time, if at all.

Understanding and appropriateness of the investment

Each investor (a) should be an investor with substantial knowledge of and/or experience in financial and business matters that it is capable of evaluating the merits and risks (including tax, legal, regulatory, accounting) of an investment in the Notes because the Notes are not an appropriate investment for investors who are unsophisticated with respect to such transactions; (b) should be financially able to bear such risks; (c) in making such investment shall not rely on any advice or recommendations of or any information, representation or warranty provided by the Dealer, the Calculation Agent and/or any of their respective affiliates, the Issuer or any of their respective representatives; (d) recognise that it may not be possible to make any transfer of the Notes for a substantial period of time; and (e) should seek advice from such advisers as such investor considers necessary and appropriate, to enable such investor to make its own independent decision with regard to the suitability and appropriateness of the Notes as an investment for its own account. Each investor should be capable of assessing and independently deciding, and should have assessed and independently decided, to assume the risks of an investment in the Notes.

Each investor in the Notes should consider the tax consequences of investing in the Notes. None of the Issuer, the Dealer or any of their respective representatives makes any representation and has given, nor will give, any advice concerning the appropriate accounting treatment or possible tax consequences of purchasing the Notes. Each investor should consult its own financial, tax, accounting and legal advisers about risks associated with an investment in the Notes and the suitability of investing in such Notes in light of the investor's particular circumstances.

Any information communicated (in any manner) to investors by the Issuer or the Dealer should not be relied upon as investment advice or as a recommendation to invest in the Notes, which shall include, amongst other things, any such information, explanations or discussions concerning the terms and conditions of the Notes, or related features.

Investment in the Notes should comply, and be fully consistent, with all investment policies, guidelines and restrictions applicable to an investor. It is the responsibility of each investor to ensure that it is compliant with all regulations relevant to its acquisition of the Notes and that it is lawful for it to enter into such investment.

Any information communicated (in any manner) to investors by the Issuer or the Dealer should not be relied upon, nor shall such information be deemed to be an assurance or guarantee, as to the expected results of an investment in the Notes. Each investor should be aware that any return on

the Notes may not exceed or even equal the return that might have been achieved had the amount of its initial investment been placed on deposit for the same period.

Each investor should be aware that none of the Issuer, the Dealer or the Calculation Agent is acting as a fiduciary or trustee for, or as an adviser to the investor with regard to the investment in the Notes.

Investment considerations relating to the Notes

Investment in the Notes carries with it a degree of risk including, but not limited to, the risks referred to below. The level of the USD/BRL foreign exchange rate may go down as well as up. Prospective investors may receive an amount less than their initial investment.

An investment in the Notes will entail significant risks not associated with a conventional fixed rate or floating rate debt security. Such risks include, without limitation, changes in the level or value of the USD/BRL foreign exchange rate and the possibility that a holder of the Notes will receive a lower amount of interest or other consideration than the holder expected. Depending on the exchange rate to be determined by the Calculation Agent upon a Price Source Disruption Event, such amount may even be zero. The Issuer has no control over a number of matters that are important in determining the existence, magnitude and longevity of such risks and their results, including economic, financial and political events.

Past performance of the USD/BRL foreign exchange rate is not necessarily indicative of future performance.

JPMorgan Chase Bank, N.A. may face possible conflicts of interest in relation to its role as Calculation Agent for the Notes including, without limitation, in relation to the role of the Calculation Agent in determining the occurrence of a Price Source Disruption Event and in determining the exchange rate for converting BRL into USD upon the occurrence of a Price Source Disruption Event. JPMorgan Chase Bank, N.A. is required to carry out its duties as Calculation Agent in good faith and using its reasonable judgement, however each investor should be aware that any such determination may potentially adversely affect the amount payable to Noteholders under the Notes and that potential conflicts of interest could arise.

No assurances can be made that any meaningful secondary market will develop in the Notes. The Dealer may, but is not obligated to, make a market in the Notes. The Dealer may discontinue any market-making activities at any time without notice. In addition, the Notes may not be transferred except to qualified investors in accordance with applicable private offering rules. If an active public market for the Notes does not develop, the market prices and liquidity of the Notes may be adversely affected.

Volatility is the term used to describe the size and frequency of price and/or market fluctuations. If the volatility, or anticipated volatility, of the USD/BRL foreign exchange rate increase or decrease, the trading value of the Notes may be adversely affected.

It is expected that changes in interest rates will affect the trading value of the Notes. In general, if interest rates increase, it is expected that the trading value of the Notes will increase and, conversely, if interest rates decrease, it is expected that the trading value of the Notes will decrease. If interest rates increase or decrease in markets based on the Brazilian real, the trading value of the Notes may be adversely affected. Interest rates may also affect the economy of Brazil, and, in turn, the exchange rates and therefore the value of the USD/BRL foreign exchange rate.

If the Calculation Agent determines that a Price Source Disruption Event has occurred, this will lead to a delay in the payment of principal and/or interest.

THE CONSIDERATIONS SET OUT ABOVE ARE NOT, AND ARE NOT INTENDED TO BE A COMPREHENSIVE LIST OF ALL CONSIDERATIONS RELEVANT TO A DECISION TO PURCHASE OR HOLD THE NOTES. THE ATTENTION OF INVESTORS IS ALSO DRAWN TO THE SECTION HEADED “RISK FACTORS” ON PAGES 10 TO 11 OF THE BASE PROSPECTUS.
