

2023 ANNUAL REVIEW OF PROCUREMENT ACTIVITIES UNDER THE PROCUREMENT POLICIES AND RULES

Prepared by:

The Procurement Policy and Advisory Department

May 2024

Executive summary

This report, prepared by the Procurement Policy and Advisory Department (PPAD), reviews public sector procurement contracts signed in 2023, funded and/or administered by the Bank, procured by the Bank's clients and entered into the Contract Review and Award database before the date of generating this report (31 March 2024). A separate section (2.16) covers the procurement activities of the Nuclear Safety Department (NSD).

In 2023, the total number of contracts awarded by Bank's clients overall was 407 with a total value of € 4.808 billion for which EBRD's own financing represents € 2.055 billion, a record overall figure for public sector contracting. It should be noted that within these figures, PPAD provided direct support to the Natural Resources team for the Naftogaz Eurobond Facility, Ukraine, and the Moldova Gas Facility. In total 109 gas contracts for a value of € 698 million were signed. Due to the confidential nature of the pricing of natural gas, the breakdown of the contract prices is not included in the overall statistics of this report. Therefore, for the purposes of the statistics in this report, a total of 298 contracts (excluding NSD and natural gas contracts) are reported as signed by the Bank's clients. The total value of these contracts amounted to € 4.110 billion, for which EBRD's own financing represents € 1.545 billion. In comparison with 2022, this is a slight decrease in the number of signed contracts (4 per cent) and an increase in the total contract value (19 per cent).

The average contract value was € 13.8 million, and the average EBRD financing – € 5.2 million per contract. The largest contract placed was for the Decommissioning, Signalling, Control Telecom, Automated Fare Collection, Civil Works, Public Services, Electro Mechanical, Workshop Equipment, Track Work GrCF2 W2 - Alexandria Metro, EGYPT, in the amount of € 1.299 billion.

As in previous years, the contracts awarded through competitive processes (alternative and direct selection excluded) constitute the majority of contracts, representing 54 per cent of the total number of contracts and 80 per cent of the total contract value. The interest of companies to participate in EBRD financed tenders remains at a high level. The total number of tenders submitted in 2023 was 904. Out of these tenders, 65 per cent were submitted by tenderers from EBRD Countries of Operation (in their own or other Countries of Operation) resulting in the award of 245 contracts (82 per cent of all contracts) with a total value of € 2.934 billion (72 per cent of the total contract value).

Companies from the following five countries were most successful in terms of highest total contract value: Egypt (€ 1.458 billion), China (€ 823 million), Romania (€ 446 million), Türkiye (€ 400 million), Germany (€ 189 million). In total, these contracts represent € 2.580 billion or 78 per cent of the total contracted value.

Cross-border participation in tendering for EBRD financed contracts in Countries of Operation remains at a high level (53 per cent, where 18 per cent of all contracts were won by companies from Countries of Operation competing in other Countries of Operation).

In 2023, the Bank handled 16 registered complaints, of which 15 complaints were closed by the Bank and 1 complaint was carried over to 2024. In relation to the 15 complaints closed in 2023, 9 complaints were rejected, 4 complaints upheld (3 related to the same project), 2 reviews were discontinued (due to cancellation tender process by the Client and withdrawal of the complaint by the participant).

As of 31 December 2023, based on the Bank's commitments at the time, the contract pipeline shows that in the forthcoming years, the Bank's public sector clients are expected to sign in excess of 700 contracts for an amount exceeding € 11.4 billion (EBRD funding € 6.8 billion) under 236 projects.

It should be appreciated that with the relatively small number of contracts spread across different sectors and Countries of Operation that are covered on a yearly basis in this report, the data set is not sufficiently representative to be used for comprehensive analysis of trends. Contracting activities will inevitably reflect the type of investment and volume that the Bank finances rather than more general trends in the market.

The war in Ukraine has had a significant impact on procurement activities and is further explained in section 4.

1. Introduction

This report, prepared by the Procurement Policy and Advisory Department (PPAD), reviews public sector procurement contracts signed in 2023, funded and/or administered by the Bank and procured by the Bank's clients and entered in the CRA before the date of generating this report (31 March 2024). A separate section covers the procurement activities of the Nuclear Safety Department (NSD). This report covers goods, works, and consultancy contracts procured and contracted by the Bank's clients, regardless of source of funds.

The data used in the report

The reporting format uses concurrent data. This means that the historical information (year to year data) from each annual report may show a larger number of contracts in this report than reported in the previous years, as historical contracts will continue to be entered into the system when received by the Bank from the clients. Compared with the 2022 Annual Procurement Review, there are 81 contracts (29 contracts in 2022, 39 in 2021, and 13 contracts in 2020) worth a combined total of € 498 million, which have been added to this report. The main reason why contracts signed in one particular year are entered into the system after the report is produced, is that contracts are often only submitted to the Bank when the first disbursement for the respective contract is requested or as part of other reporting requirements to the Bank, especially when alternative procurement procedures are used.

Annexes 1 to 10 of the report contain the statistical data for the public sector contracts signed during 2023. The analysis of these data, as well as the procurement activities of PPAD (Section 4), can be found in the main body of this report.

2. Analysis of public sector procurement data

Volume and number of contracts

Table 1. Overview

Number of contracts signed by the Bank's clients (excluding NSD)	298
The total value of these contracts amounted to	€ 4.110 billion
Total number of signed contracts compared with last year	4 % decrease
Total value of signed contracts compared with last year	19 % increase

Table 2. Average values of all contracts

Year	2022	2023
Contract value (€ million)	11.2	13.8
Average EBRD financing per contract (€ million)	5.1	5.2

Table 3. Large value contracts

Year	2022	2023
Number of contracts with a value above € 10 million but less than € 20 million	46	64
Number of contracts with a value above € 20 million	23	36

- ✓ The largest contract by value was for the Engineering, procurement, construction, testing and commissioning of: Decommissioning, Signalling, Control Telecom, Automated Fare Collection, Civil Works, Public Services, Electromechanical, Workshop Equipment, Track Work GrCF2 W2 – Alexandria Metro, EGYPT, in the amount of € 1.299 billion, with EBRD funding of € 173 million.

Analysis by country of operation

✓ Number of countries of operation with public sector contracting activities: **28**

Table 4. *The countries with the highest number of contracts signed*

Rank	Country of Operation	Number of contracts	% of total contract number
1	Türkiye	48	19
2	Romania	39	15
3	Egypt	24	9
4	Serbia	17	7
5	Tajikistan	16	6
Total		144	56

Table 5. *The countries with the highest total value of contracts*

Rank	Country of Operation	Value of contracts (€ million)	% of total contract number
1	Egypt	1,541	38
2	Kazakhstan	726	18
3	Romania	444	11
4	Türkiye	244	6
5	North Macedonia	189	5
Total		3.145 billion	78

Analysis by type of contract

Table 6. *Distribution of contracts by size and type in 2023*

Contract Size (€ million)	Works	Goods	Consultant Services	Total
0~0.3	1	28	42	71
0.3~7.5	56	44	50	150
>7.5	65	11	1	77
Total	122	83	93	298
Total Value (€)	3,686,618,159	352,694,683	71,091,691	4,110,404,533
Average value (€)	30,218,182	4,249,334	764,427	13,793,304
Fund Portion¹ (€)	1,240,311,786	260,836,354	43,789,549	1,544,937,689

- ✓ The 122 works contracts represented the largest total value by contract type (90 per cent of the overall contract value) as well as the largest proportion in value financed by EBRD and EBRD administered grants € 1.240 billion out of € 3.687 billion.

Table 7. *The most successful companies by their country for each contract type in 2023*

Contract Type	Tenderer Country	Share of Overall Value for Contract Type
Consultant Services	Romania	20.5 %
Goods	Czech Republic	14.8 %
Works	Egypt	20.8 %

¹ Loan and EBRD administered Grants

Distribution of contracts by award method in 2023

Table 8 illustrates that the majority (235) of the public sector contracts were awarded through open and competitive tender. This represents 79 per cent of the total number of contracts awarded and 82 per cent of the total contract value. Open tendering only applies to goods and works, and competitive procedures applies to consultancy services contracts procured in accordance with the PPR.

Table 8a. Distribution of contracts by award method in 2023 (contract value)

Contract Value (€ million)	Open & Competitive	Direct Selection	Alternative ²	Total
Below thresholds³	98,378,890	577,593	58,671,242	157,627,725
Above thresholds	3,250,488,453	83,073,726	619,214,628	3,952,776,807
Total	3,348,867,343	83,651,319	677,885,870	4,110,404,532

Table 8b. Distribution of contracts by award method in 2023 (number of contracts)

Number of contracts	Open & Competitive	Direct Selection	Alternative	Total
Below thresholds	72	10	17	99
Above thresholds	163	6	30	199
Total	235	16	47	298

² Alternative procurement is the categorisation given to those contracts for which the Board has granted an exception from the application of the PPR, subject to use of Alternative Competitive procurement methods.

³ The thresholds used are EUR 140,000 (excluding VAT) for goods and consultancy services, and EUR 5,350,000 (excluding VAT) for works contracts (equivalent to those allowed for use of the National Systems under Article 3.26, PPR)

Level of participation

Overview

A total of 904 tenders from 60 countries were received during 2023. The average participation rate was 3 proposals (both under open and competitive procurement procedures).

Companies from the following five countries were most successful in terms of highest cumulative contract value, winning in total € 3.316 billion or 81 per cent of the total contract value.

Table 9. Highest cumulative contract value

Tenderer Country	Awarded Value
Egypt	€ 1.458 billion
China	€ 823 million
Romania	€ 446 million
Türkiye	€ 400 million
Germany	€ 189 million

- ✓ The 2023 success Egyptian companies is largely attributed to one large contract signed under Alexandria Metro project for the amount of € 1,299 million, whilst Chinese companies are down to one large contract signed under Almaty CHP Coal Phase Out project for the amount of € 689 million.

Companies from the following six countries were most successful in terms of number of awarded contracts, winning in total 161 contracts (54 per cent of the total number of contracts) worth € 2,485 million, which represented 60 per cent of the total contract value.

Table 10. Number of awarded contracts

Rank	Tenderer Country	Number of Contracts
1	Türkiye	61
2	Romania	39
2	Egypt	16
4	Kyrgyz Republic	15
4	Morocco	15
4	Tajikistan	15

Distribution of tenderers by country of origin (2023)

The column “Rate of Success” seen in **Table 11** provides an indication of the ratio of the award of contracts and the number of tenders submitted by entities from each country.

Table 11. Distribution of tenderers by country of origin (2023)

Tenderer Country	Signed Contract Value (EUR)	% of Total Value Won	Number of Contracts Won	% of Total Contracts Won	Number of Unsuccessful Tenders	Total Number of Tenders	% Rate of Success	% of Total Tenders Submitted

Analysis by origin of tenderer

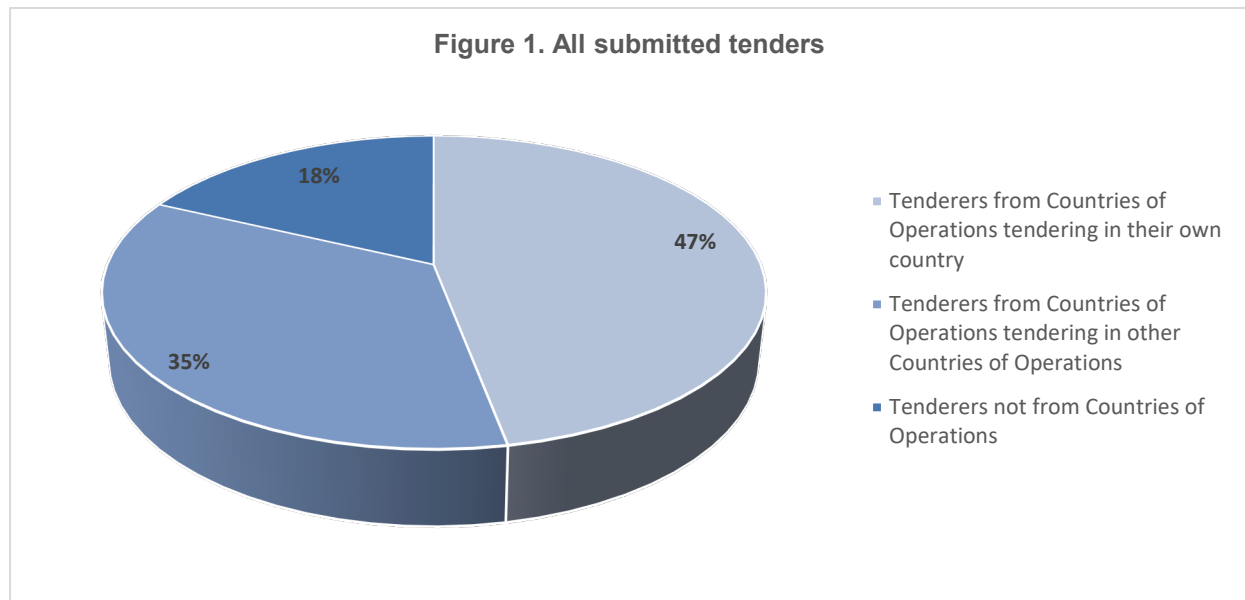

Chart 1 shows that out of the 904 tenders that were submitted, 82 per cent were submitted by tenders from Countries of Operation.

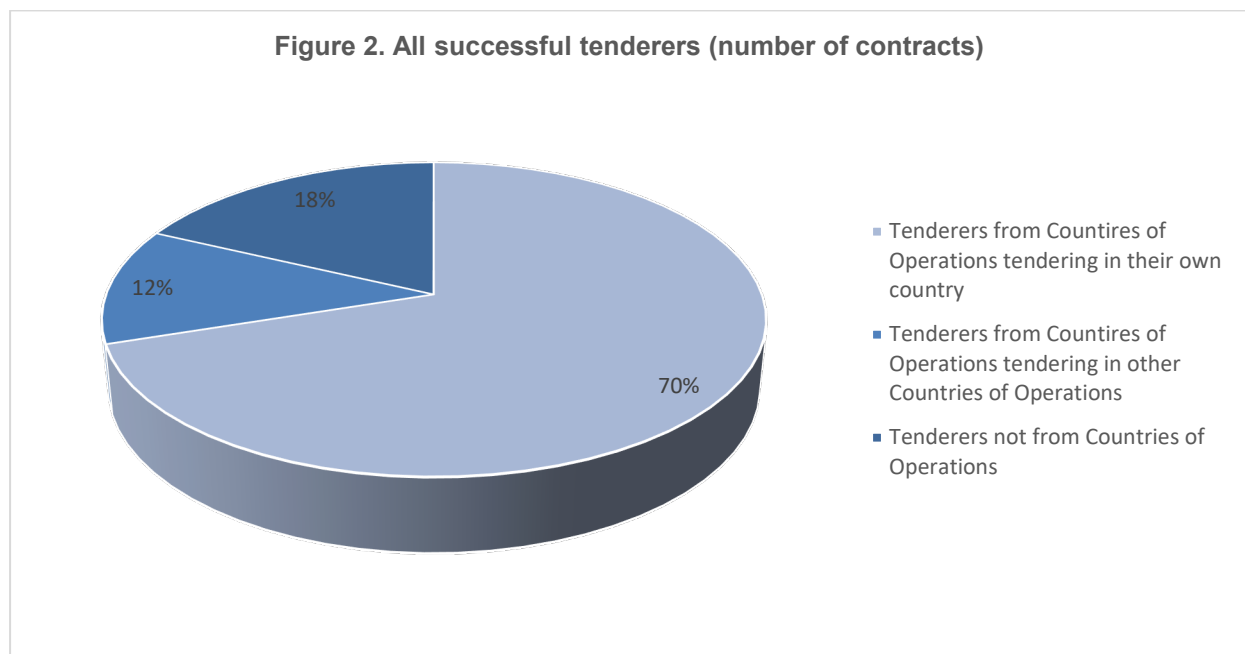

Chart 2 shows that out of the 298 contracts awarded:

- ✓ 70 per cent were won by companies from Countries of Operation tendering in their own country.
- ✓ 12 per cent were won by companies from Countries of Operation tendering in other Countries of Operation.
- ✓ In total, 88 per cent of contracts were won by companies from Countries of Operation.

Success of entities from Countries of Operation

Table 12. *Success of companies from Countries of Operation*

	Number of Contracts	Percentage of the total number	Value of Contracts (million)	Percentage of the total Value
Contracts won by entities from the Countries of Operation	245	82 %	€ 2,943	72 %
Contracts won by entities from the Countries of Operation in their own country	208	70 %	€ 2,673	65 %
Contracts won by the entities from the Countries of Operation in a country which is not their country of origin	36	12 %	€ 2,691	65 %
Contracts won by the entities not from the Countries of Operation	53	18%	€ 1,167	28 %

- ✓ In 2023, companies from the following 11 countries of the Bank Countries of Operation won contracts only in their own country. These countries were: Albania, Armenia, Egypt, Jordan, Kyrgyz Republic, Moldova, Mongolia, Morocco, Tajikistan, Tunisia, and Uzbekistan.

Co-Financing

In 2023, 176 contracts (50 per cent of total number) were co-financed. The total value of these co-financed contracts was € 3,702 billion of which the EBRD financed € 1,198 million. The balance of € 2,504 million were provided by other sources, such as other financial institutions (IFIs, EU Agencies, bilateral donors etc.) or by the borrowers themselves.

Public sector procurement with sub-sovereign clients

Table 13. *Public sector procurement with sub-sovereign clients*

		Percentage of total contracts	Compared to previous year
Number of contracts	109	43	19 % decrease
Value of contracts (€ million)	1,411	34	29 % decrease

Alternative procurement

Alternative procurement is the classification given to those contracts which were procured through alternative arrangements vis-a-vis PPR application, as they are co-financed with other International Financial Institutions or under development support initiatives, such as the EU Cohesion and Structural Funds; and which are excluded under paragraph 2.6 of the PPR 2022, from the use of the Bank's procurement procedures, or for which the Board has granted an exception under paragraph 2.4 of the PPR 2017. In such cases, these contracts are procured under alternative rules and procedures applicable to the co-financing institution or acceptable to a development support initiative, which were found to be acceptable to the Bank.

Table 14. Alternative procurement

Number of contracts	47
Total value	€ 677,885,872
EBRD funded portion	€ 126,309,207
Average EBRD financing	19 %
Largest contract	€ 84,534,856

- ✓ In 2023, alternative procedures were applied in the following three countries: Bulgaria, Croatia, Romania, Tunisia, and North Macedonia.

The Nuclear Safety Department

The EBRD manages seven nuclear safety Funds with over € 4 billion in pledged contributions. Each Fund is governed by specific provisions as set out in the Rules of the Fund approved by the respective Assembly of Contributors and by the EBRD Board of Directors. The Funds are managed by the Nuclear Safety Department (NSD) on behalf of the contributing countries. Procurement under the Funds must follow the EBRD's PPR for public sector projects.

Table 15. Number and value of contracts signed by the NSD

Year	2022	2023
Number of contracts signed	18	4
Value of contracts signed (€ million)	12	12

Table 16. Distribution of NSD administered contracts by size and type

Contract Size (€ million)	Works	Goods	Consultant Services	Total
<0.3	0	1	0	1
0.3~7.5	3	0	0	3
Total	3	1	0	4
Total Value (€)	12,011,779	149,400	0	12,161,179
Average Value (€)	4,003,926	149,400	0	3,040,295

- ✓ In 2023, The largest contract by value was for Remediation of the Yangiabad and Charkesar 2 Uranium Legacy Sites in Uzbekistan - € 6,313,515

Analysis of 2019–2023 data by sector

Figure 3 illustrates the number of public sector contracts signed between 2019 and 2023.

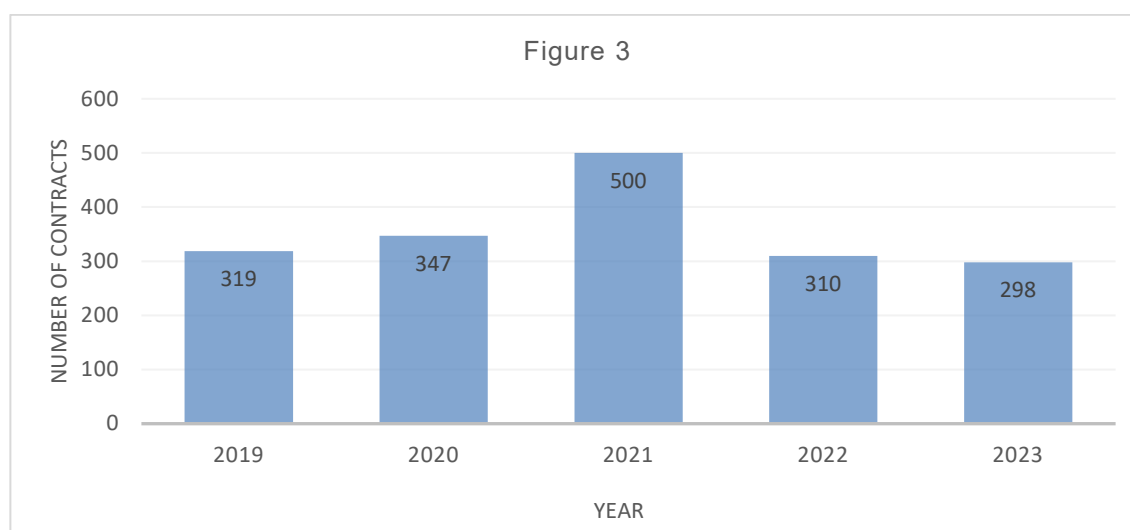

Figure 4 demonstrates the overall contract value as well as the portion financed by the EBRD between 2019 and 2023. Over the past five years, a total of 1,774 contracts have been signed with a total value of € 15.728 billion of which the EBRD financed € 8.298 billion.

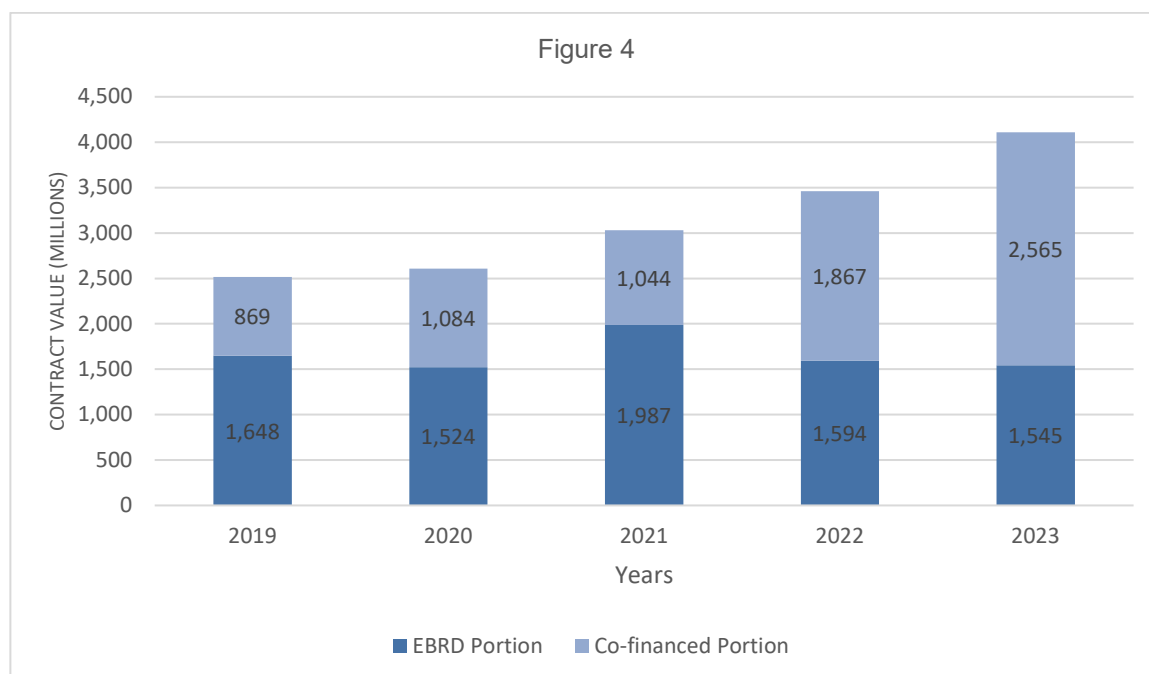

Figure 5 illustrates the overall number of public sector contracts signed between 2019 and 2023 by business sector. With a total number of 1,151 contracts, with the MEI sector having the highest contracting activity.

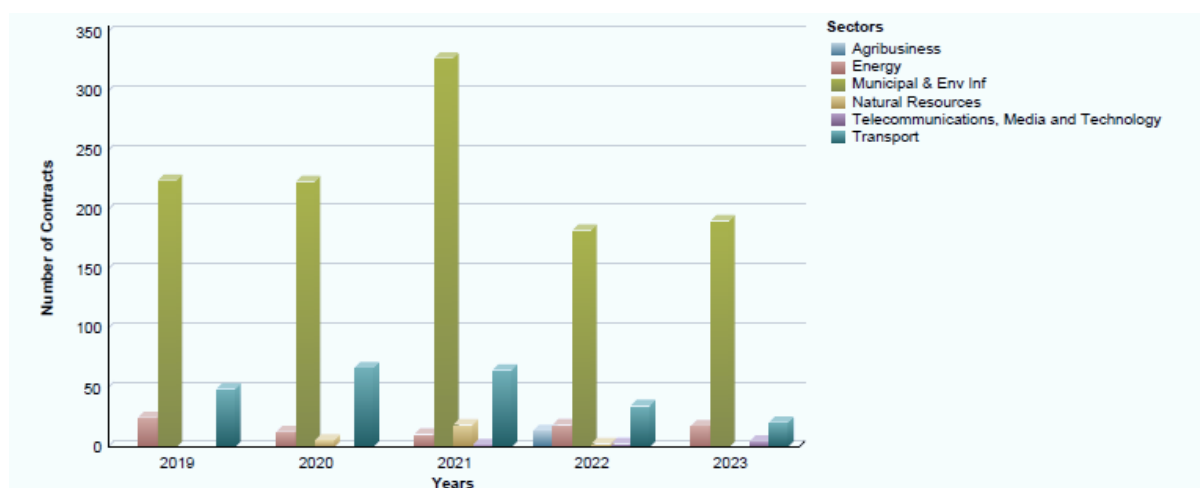

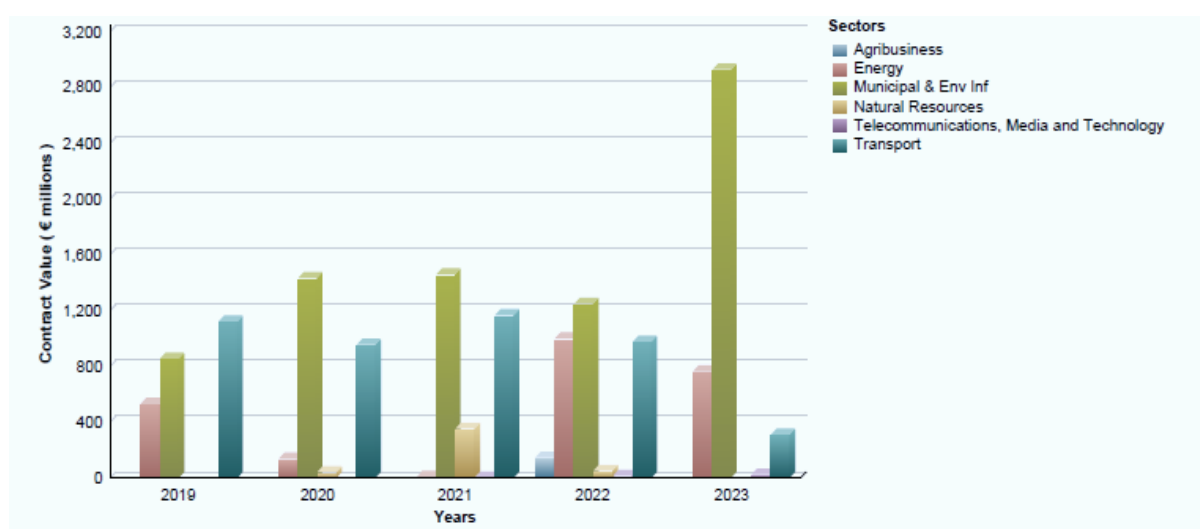

Figure 6 illustrates the overall contract value of public sector contracts signed between 2019 and 2023 by business sector. The MEI sector recorded the highest contracting activity with € 7.923 billion over the past five years.

Cumulative 2019 - 2023 data overview

Table 17 shows the countries of Operations with the highest total value of contracting over the past five years in descending order.

Table 17. Countries of Operations with the highest awarded value

Country of Operations	Awarded Value (€)
Egypt	2.450 billion
Romania	2.141 billion
Kazakhstan	1.596 billion
Türkiye	1.225 billion
Uzbekistan	942 million
Overall Total	8.354 billion

- ✓ The contracts in these five countries amounted to € 8.354 billion, which represented 53 per cent of the overall total contract value of the past five years (€ 15.728 billion).

Tenderers from Türkiye have been the most successful over the last five years as they have won a total of € 2.192 billion or 14 per cent of the overall contract value. During the past five years the countries with the highest total amount of contract value were, in descending order:

Table 18. Highest cumulative value by country of origin of the tenderer

Rank	Tenderer Country	Total Contract Value Awarded (€)
1	Türkiye	2.192 billion
2	China	2.065 billion
3	Romania	2.058 billion
4	Egypt	1.624 billion
5	Spain	996 million

The contracts won by companies from these five countries amount to € 8.935 billion which represented 57 per cent of the overall total contract value for the past five years. According to the country of origin of the companies, out of the 1,747 contracts administered by EBRD the highest numbers of contracts were awarded to companies from the countries in **Table 19**.

Table 19. Highest numbers of contracts awarded

Rank	Tenderer Country	Number of Contracts
1	Romania	253
2	Türkiye	147
3	Bulgaria	122
4	Tajikistan	114
5	Kyrgyz Republic	108

The number of contracts won by companies from these five countries is 744, which represented 42 per cent of the overall total contract count for the past five years.

In the period 2019 to 2023, no public sector contracts were reported in: Estonia; Greece; Hungary; Latvia; Lebanon; Slovak Republic; Slovenia; Turkmenistan; West Bank and Gaza

Public Procurement Opportunities

Table 20 illustrates the data regarding the public procurement opportunities posted on the Bank's Internet site and the EBRD procurement portal (ECEPP). It should be noted that the procurement notices were also sent to the United Nations Development Business for posting in the MDB business opportunity section.

Table 20. Public procurement opportunities

Year	General Procurement Notices	Invitations for Expression of Interest	Invitations to Prequalify	Invitations for Tenders	Total
2019	127	66	23	193	409
2020	137	48	12	134	331
2021	85	27	13	150	275
2022	87	15	12	195	309
2023	79	18	15	140	252

Annexes covering 2023

Country and sector tendering analysis

- ✓ **Annex 1** provides a breakdown by Country of Operations of all contracts signed (excluding NSD funded contracts) showing the winning tenderer and participating tenderers.
- ✓ **Annex 2** provides the total value of contracts signed, distributed by type and by country of origin of the winning companies.
- ✓ **Annex 3** presents the level of interest generated by business sector in the respective countries of operations
- ✓ **Annex 4** presents the distribution of tenders submitted by country of origin of the tenderers and by countries of operations
- ✓ **Annex 5** presents the distribution of submitted tenders by country of origin of the tenderers and by business sector
- ✓ **Annex 6** awards by country of origin of the tenderers (Value by Procurement Method)
- ✓ **Annex 10** Contracts placed under Nuclear Safety managed funds

Annexes covering 2019 - 2023

- ✓ **Annex 7** provides a distribution by country of origin of the successful tenderers and the value of contracts signed
- ✓ **Annex 8** provides the same breakdown but on the basis of the total number of public sector contracts won and signed
- ✓ **Annex 9** provides public sector contract awards in the Countries of Operations by value

3. Compliance and integrity

Procurement Complaints

In accordance with the EBRD Procurement Policies and Rules (PPR), Clients are responsible for project implementation, including all aspects of the procurement process (from the initial planning phase through to the contract award phase, as well as contract administration and implementation, and the resolution of any claims and disputes). The rights and obligations of the Client vis-à-vis Participants in a procurement process are governed by the procurement documents issued by the Client. The EBRD reviews the key steps in the procurement process and may advise and assist the Client in this respect.

Given this division of responsibilities, if procurement-related issues or complaints arise, the EBRD expects a participant to first resolve these with the Client. This must be done through clarification requests or during the debriefing process.

In case the Client does not respond to the participant or the raised issues or complaints are not resolved with the Client to the satisfaction of the participant, the participant can subsequently submit to the EBRD a Request for Bank Procurement Review or a Procurement Complaint in accordance with requirements set out in the EBRD Procurement Reviews and Complaints Directive ([Directive](#)).

The choice of the type of request to be submitted to the EBRD depends on the stage of the procurement process (please refer to the table below). More information about the EBRD Procurement Reviews and Complaints Mechanism can be found on the [EBRD website](#).

In 2023, participants have submitted a total of 60 procurement-related issues to the Bank, with 24 Requests for Bank Procurement Review (18 admissible) and 36 Procurement Complaints (14 registered). In addition, 2 registered Procurement Complaints were carried over from previous years. In relation to 7 Requests for Bank Procurement, the Bank determined that the Client needed to take further action, while the Bank upheld 4 Procurement Complaints (3 of which were submitted in relation to the same project). Please refer to paragraphs Requests for Bank Procurement Review) and Procurement Complaints for further details in this respect.

Table 21. Stages of procurement process and types of requests

Stage of procurement process	Type of request to the EBRD
Procurement process is still ongoing and the Proposal containing the financial offer has <u>not</u> yet been opened.	Request for Bank Procurement Review
Procurement process is still ongoing, but the Proposal containing the financial offer has already <u>been</u> opened.	Procurement Complaint
Participant has received an unsatisfactory response to its Request for Bank Procurement Review, regardless of whether the procurement process is still ongoing.	Procurement Complaint

Changes to the EBRD's approach to procurement-related issues

The Directive has come into effect on 1 May 2023, replacing the Procurement Complaints Review Directive from October 2020. The following main changes were introduced by the EBRD:

- ✓ The scope of the Directive has been expanded, it now besides Procurement Complaints (a more formal process with decision by the EBRD Procurement Complaints Committee (PCC) also covers Requests for Bank Procurement Review (less formal process handled by the EBRD procurement team). The handling of the Requests for Bank Procurement Review was previously governed by the EBRD "Guidance on Request for Bank Procurement Review". It was decided to merge the Guidance into the revised Directive, because participants approach the Bank for both types of requests and having these covered in one document makes it easier for participants to understand their rights and options. Furthermore, there is overlap in how the EBRD handles both type of requests, by merging these documents, repetition is avoided.
- ✓ After the adoption of PPR in 2022, the EBRD's Standard Procurement Documents have been updated as well. These new documents include timelines which impact when participants can submit Requests for Bank Procurement Review and Procurement Complaints. The timelines in the Directive have been fully aligned with those in the procurement documents.
- ✓ Participants now have the option to submit a Procurement Complaint if they are unsatisfied with the outcome from their Request for Bank Procurement Review before the opening of financial proposals (usually procurement complaints are submitted after opening financial proposals). This gives participants the opportunity to have their procurement issues submitted to and reviewed by the PCC during a period within which changes can still be made to the procurement process. This option was introduced to increase the EBRD's attentiveness to complaints from participants.

Other amendments to the Directive concern the harmonization with the PPR adopted in 2022, clarifying the general application of the Directive and the admissibility conditions for submissions of Requests for Bank Procurement Review and Procurement Complaints.

Requests for Bank Procurement Review

The EBRD reviews the key steps in the procurement process to ensure the Client follows the agreed procedures. One mechanism is the Review process, whereby participants have the option to approach the Bank early in the procurement process with procurement-related issues that they were unable to resolve with the Client or the Client refused to respond. Participants can submit so-called Requests for Bank Procurement Review generally before the tender submission deadline. Before being able to do so, participants must have first tried to resolve the issue with the Client, either through a request for clarification or a request for debriefing, as applicable.

The Review process is less formal than the Procurement Complaint process, it is handled by the policy team of the EBRD Procurement Policy and Advisory Department (PPAD). The aim of the Review process is to identify issues relating to the procurement process at an early stage when it is easier to resolve such issues and salvage the procurement process, thereby reducing the need for participants to submit formal Procurement Complaints to the Bank later on.

PPAD's review and assessment is based on information provided by the participant who submitted a Request for Bank Procurement Review, the Client and other EBRD teams. PPAD can also engage (external) technical experts or consultants if needed. After completion of the review of the Request for Bank Procurement Review, PPAD will communicate to the Client its findings and recommendations for action by the Client, if any, and set deadlines for implementation of the recommendation. The Client is responsible to inform the participants in the relevant procurement

process of any actions taken following the Request for Bank Procurement Review. PPAD will inform the participant, who submitted the Request for Bank Procurement Review, that PPAD's review is completed and that either no further actions are to be taken or that actions are to be taken by the Client who will further inform all participants in the process, as appropriate.

In case a participant is dissatisfied with the outcome of their Request for Bank Procurement Review, they can submit a Procurement Complaint with the Bank within the set timeline.

Submitted Requests for Bank Procurement Review in 2023

As of the start of 2023, PPAD started tracking Requests for Bank Procurement Review given that these were going to be included under the scope of the Directive.

In 2023, participants have submitted 24 Requests for Bank Procurement Review to the Bank. Of these 24 requests, 2 were carried over to 2024 because they were submitted in late December 2023 (they were resolved in early January 2024). In 2023, PPAD handled 22 requests: 6 requests were inadmissible under the Directive (either submitted after the deadline or prematurely within the process), 16 were admissible and subsequently reviewed by PPAD. In relation to these 16 requests, 2 tenders were subsequently cancelled by the Client, so PPAD discontinued the review. In relation to 7 requests, PPAD determined that the Client did not need to take further action, while for 7 other requests, it was determined that further action was required by the Client. This ranged from requiring the Client to circulate clarifications regarding the procurement documents to all Participants, to amending the procurement documents (e.g. amending technical requirements, qualification requirements), to granting further extensions so participants can adequately prepare their proposals, to providing more detailed debriefings to participants.

Table 22. Requests 2023

Total submitted Requests	24
Admissible Requests	18
Completed Requests	14
Reviews discontinued	2
Carried over into 2024	2
No action required by Client	7
Further action required by Client	7

Table 23. Number of Requests for Bank Procurement Review by contract type that were closed by the Bank in 2023

Contract Type	2023
Works	3
Goods	4
Commodities	0
Consultancy	9
Total	16

The 16 Requests for Bank Procurement Review concerned 11 different Bank-financed projects, with 4 requests relating to projects in the Western Balkans (Bosnia and Herzegovina (2), Serbia (2)), while 4 were submitted concerning projects in Türkiye. Another 4 requests were submitted regarding projects in Central Asia (Kazakhstan (2) and Uzbekistan (2)) and 2 relate to a project in Lithuania.

Table 24. Location Bank Projects related to Requests 2023

Western Balkans	4
Türkiye	4
Central Asia	4
Egypt	2
Lithuania	2
Total	16

In 2023, one participant was dissatisfied with the outcome of the Request for Bank Procurement Review and subsequently submitted a Procurement Complaint. They withdrew their complaint later (see Complaint 8).

During the review of one Request for Bank Procurement Review, PPAD identified red flags that raised concerns that one of the participants may have engaged in a Fraudulent Practice under the EBRD Enforcement Policy and Procedures. PPAD referred the matter to the EBRD Office of the Chief Compliance Officer in 2023.

Procurement Complaints during 2023

The Bank's role in a Procurement Complaints review process is to determine if the Client has followed the agreed procurement procedures. This is a formal process after the completion of the tender (after financial proposals have been opened and Client recommends a participant for contract award).

When a participant submits a Procurement Complaint, the policy team of PPAD determines if the complaint meets the admissibility criteria set out in the Directive. For example, a participant must have first tried to resolve the issue with the Client through a Request for Debriefing (unless the participant submits the complaint after completion of the Review process) and the complaint must be in relation to a procurement process governed by the PPR.

The admissible Procurement Complaint will be first reviewed on its merits by PPAD, who will undertake its review in close liaison with the relevant EBRD operational teams and the Client, as appropriate. PPAD may request from the complaining Participant or the Client further information to assess whether the Client has followed the agreed procurement procedures. This may be an iterative process and may involve the use of independent consultants to assist PPAD with their assessment. The review by PPAD may normally be limited to the issues raised in the Procurement Complaint.

After completion of its review, PPAD submits the Procurement Complaint, its assessment of the complaint, and its recommendation to the PCC. Within the EBRD, the PCC is responsible for reviewing and determining the EBRD's position in relation to complaints arising from procurements governed by the PPR. The PCC's term of reference and composition can be found [here](#).

The PCC will assess whether the Client has followed the agreed procurement procedures. If the Client has done so, the Procurement Complaint will not be upheld. However, if the PCC determines that the procurement process has not been materially carried out by the Client in accordance with the agreed procedures, the Procurement Complaint will be upheld. In accordance with Section III, Article 2.15

PPR 2022, the Bank may declare the contract in question ineligible for Bank financing and the outstanding portion of the financing allocated to the contract may be cancelled. A determination by the PCC to uphold a Procurement Complaint may not necessarily alter the outcome of the procurement process but may have implications for the availability of Bank financing for the contract in question.

Once the PCC has made its decision, PPAD will inform the Client, the complaining Participant and any other relevant parties of the outcome of the procurement complaints review process. The decision by the PCC is final and not subject to appeal.

Procurement Complaints Submitted in 2023

In 2023, participants submitted 36 Procurement Complaints to the Bank. Of these 36 Procurement Complaints, PPAD determined that 22 were inadmissible under the Directive. This was for example due to submissions received by the Bank after the applicable deadline, no prior Request for Debriefing submitted with the Client, reclassification of the Procurement Complaint as a Request for Bank Procurement Review (as financial proposals were not opened yet), non-compliance with other technical requirements under the Directive, and 2 submissions contained allegations of Prohibited Practices and therefore referred to OCCO.

The remaining 14 Procurement Complaints were declared admissible and subsequently registered by PPAD. In addition, 2 Procurement Complaints were carried over from previous years. In 2023, of the 16 registered complaints, 15 complaints were closed by the Bank and 1 complaint was carried over to 2024. In relation to the 15 complaints closed in 2023, 9 complaints were rejected, 4 complaints upheld (3 related to the same project), 2 reviews were discontinued, one because the Client cancelled the tender process and the other because the participant withdrew the complaint.

Table 25. Procurement Complaints 2023

Total submitted Procurement Complaints	36
Admissible Procurement Complaints	14
Carried over from previous years	2
Completed Procurement Complaints	13
Reviews discontinued	2
Carried over into 2024	1
Procurement Complaints upheld	4
Procurement Complaints rejected	9

In terms of the duration of the review of complaints, in relation to the 13 Procurement Complaints in which a decision has been made by the PCC in 2023, 1 complaint process was finalised within a period of less than 1 month, 5 complaints were closed within 2 months, while 5 complaints were closed within 3 months, and 2 complaints being finalised within 4 months.⁴

⁴ The timeline for handling of procurement complaints runs from the date of receipt by the Bank of the procurement complaint until the date on which the Bank (PCC) has made the final determination on whether to uphold the complaint.

Table 26. *Number of Procurement Complaints by contract type that were closed by the Bank in the time period 2019–2023*

Contract Type	2019	2020	2021	2022	2023
Works	6	6	3	6	2
Goods	2	6	5	6	8
Supply & Installation⁵	1	N/A	N/A	N/A	N/A
Commodities	0	0	0	0	0
Consultancy	2	2	4	4	5
Total	11	14	12	16	15

The 15 Procurement Complaints concerned 10 different Bank-financed projects, with 5 complaints relating to projects in the Western Balkans (Bosnia and Herzegovina (3), Serbia (1), Albania (1)), while 4 complaints were submitted concerning projects in Türkiye. The remaining 6 complaints relate to projects in 6 different countries: Egypt, Moldova, Mongolia, Romania, Uzbekistan, and Ukraine.

Table 27. *Location Bank Projects related to Procurement Complaints 2023*

Western Balkans	5
Türkiye	4
Other	6
Total	15

⁵ From 2020, contracts for “Supply and Installation” are included in the contract type category of “Works or “Goods”, as appropriate.

Summary of Procurement Complaints closed by the Bank in 2023

The following section provides a summary of the 15 complaints that were closed by the Bank in 2023. The information provided includes the nature and the outcome of the complaint process for each of these complaints.

1. Project: GrCF2 W1-Balti District Heating Phase 2 (Moldova)	
<i>Country Complainant</i>	United Kingdom
<i>Contract Amount</i>	€ 0.81 million
<i>Timeline</i>	< 3 months
<i>Nature of Complaint:</i> The Complainant's main objections to the competitive selection process were that (i) during the evaluation of the technical proposals, the Client had submitted requests for clarifications which were not consistent with the procurement process, without providing sufficient response time and when answers were provided, these have not been considered or properly interpreted and evaluated by the Client, (ii) the Client took into account evaluation factors that were not part of the specified methodology, (iii) there may be eligibility issues with the lead partner of the first-ranked consultant due to alleged sanctions exposure by the ultimate beneficial owners.	
<i>Summary:</i> The Bank has determined, on the basis of available information, that the Client acted in accordance with the requirements as set out in the applicable Request for Proposal and there are no eligibility restrictions in relation to the consultant proposed for contract award.	
<i>Outcome of Procurement Complaint Review</i>	Complaint Rejected

2. Project: Albania Infrastructure and Tourism -Enabling Project (Albania)	
<i>Country Complainant</i>	Albania
<i>Contract Amount</i>	€ 1,1 million
<i>Timeline</i>	< 4 months
<i>Nature of Complaint:</i> According to the Complainant, the contractor that was proposed to be awarded the contract did not meet the specific qualification requirement as set out in the tender documents, namely they did not fulfil the requirement of having previous experience of similar works (in relation to the restoration of wall paintings).	
<i>Summary:</i> The Bank found that the Client has correctly determined that the winning participant's proposal was the lowest substantially responsive proposal. The Bank determined that as set out in the qualification requirements the wall painting restoration is a relatively small component of the overall works requirement under the resulting contract. Therefore, the absence of wall painting restoration works on two of the three reference contracts submitted by the winning participant is correctly determined by the Client to be a minor deviation from the overall specific experience requirement of the procurement.	
<i>Outcome of Procurement Complaint Review</i>	Complaint Rejected

3. Project: GrCF2 W2 - Iasi Green Buildings (Romania)	
<i>Country Complainant</i>	Romania
<i>Contract Amount</i>	€ 3.3 million
<i>Timeline</i>	< 4 months
<p><i>Nature of Complaint:</i></p> <p>The Complainant questioned whether the Client correctly evaluated the proposals, in terms of:</p> <ul style="list-style-type: none"> - the overall compliance of the winning proposal with the applicable requirements; - compliance with the technical specifications prepared by the Client; - whether the prices offered by the proposed winning participant for equipment and facilities had been verified by the Client as part the tender evaluation. <p>The Complainant questioned whether for this particular contract a company from outside of Romania could provide a competitive proposal when compared with that of a domestic company, like the company of the Complainant.</p>	
<p><i>Summary:</i></p> <p>The Bank determined that the Client conducted the tender evaluation in a transparent and fair manner, and in accordance with the applicable evaluation methodology. The recommendation for contract award was based purely on the most economically advantageous proposal. The Bank requested further verification from the Client and their consultant concerning the prices in the winning participant's proposal, which were based on the prices the participant obtained from their suppliers. The Complainant's assertion that only a local company could submit a competitive proposal was thus unsubstantiated.</p>	
<i>Outcome of Procurement Complaint Review</i>	Complaint Rejected

4. Project: GrCF2 W1 - Ulaanbaatar Green Affordable Housing (Mongolia)	
<i>Country Complainant</i>	United Kingdom
<i>Contract Amount</i>	€ 1 million
<i>Timeline</i>	< 3 months
<p><i>Nature of Complaint:</i></p> <p>The Complainant is of opinion that their proposal should not have been rejected, because it is technically better and financially more affordable. Furthermore, they claim that their proposal should not have been rejected after the financial opening on the basis of the absence of a power of attorney. According to the Complainant, the Client has a preference for the winning participant and that this preference is based on other reasons than the failure to follow the signatory criteria as defined in the Request for Proposal.</p>	
<p><i>Summary:</i></p> <p>The Bank rejected the complaint, because it was found that the Client conducted the tender evaluation process materially in accordance with both the requirements of the procurement documents and the PPR. The Client correctly determined that the Complainant's proposal should be rejected on the grounds of material deviations in its proposal submission (as the Complainant did not submit adequate authorisation). Furthermore, the Complainant ignored the fact that price adjustments in relation to their proposal would have been required, which means the Complainant did not submit a more affordable price.</p>	
<i>Outcome of Procurement Complaint Review</i>	Complaint Rejected

5. Project: Türkiye COVID-19 Equipment Emergency Response (Türkiye)	
<i>Country Complainant</i>	Türkiye
<i>Contract Amount</i>	€ 2,3 million
<i>Timeline</i>	< 1 month
<i>Nature of Complaint:</i> The Complainant asserted that the goods to be supplied by the proposed winning participant do not meet the technical requirements set out in the procurement documents for Lot 18 (hybrid incubator).	
<i>Summary:</i> The Client cancelled the tender exercise. The Bank discontinued the review.	
<i>Outcome of Procurement Complaint Review</i>	Review Discontinued

6. Project: Türkiye COVID-19 Equipment Emergency Response (Türkiye)	
<i>Country Complainant</i>	Türkiye
<i>Contract Amount</i>	€ 6.5 million
<i>Timeline</i>	< 3 months
<i>Nature of Complaint:</i> The Complainant disputed the outcome of the Client's technical evaluation in relation to Lot 2 (Anaesthesia machine). According to the Complainant, the device offered by the winning participant does not meet several technical specifications as set out in the procurement documents. The Complainant argues that, based on their review of publicly available brochures, none of the models offered by the winning tenderer in the market fulfils the technical specification requirements and the offered device should be considered as having a material technical deviation.	
<i>Summary:</i> The Bank has carefully reviewed the procurement complaint with the assistance of the medical equipment consultant, who has been assisting the Bank with this project. On the basis of the information provided, the Bank has determined that the devices proposed by the winning participant complied with the applicable technical specifications. The Bank has found that the Client has correctly determined that the winning proposal was the lowest substantially responsive proposal.	
<i>Outcome of Procurement Complaint Review</i>	Complaint Rejected

7. Project: Turkey COVID-19 Equipment Emergency Response (Türkiye)	
<i>Country Complainant</i>	Türkiye
<i>Contract Amount</i>	€ 1.3 million
<i>Timeline</i>	< 3 months
<i>Nature of Complaint:</i> The Complainant disputed the outcome of the Client's technical evaluation in relation to Lot 19 (incubators). According to the Complainant, the device offered by the winning participant does not meet several technical specifications as set out in the procurement documents. The Complainant argued that, based on their review of publicly available manuals, none of the models offered by the winning tenderer in the market fulfils the technical specification requirements and the offered device should be considered as having a material technical deviation.	

<p><i>Summary:</i></p> <p>The Bank has carefully reviewed the procurement complaint with the assistance of the medical equipment consultant, who has been assisting the Bank with this project. On the basis of the information provided, the Bank has determined that the devices proposed by the winning participant complied with the applicable technical specifications. The Bank has found that the Client has correctly determined that the winning proposal was the lowest substantially responsive proposal.</p>	
<i>Outcome of Procurement Complaint Review</i>	Complaint Rejected

8. Project: GrCF2 W2 - Alexandria Metro (Egypt)	
<i>Country Complainant</i>	Egypt
<i>Contract Amount</i>	€ 60 million
<i>Timeline</i>	< 3 months
<p><i>Nature of Complaint:</i></p> <p>The Complainant disagreed with the Client's rejection as a result of a change in the composition of joint venture after shortlisting stage. The Complainant submitted the Procurement Complaint after completion of the Request for Bank Procurement Review process (where it was determined that the Client correctly rejected the proposal).</p>	
<p><i>Summary:</i></p> <p>The Complainant subsequently withdrew their Procurement Complaint. The review was subsequently discontinued.</p>	
<i>Outcome of Procurement Complaint Review</i>	Review Discontinued

9, 10, 11. Project: BiH TransCo Telecom Digitalization (Bosnia and Herzegovina)	
<i>Country Complainant nr 9</i>	Bosnia and Herzegovina
<i>Country Complainant nr 10</i>	Finland
<i>Country Complainant nr 11</i>	Serbia
<i>Contract Amount</i>	€ 20 million
<i>Timeline</i>	< 2 months
<p><i>Nature of Complaint:</i></p> <p>The Complainant asserts that the Client did not provide their response to the requests for clarifications within a reasonable timeframe, the Client refused to extend the tender submission deadline, the Client included unclear or inconsistent specifications in the procurement documents, the Client included specifications which were copied from particular vendors or manufacturers and were written in such way that no other manufacturer can meet these specifications.</p>	
<p><i>Summary:</i></p> <p>As the Bank received three similar Procurement Complaints relating to the same Project, it was decided to review and determine these complaints jointly.</p> <p>Based on the information available, the Bank determined that the Client had not materially carried out the procurement process in accordance with the PPR by dismissing an explicit request from the Bank to extend the submission deadline as it would otherwise be unreasonably limiting competition. The Bank therefore declared misprocurement in accordance with Section III, Article 2.15 PPR and determined that the resulting contract would no longer be eligible for Bank financing.</p>	

<i>Outcome of Procurement Complaint Review</i>	Complaints Upheld
--	-------------------

12. Project: Serbia Cargo Rolling Stock Renewal (Serbia)

<i>Country Complainant</i>	Serbia
<i>Contract Amount</i>	€ 0.3 million
<i>Timeline</i>	< 3 months
<p><i>Nature of Complaint:</i></p> <p>The Complainant's main objections to the contract award process were that (i) the information provided by the Client in its response to the Complainant's request for a debriefing was vague and contained non-relevant comments, (ii) the Client's evaluation of the proposed candidates by the Complainant for the Team Leader and Deputy Team Leader positions and the explanation provided about these candidate's weaknesses was incorrect, and (iii) the Client assessment of the Complainant's proposed methodology and in particular the comment that their main weakness is that they have proposed a small number of non-key experts was incorrect.</p>	
<p><i>Summary:</i></p> <p>The Bank determined that overall, the tender was evaluated in an open, consistent, and transparent manner, and in accordance with the provisions of the procurement documents and the PPR. The Complainant arguments were unsubstantiated, as the relevant qualifications and requirements were included in the procurement documents. Furthermore, the scoring of key experts seems justified on the basis of their experience as provided in the submitted proposals.</p>	
<i>Outcome of Procurement Complaint Review</i>	Complaint Rejected

13. Project: Uzbekistan Water Supply Energy Efficiency Project (Uzbekistan)

<i>Country Complainant</i>	Italy
<i>Contract Amount</i>	€ 3.4 million
<i>Timeline</i>	< 2 months
<p><i>Nature of Complaint:</i></p> <p>The Complainant asserts that the participant who is being proposed for contract award, a joint venture, should be rejected because they changed the composition of the joint venture after the shortlisting stage and as a result do not meet the shortlisting criteria anymore. Furthermore, the Complainant stated that the proposed winning joint venture's contingencies were, incorrectly, deducted from their proposal, making them the highest ranked participant.</p>	
<p><i>Summary:</i></p> <p>The Bank determined that the proposed winning joint venture should have been rejected by the Client because in the new composition they would never have met the shortlisting requirements. Furthermore, the contingencies were competitively priced by the participants, making it difficult to deduct them in transparent and comparable manner from the financial proposals of the participants. By only deducting contingencies from the winning proposal, the Client treated the proposed winning joint venture more favourably. If contingencies had not been deducted, the Complainant would have been awarded the contract. Based on the information available, the Bank has determined that the Client has not materially carried out the procurement process in accordance with the PPR and requested the Client to re-evaluate the proposals taking into account the Bank's considerations.</p>	
<i>Outcome of Procurement Complaint Review</i>	Complaint Upheld

14. Project: Ukrenergo Transmission Network Emergency Restoration (Ukraine)	
<i>Country Complainant</i>	Ukraine
<i>Contract Amount</i>	€ 51,5 million
<i>Timeline</i>	< 2 months
<p><i>Nature of Complaint:</i></p> <p>The Complainant questioned how the Client could have awarded the contract to the winning participant given that the minutes of the tender opening showed that this participant did not provide its price (for each lot a price of EUR 0 was indicated). The Complainant furthermore stated that the Client included in the notification of evaluation a comparison table listing the prices submitted by the proposed winning participant. The Complainant questioned the transparency of the tender process, because according to them it is not clear how the Client could have obtained these prices given that the minutes stated EUR 0.</p>	
<p><i>Summary:</i></p> <p>On the basis of the available information, the Bank determined that the Client overall acted materially in accordance with the provisions of the procurement documents and the PPR.</p> <p>The prices in the minutes of tender opening are automatically populated from specific fields in the ECEPP online pricing form, which participants must manually populate. The system cannot take prices from the documents uploaded as part of the proposal (e.g. letter of tender, price schedule). The Client cannot influence the opening of the proposals, nor the information automatically uploaded into the minutes of the meeting.</p> <p>The proposed winning participant included a value of EUR 0 for the fields that are used to automatically populate the minutes of meeting, but they provided their prices in the other fields of the ECEPP online pricing form and in the required documents that consist of their proposal. The proposed winning participant had provided their prices as part of their proposal, which the Client could compare against the prices provided by the other participants.</p> <p>Given that the submissions were done in ECEPP and cannot be amended after the tender submission deadline, the Client could verify that the proposed winning proposal was submitted within the deadline and that the proposal contained the necessary and required information for the Client to evaluate the proposal and price. Therefore, the Client could verify what the read out price would have been if they would have correctly completed the ECEPP online pricing form. The Client evaluated the proposed winning proposal as substantially responsive and the most economically advantageous for each lot. The proposed winning participant was determined by the Client to be qualified and capable of performing the contract.</p>	
<i>Outcome of Procurement Complaint Review</i>	Complaint Rejected

15. Project: Turkey COVID-19 Equipment Emergency Response (Türkiye)	
<i>Country Complainant</i>	Türkiye
<i>Contract Amount</i>	€ 5.0 million
<i>Timeline</i>	< 2 months
<p><i>Nature of Complaint:</i></p> <p>The Complainant alleges that certain features that were requested in the technical specification under the current procurement exercise PP8 Lot 2 (coloured dopplers) hinder competition and put them in a financially disadvantageous position against other participants by requiring them to offer a more expensive and premium device. These technical features were included in the technical specification through an amendment during the tender process. The Complainant argues that these additional</p>	

<p>features, which were not initially requested, have no clinical basis and are specifically addressed against them. The Complainant stated that given the change in technical and administrative specifications, a company with no experience in ultrasound systems could qualify and was awarded the contract.</p>	
<p><i>Summary:</i></p> <p>The Bank has carefully reviewed the procurement complaint with the assistance of the medical equipment consultant, who has been assisting the Bank with this project.</p> <p>On the basis of the information provided, including the consultant's report, the Bank had determined that (i) the additional features had clinical justification, (ii) the features did not hinder competition as under the features listed the Complainant had the ability to propose other models, (iii) the proposed winning participant was not provided an unfair competitive advantage, because the Complainant on the basis of the list of options had the ability to propose lower spec model and / or lower unit prices for the proposed model, (iv) the qualification criteria were amended to increase competition, but this did not result in an inexperienced supplier being awarded the contract or devices from inexperienced manufacturer would be supplied as alleged in the complaint.</p> <p>The Bank therefore concluded that the Client had correctly determined that the proposal by the proposed winning participant was the most economically advantageous proposal.</p>	
<i>Outcome of Procurement Complaint Review</i>	Complaint rejected

Prohibited practices

The Agreement Establishing the European Bank for Reconstruction and Development expressly provides that the Bank must take all necessary measures to ensure that the proceeds of its financing are used solely for the purposes for which such financing was granted. To this end, OCCO investigates and, if appropriate, recommends sanctions for corrupt, fraudulent, coercive, collusive and obstructive practices, theft, and misuse of Bank resources or Bank assets (Prohibited Practices) pursuant to the Bank's Enforcement Policy and Procedures (EPPs).

In 2010, the Agreement for Mutual Enforcement of Debarment Decisions (AMEDD) was signed by the African Development Bank Group, the Asian Development Bank, the Inter-American Development Bank Group, the World Bank Group and the Bank pursuant to which it was agreed that these Mutual Enforcement Institutions would recognise each other's debarment decisions by cross-debarment of the same entities and individuals if specific conditions are met. Entities (and their affiliates) or individuals are ineligible to become the Bank's counterparty in any new Bank project if - in accordance with the EPPs - it is determined that (a) they have engaged in any Prohibited Practice in the context of a Bank project or Bank assets, (b) they are subject to a Third Party Finding, or (c) they are subject to a debarment decision by a Mutual Enforcement Institution.

In 2023, enforcement proceedings resulted in the debarment of seven entities and three individuals ranging from 11 months to 5 years, one case also had conditional non-debarment period of 24 months.

In 2023, in accordance with the AMEDD, the Bank cross-debarred 102 entities and 41 individuals and requested the cross-debarment of six entities and one individual, who have been subsequently cross-debarred.

Entities and individuals (cross-) debarred by the Bank are ineligible to be awarded Bank-funded contracts during the (cross-) debarment period. On its website the Bank publishes all entities and individuals it (cross-) debarred over the years ([http:// www.ebrd.com/ineligible-entities.html](http://www.ebrd.com/ineligible-entities.html)).

PPAD and OCCO work closely together in relation to public sector procurements. The Procurement Function refers potential Prohibited Practices matters to OCCO, provides information on Bank-financed procurement projects to OCCO if required for its investigation, and shares its knowledge and experience about procurements with OCCO. In addition, following the conclusion of its investigations, OCCO shares any relevant lessons learned with PPAD to further strengthen the Bank's procurement processes.

4. Procurement Policy and Advisory Department (PPAD)

Introduction

The Bank's procurement function provides services and advice to both internal and external clients. It is responsible for developing, updating the procurement policy and procurement policy related documents, monitoring compliance with the PPR, training staff and supporting clients, creating and maintaining an appropriate procurement quality assurance system and disseminating information about procurement opportunities and other useful information to the business community. Furthermore, the function supports Countries of Operation in their procurement transitional efforts. To achieve these objectives the procurement function is divided into two parts: 1) The Procurement Policy and Advisory Department (PPAD Policy), which has the overall procurement policy responsibility; and 2) operational support (PPAD implementation) to the Banking Teams and NSD. PPAD is part of the Vice Presidency for Risk and Compliance.

Analysis

With the support of the Bank's procurement experts in PPAD the Bank's public sector clients, maintained a very high level of procurement activities despite the ever-increasing complexities of the current geopolitical climate. The overall number of contracts including the energy security gas supply related projects signed in 2023 is 407 with a total value of € 4.8 billion, a historical record figure for public sector contracting.

Despite the record level in the contracting value, the relatively small sample of contracts spread over different countries and sectors is however not enough to identify any statistically sound specific conclusions or firm trends. The level of the procurement activities strongly correlates with the Bank's investments in public sector and its expanding the range of products offered to clients.

In the opinion of PPAD, the statistics do however demonstrate that the Bank's open tendering and competitive selection procedures being the most competitive, transparent and truly open procedures are the most efficient procurement methods, enabling a high level of competition for the often-complex contracts that the Bank finances. Data also demonstrate a high level of interest in EBRD supported tenders from market players worldwide with over 27 thousand firms and individuals registered in the Banks e-procurement platform, ECEPP. A stable upwards trend is also observed in respect of growing business maturity and competitiveness of the companies from the countries of operation as expressed by their success rate.

The main observations in respect of the factors having a negative impact on the progress of the project implementation continues to be the low implementation capacity of many Bank clients, as well as limited and often inadequate resources available for consultancy support as well as insufficiently prepared projects.

Contemporary geopolitical and global economic issues affecting market access, supply chains, logistics and payment systems, coupled with a growing demand for reflecting secondary (to procurement) politico- economic considerations have a substantial effect on public procurement and have triggered a need for an earlier revision of the Procurement Policies in Rules in 2025 and puts a serious strain on PPAD resources.

Support to Banking teams and clients

Overview

The support to Banking teams and NSD is the main priority for PPAD and is significant in terms of the use of PPAD's resources. PPAD is actively involved on a daily basis in the procurement aspects of all public sector projects, as well as private sector projects involving procurement elements. PPAD is assisting the project teams in their due diligence, structuring, preparation and monitoring procurement arrangements for and implementation of the Bank administered projects and providing advice and guidance both on specific and generic matters to ensure compliance with the requirements of the PPR.

In 2023, PPAD-Policy provided direct support to the Natural Resources team under the Ukraine: NAK Emergency Gas Finance Project and the Moldova: Gas Security Supply Project. In total, 109 contracts with a total value of EUR 698 million were signed (EUR 497 million under the NAK Emergency Gas Finance Project of which EUR 309 million was Bank-financed and EUR 188 million grant-financed by the Norwegian Government and EUR 201 million under the Moldova: Gas Security Supply Project, 100 % Bank-financed). Due to the confidential nature of the pricing of natural gas, the breakdown of the individual contract awards is not included in the overall statistics contained in this report.

Procurement impact of the war in Ukraine

As Ukraine emerges from Russia's invasion, public procurement will be critical for the restoration and reconstruction of infrastructure and delivery of services. The country will face challenges in balancing speed, transparency, and accountability in the implementation of public procurement. Key challenges will include: (i) huge needs for restoration that will generate high volume procurement activities that will require quick action; (ii) need for enhanced transparency and accountability to maintain public and key stakeholders' trust; (iii) constrained and dissipated capacity in procurement and contract management; and (iv) need for reduced administrative burden and realize savings for procurement of goods and services. Restoration will also offer opportunities for the country to build back better including implementation of sustainable procurement. A balanced and strategic approach for procurement and contract management focusing on both implementation and reform will be required to achieve value for money with sustainability.

At the same time, Ukraine has made significant progress in digitizing the procurement processes under National Rules. The progressive e-procurement system Prozorro made it possible to quickly adapt the processes to the outbreaks of war, and even create a separate procurement module with the intent to fully meet the requirements of international partners like EBRD.

During the 2023 the World Bank Annual Meetings in Marrakech, Morocco, the Council of Europe Development Bank (CEB), the European Bank for Reconstruction and Development (EBRD), the European Investment Bank (EIB) and the World Bank agreed to further harmonize procurement practices for public sector investment financed by the MDBs in Ukraine and the respective Presidents signed an MoI on procurement. Full harmonization may not be possible due to difference in the governance frameworks and applied business models, however the MDBs are now committed to continue the harmonization efforts.

The MDBs commit to work with the Government to strengthen its procurement system and increase their use of Ukraine's *Prozorro* e-procurement system, as well as DREAM platform for better transparency and coordination of the recovery projects. Further to the signing of the MoI, the MBDs have prepared a road map together with the Government of Ukraine. The MDBs are already working with the Ministry of Economy on many aspects of the proposed roadmap.

Selective Reviews

As an integral part of enhancing the quality of the services to the clients and an important element of fiduciary oversight function of the Bank, in 2023, risk-based selective reviews of documents were carried out to cover 54 procurement processes (total amount of approximately € 5.42 billion, involving Bank's financing of approximately € 2.47 billion). These processes represent about 11 per cent of 499 procurement process the Bank's clients were carrying out and cover about 54 per cent of the total contract value (or 43 per cent of the Bank's financing). 33 of these processes resulted in 2023 in contract awards for a total contract amount equivalent to € 1.54 billion. The rest of the processes, but three (which are cancelled) are ongoing.

Contracts and selective review pipeline

The current portfolio of contracts under PPAD monitoring consists of 1,155 signed contracts in progress (total value equivalent to € 11.84 billion); as well as 701 contracts (total value equivalent to € 11.39 billion) to be signed, of which 280 procurement processes for contracts (total value equivalent to € 7.03 billion) are currently in progress via ECEPP. 421 contracts (total value equivalent to € 4.81 billion) are yet at planning stage, of which 46 contracts (total value equivalent to € 0.5 billion) will be procured outside of ECEPP via alternative procurement arrangements.

62 procurement processes (9 per cent of the procurement portfolio to be procured), covering a contract value exceeding € 5.07 billion (45 per cent of the total value) are currently identified to be subject to selective review.

It should be noted that procurement processes identified for selective review are indicated in the procurement plans attached to the Board document or the Delegated Authority for each project. However, PPAD Policy may revise the selective review plan during the implementation of projects to optimise resources and increase the effectiveness of the selective review process.

EBRD Client Electronic Procurement Portal (ECEPP)

ECEPP continues to be the mandatory platform for public sector procurement for EBRD financed public sector projects, which are subject to the PPR, with the exception to procurement under national laws, by utilities or procurement of commodities. The system is used by clients in 28 Countries of Operations. More than 26,800 users from 149 countries are registered in the system to participate in procurement opportunities under Bank financed projects.

SME support

The PPR applies to the activities of the Advice for Small Businesses (ASB) of the SME Finance & Development Group (SME F&D), who introduces SMEs to local consultants with specific know-how who can help them improve performance and grow. Upon successful completion of the advisory assignment, a grant is paid to the beneficiary SME from funding provided predominantly by bilateral or multilateral donors, occasionally from SSF. Most advisory projects are run on a cost-sharing basis, with the client paying a portion of the total project cost and ensuring the sustainability of the intervention.

- In 2023, SME F&D signed 1,922 Grant Agreements with beneficiary SMEs (under client-led contracting) for ASB assignments carried out by local consultants in 30 Countries of Operation. The reduction of 2.5 % in number of Grant Agreements issued over 2022 was due to the impact of various crises, from earthquakes in Türkiye and Morocco to the conflict in West Bank and Gaza, as well as procedural changes for enhanced quality assurance on projects. This was partially offset by scaling up of other tools of ASB (under different contracting modalities) and

the further roll out of products such as Relocation grants, aimed at supporting SMEs relocate their businesses outside of areas affected by war or natural disasters.

- The total value of those Grant Agreements in 2022 was € 16.1 million, which was topped up by client contributions totalling € 9 million (or 36 %) towards the total value of advisory assignments of € 25.1 million.

Policy dialogue

Introduction

In addition to supporting the Banking teams and clients, PPAD's remit include many other aspects such as procurement policy dialogue with Countries of Operation, cooperation with other international institutions such as MDBs and International organisations, such as OECD, UN, EU, WTO, FIDIC, DRBF etc., as well as local capacity building in form of two university based master programmes in public procurement management, specific workshops, outreach activities, procurement complaints handling, development and update of policy related documents and guidance notes.

The policy dialogue function of PPAD is reflected in the PPR, which require the Bank to review the procurement laws, regulations and procedures of the Countries of Operation on a periodical basis, and provide advisory services, technical assistance and training to help them reach consistency with the principles of the WTO Government Procurement Agreement and good international practices, such as those reflected in the UNCITRAL Model Law on Public Procurement.

Cooperation with Authorities of the Countries of Operation

To accomplish the requirements of the PPR, PPAD is engaged in a continuous policy dialogue with the governments of selected Countries of Operations, their procurement authorities and institutions.

In 2023, the policy dialogue with the Countries of Operations continues to be affected by the war in Ukraine, given that the technical assistance financial resources were directed to support Ukraine and only limited funds were available to support the policy dialogue activities in other countries.

Nevertheless, PPAD managed to maintain constructive policy dialogue with the Procurement, Anti-monopoly and Anti-Corruption Authorities of Albania, Armenia, Georgia, Kazakhstan, Lebanon, Moldova, and Uzbekistan, focusing on improving project implementation and procurement systems in the countries as well as on anti-corruption measures.

PPAD was also providing its strong support to Ukraine to help the authorities to adjust their way of doing business, especially as public procurement and infrastructure maintenance are concerned, under the challenging conditions of war time.

EBRD–UNCITRAL Initiative (Led by LTT in cooperation with PPAD)

The EBRD–UNCITRAL Initiative and the related technical assistance and programmes were initiated, and the ongoing programmes progressed in the following countries: Albania, Lebanon, Moldova, and Uzbekistan.

The Initiative promotes a legislative reform and institutional capacity building project aimed at upgrading the public procurement legislation to the standards of the 2011 UNCITRAL Public Procurement Model Law. This initiative is one of the key policy dialogue activities PPAD is involved in, working in close cooperation with LTT, who leads implementation of the initiative.

EBRD–WTO GPA Secretariat Cooperation (Led by LTT in cooperation with PPAD)

The above work was undertaken as part of the EBRD GPA Technical Cooperation Facility, which was set up to provide an independent assessment of compliance of the procurement legal framework of countries with mandatory GPA requirements, regulatory capacity building and support in the preparation of a national GPA negotiating strategy, providing legal and policy advice throughout the WTO GPA negotiation process. The Facility also assists with the development of new public procurement legislation, if necessary, to align national laws with the 2012 GPA standards.

Under the auspices of the Facility and in close cooperation with the World Trade Organisation Government Procurement Agreement (WTO GPA) Secretariat, further sub-projects were carried out to assist the Bank's countries of operation with the adaptation of their procurement laws to the standards of WTO GPA and the countries' accession to the Agreement.

In 2023, North Macedonia became a party to WTO GPA bringing the number of members amongst 38 Countries of Operations to 17.

At present, seven Countries of Operation, which are WTO members, are in the process of acceding, namely Albania, Georgia, Jordan, Kazakhstan, Kyrgyz Republic, the Russian Federation and Tajikistan.

Belarus, Mongolia, and Türkiye have the status of observers, but have not yet formally initiated the accession negotiation process. On request of the countries LTT in cooperation with PPAD continued to provide advice and support in the accession process.

EBRD–OECD Anti-Corruption Network Cooperation

Within the framework of a broad cooperation with the OECD/Anti-Corruption Network for Eastern Europe and Central Asia and the Istanbul Anti-Corruption Action Plan, PPAD experts were part of the working group developing and piloting a new indicator-based methodology of assessment of the countries corruption risks and anti-corruption programs, which includes the assessment of public procurement as a significant area of public financial management, involving control over spending about 14 per cent of a country GDP on average.

In 2023, PPAD experts participated in the 5th round of monitoring in Armenia, Azerbaijan, and Moldova under this new methodology. The monitoring reports were adopted at the plenary sessions at OECD in Paris in October 2023.

Earlier in 2023, PPAD experts provided training on the procurement benchmarks and indicators in the new methodology to national stakeholders from Kazakhstan, Kyrgyzstan, Mongolia, Uzbekistan, and Tajikistan. Furthermore, they participated in work of the Anti-Corruption Network for Eastern Europe and Central Asia.

EBRD OECD MAPS Cooperation

PPAD was one of the key stakeholders in development of the OECD Methodology for Assessing Procurement Systems (MAPS), as the tool that assesses public procurement systems in their entirety, back in 2015–2018. The methodology is universal and can be used by any country - regardless of GDP per capita level or development status.

Since inauguration, PPAD was supporting and partially financing MAPS Secretariat (as the cornerstone of MAPS assessments) and played an active role as one of the Steering Committee

members and provider of critical expertise on the procurement systems and practice in the countries of operation through Technical Advisory Group.

By end of 2023, the following countries of operation were assessed using the methodology: Greece, Kazakhstan, Lebanon, Moldova, and Tunisia. Assessments are ongoing for Montenegro and Morocco, and preparation was completed for an assessment of Armenia.

In 2023 PPAD experts were members of the team assessing Montenegro, in cooperation with the World Bank, the European Investment Bank and the Council of Europe Development Bank. The draft assessment was presented to the government and other stakeholders during a workshop in Montenegro in November 2023.

Cooperation with International Organisations

Based on its longstanding cooperation with partner institutions, PPAD coordinated the policy dialogue initiatives in the region with the African Development Bank, the Asian Development Bank, the Asian Infrastructure Investment Bank, the Council of Europe Development Bank, the European Investment Bank, the Islamic Development Bank, the World Bank, DRBF, EU, FIDIC, OECD/SIGMA, OSCE, and, as mentioned above, in cooperation with LTT, UNICTRAL, and the WTO GPA Secretariat.

MDB collaboration

PPAD continues to play an active and often leading role in procurement policy discussions among the major MDBs. The MDB Heads of Procurement (HoP) normally meet approximately every ten months to discuss and agree on joint efforts and harmonisation of procurement principles but since the pandemic the HoP group also meet every month on-line. In 2023, HoP meeting was hosted by ADB in Manila. Discussions were focused on topics related to sustainable procurement and the setup up of a HoP working Group on this topic, the war in Ukraine and the drafting of an MoU (later Mol) as well as the impact of the geopolitical stance in relation to Chinese participation in MDB financed contract opportunities. In this context the European International Contract Association participated with a presentation geared at promoting EU contactors. EBRD also agreed to host the next HoP in London during 2024.

Internal Capacity Building and external Professionalisation

Clients and Staff training

One of PPAD's main priorities in 2023 was to provide high-quality training to our clients and staff on various aspects of procurement. Sessions were delivered to more than 400 Bank staff and clients from 13 countries, covering topics such as the PPR and its application, standard procurement documents/methods, contract amendments, variation orders, disbursements and more. These training sessions helped to enhance the skills and knowledge of our stakeholders and to improve the efficiency and effectiveness of our procurement processes.

In addition, PPAD conducted 33 ECEPP training webinars, which were attended by a total of 452 people (clients, consultants, Bank staff in HQ and ROs).

Given a large number of infrastructure projects in the public portfolio of the Bank, an advance training was arranged on use of FIDIC contracts for PPAD staff was arranged in 2023, which covered different forms of contract ranging from EPC/Turnkey through Design and Build and conventional construction to simple works. These training sessions aimed to enhance the PPAD staff's skills and knowledge in providing advisory services to the Bank's clients.

Procurement Function Capacity Building

In 2023, PPAD held fortnightly Procurement meetings, The meetings were carried out with the overall objective of ensuring consistency in the interpretation of the PPR. The meetings are also used as a vehicle for early consultation and subsequent finalisation of internal and external procurement guidance material, policy papers and standard procurement documentation.

PPAD staff completed a course focusing on the new FIDIC Short Form of Contract (Green Book). The sessions covered changes to the contracts' terms and conditions, various new elements and development of the contracts, as well as the practical application of the contract.

The International Master's in Public Procurement Management (IMPPM)

IMPPM is a full post-graduate university course concentrated and delivered in one calendar-year on a Master level at the University of Rome – "Tor Vergata" and consists of four months of in-presence classes. At the University of Belgrade, Faculty of Law, the (I)MPPM is run as an executive Master programme. Both follow the same curriculum, with traditional didactic lectures, balanced with case studies and seminars, including lectures on IFI procurement delivered by PPAD Senior Advisers. This formal part of the programme is followed by distance learning and a practical compulsory internship, followed by preparation, submission and defence of a final dissertation. Monitoring of learning progress is done through using customary Master's level exam methods, consisting of mid-term and final exams in order to record individual student's proficiency. Upon successful completion, a Master's degree is awarded by the Master's Executive Committee.

The objective of the IMPPM is to build procurement capacity through a comprehensive and structured English language university programme designed to address the capacity building needs of senior managers of public procurement authorities and major public entities in the EBRD countries of operation. The core learning concept is a combination of academic and work-place experience with hands-on activities, developed in modules covering in addition to in depth well-structured theoretical coverage, the best procurement practice topics, such as: Strategy & Organisation; Legal Framework & Procurement Law; Purchasing Strategy & Procedures; Procurement Cycle & Planning; Environmental, Sustainability and Social concerns. Economic Market & Products Analysis; Ethical aspects & Red flags and IFI specific procurement.

The success of the two programmes is internationally recognised and have yielded a fantastic positive reputation for EBRD as being the main sponsor and supporter during the 12 years of existence. Unfortunately, the EBRD funding to the two programmes did not materialise for the 2023 intake and a reduced class funded by Caribbean Development Bank, African Development Bank, the Inter-American Development Bank Med-Or Leonardo Foundation, several self-funded students, and students funded by their employer has continued in Tor Vergata and the Master at the Belgrade University has temporarily been funded by the Serbian Government.

PPAD is currently in discussion with the University of Tor Vergata and the Kyiv School of Economics to repeat the success of the two Master's with a new joint Master's focused on procurement capacity building in Ukraine. This Master is envisaged to be delivered on-line by Tor Vergata and in presence by the Kyiv School of Economics but will be contingent on that funding will be available.

Environmental and Social Team

The PPAD Environmental and Social Team (PPAD E&S) was newly created in late 2022. The Team dedicated 2023 to integrating themselves into the operational framework of PPAD. Early efforts focused on aligning with the Environmental and Sustainability Department (ESD) to further enhance the established collaborative approach between the Departments. Multiple presentations facilitated

knowledge exchange between ESD and PPAD, fostering cooperation. Additionally, collaboration was further strengthened with the Gender and Economic Inclusion (GEI) team and the Climate Strategy and Delivery Department (CSD) to bolster synergy. The results of this work will ensure a smoother working relationship between all departments with an emphasis on early engagement in the project cycle and departmental initiatives.

The PPAD E&S team actively engaged in addressing significant issues impacting both the EBRD and its clients, particularly supply chain challenges in solar and wind projects, and matters related to electric batteries and green house emission. Furthermore, the team represented the Bank at the MDB Heads of Procurement Working Group for Sustainable Public Procurement, leading to the establishment of and active engagement in several sub-working groups.

Procurement related meetings, seminars, training, and outreach activities

PPAD was involved in various procurement-related initiatives and events aimed at the business community or other organisations:

- ✓ Participation at multiple virtual Heads of Procurement meetings
- ✓ In person and virtual lectures and conferences in Belgrade and Rome for the IMPPM programmes
- ✓ IMPPM Global conference
- ✓ Lecturing at Stuttgart University
- ✓ Ambitious Agenda Toward EU Accession: Public Procurement Transformation of Georgia
- ✓ Speaking at the conference ICC Croatia-CCE Regional Conference on Arbitration and ADR – Construction Projects Disputes
- ✓ The annual International Conference "FIDIC Business Days"
- ✓ Various virtual ECEPP training and events for multiple clients and suppliers
- ✓ A virtual outreach to the Irish business community with Business Development
- ✓ Attending at the OECD/ACN MAPS and steering committee meetings
- ✓ Participation in OECD monitoring missions
- ✓ Attending "Leading Practitioners in Procurement" at the OECD in Paris
- ✓ Speaking at IFI Day – Switzerland Global Enterprise
- ✓ Attendance at the Heads of Procurement meeting in Manila.
