

Note by IPAM

The Requesters have asked for confidentiality due to the high risk of retaliation that they allege facing. As a consequence, the original Request cannot be disclosed and IPAM has produced this summary for public disclosure. It should be noted that in summarising the information, IPAM has sought to maintain the original text as much as possible, with due regard for security concerns.

Case 2026/06 Indorama Agro Capex Loan - Summary of Request

On 7 July 2026, the Requester submitted a Request to IPAM in relation to the [Indorama Agro LLC \(Op ID 50879\)](#) and [Indorama Agro Working Capital Loan \(Op ID 51011\)](#) in Uzbekistan. The Requester alleges that agricultural land previously allocated to and used by their farming enterprise was subsequently transferred to the Indorama Agro project without their free, prior and informed consent. The Requester states that their farming rights were terminated by local authorities in 2018 while they were outside the country and therefore unable to participate in, challenge, or defend their interests during the decision-making process. The Requester further alleges that the transfer did not follow applicable legal procedures and that they were not adequately informed of the relevant decisions.

According to the Requester, official documents show that land parcels previously associated with their farming enterprise later appeared in documentation relating to land allocated to the project. The Requester contends that this demonstrates a direct connection between the termination of their farming rights and the project's land acquisition process.

The Requester also alleges that they never voluntarily surrendered their land rights and did not sign agreements associated with the project's Livelihood Restoration Programme. They state that representatives sought their signature on livelihood restoration documents on multiple occasions, including offers of livelihood support measures, but that they declined to sign and instead sought either restoration of their land rights or financial compensation.
