

Statement by Mrs. Doina NISTOR,
Deputy Prime Minister, Minister of Economic Development and Digitalization
of the Republic of Moldova,
Governor for the Republic of Moldova at EBRD

Distinguished Excellencies, Governors, esteemed ladies and gentlemen, and honored colleagues,

It is a great honor to represent the Republic of Moldova at the 34th Annual Meeting of the European Bank for Reconstruction and Development. Today's event offers an opportunity to reaffirm Moldova's commitment to long-term sustainable development, and to acknowledge the EBRD as a trusted and strategic partner in driving our nation's transformation forward.

As Moldova advances confidently on its path toward European integration, the launch of the **€1.9 billion EU Growth Plan for Moldova** marks a turning point. This unprecedented support package is not just a financial commitment from the European Union; it is a powerful signal of confidence in Moldova's reform trajectory and capacity to align with EU standards. The Growth Plan is structured around three core pillars: modernizing critical infrastructure, strengthening economic integration with the EU Single Market, and advancing structural and social reforms that improve quality of life for every citizen.

The Growth Plan is already translating into action. Thousands of Moldovan entrepreneurs, particularly exporters and startups, will receive direct support to grow and innovate. In the energy sector, Moldova's integration into the EU market will accelerate through the construction of major infrastructure, including the **400 kV Vulcănești–Chișinău** and **400 kV Bălți–Suceava** interconnection lines.

The transport sector is undergoing deep modernization—with investments in roads, railways, and bridges. Notably, the development of a **Multimodal Logistics Center at Berești Railway Terminal** will integrate Moldova more effectively into regional supply chains. In agriculture, farmers will benefit from new investment grants and improved export opportunities to the EU. Simultaneously, thousands of hectares of land and forests will be restored. The healthcare sector will see the construction of two new regional hospitals, in Cahul and Bălți, with modern equipment and services. All these efforts contribute to a resilient, green, and inclusive economic model.

To deliver on these ambitions, Moldova relies on strong partnerships. And in this context, the **EBRD is one of Moldova's most reliable and impactful institutional allies**. Your continued engagement is central to our success.

We count on the EBRD's expertise in several strategic areas: good governance, infrastructure development, energy security, digital connectivity, and sustainable finance. The success of the Growth Plan depends heavily on our institutions' ability to implement reforms efficiently, manage large-scale investment projects, and ensure long-term sustainability. EBRD's involvement in strengthening public administration, governance structures, and financial management is essential to our capacity to deliver.

We highly value the EBRD's contribution to transformative projects across Moldova. Past investments in road infrastructure have improved logistics and market access. The upgrade of water supply and wastewater systems has raised living standards in underserved communities. Your support for **renewable energy** development has enhanced Moldova's energy independence and environmental sustainability.

Furthermore, EBRD's engagement in private sector development continues to play a crucial role in fostering entrepreneurship, improving SME competitiveness, and generating jobs.

Looking ahead, we see even greater potential for collaboration—particularly under the **Single Investment Pipeline (SIP)** established within the Moldova Growth Plan. The SIP provides a structured framework to prioritize investments in transport, energy, digital infrastructure, regional development, agriculture, and green transition. Project selection will follow robust criteria: alignment with Moldova's Reform Agenda, EU market integration, economic impact, institutional readiness, and project maturity.

In this process, **EBRD's role in providing financing, technical assistance, project preparation support, and policy guidance will be critical.** Together, we can deliver high-impact infrastructure projects and unlock the full potential of the Growth Plan for Moldova's long-term development.

Equally important is EBRD's continued support for Moldova's private sector. The development of a transparent, competitive, and innovation-driven business environment is a cornerstone of our economic vision. With EBRD's involvement, we aim to expand access to finance, particularly for SMEs and exporters, and promote innovative sectors such as **digital technologies, creative industries, green energy, and modern manufacturing.**

Moldova is moving forward with clarity and determination. We are committed to accelerating reforms, strengthening institutions, and ensuring that public investments deliver tangible results for our people. But we know we cannot do this alone. The EBRD's support in **building institutional capacity for project management, procurement, and financial oversight** will be essential to absorb available funding efficiently and ensure quality implementation.

In closing, I would like to express our deep appreciation for the EBRD's unwavering partnership. Together, we are not just investing in infrastructure—we are investing in Moldova's future. We look forward to deepening this collaboration as we pursue a more resilient, connected, and EU-integrated Moldova.

Thank you.
