EBRD – Aaa stable

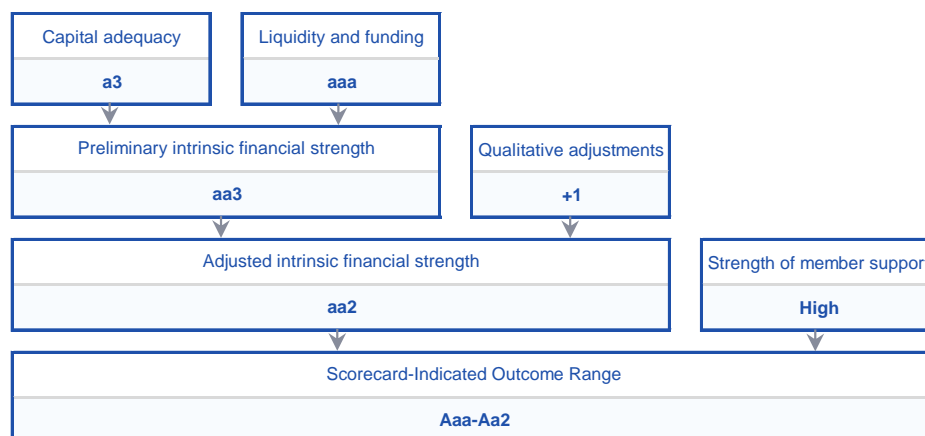

Regular update

Summary

» The credit profile of the [European Bank for Reconstruction and Development](#) (EBRD) reflects its moderate leverage and high share of paid-in capital, as well as a strong liquidity profile and prudent risk management. The EBRD is a large and established issuer among multilateral development banks (MDBs), with secure market access. The size and quality of the bank's liquid asset base provide a solid cushion against macroeconomic and financial shocks. Shareholders' strong ability and willingness to provide support provides a two-notch uplift to EBRD's already solid intrinsic financial strength; the EBRD stands out for the high share of callable capital being committed by Aaa and Aa-rated shareholders.

Exhibit 1

The EBRD's credit profile is determined by three factors

Source: Moody's Investors Service

Credit strengths

- » High cushion of paid-in capital and relatively moderate leverage
- » Strong liquidity levels supported by conservative internal requirements
- » Strong support of shareholders

Credit challenges

- » Comparatively weak asset quality and volatile asset performance, which will be exacerbated by impact of Russia's invasion of [Ukraine](#) (Caa3 negative)

Rating outlook

The stable outlook reflects our view that the EBRD's strong financial metrics and shareholder support will be maintained in coming years. Specifically, we expect the bank to be able to contain the fallout from Russia's invasion of Ukraine as well as financial stress in other countries of operations such as [Turkey](#) (B2 negative), similar to past episodes.

Factors that could lead to a downgrade

Downward pressure on the EBRD's rating would emerge if the bank experienced a significant deterioration in asset quality and losses over several years combined with a lack of shareholder response in the form of additional paid-in capital. While the board of governors recently approved the potential expansion of operations into Sub-Saharan Africa and Iraq - which we had deemed to potentially exert downward pressure on the rating - this expansion will not happen in the foreseeable future as the bank focuses on its traditional and core countries of expertise.

Profile

The EBRD was established in 1991 to assist the economies of Central and Eastern Europe (CEE) and the Commonwealth of Independent States (CIS) in their transition from centrally planned to market economies. Unlike many of its peers, the EBRD focuses on lending to the private sector. It also invests in equity participations and provides various technical assistance programmes to its recipients, most notably in the development of private enterprise. The EBRD's mandate stipulates that it must only work in countries that are committed to democratic principles.

Over the years, it has progressively extended its operations, including to Turkey in 2009 and to the Southern and Eastern Mediterranean (SEMED) region in 2011. The Bank ceased approving new loans in the Russian Federation since the annexation of Crimea in 2014 as well as public sector projects in [Belarus](#) (Ca negative) since their election in 2020, and private sector projects in Belarus in Q4 2021. Following Russia's invasion of Ukraine in 2022, EBRD's Board of Governors approved the formal suspension of access by the Russian Federation and Belarus to the resources of the Bank. This has meant that further disbursements under existing projects have been stopped, as have technical assistance projects. Combined exposure to both countries stood at a moderate 5.4% of loans and equity investments as of 2021. The EBRD's exposure to Ukraine stands at 7.1%, while the single-largest country exposure is to Turkey with a share of 14.8%. The bank's total development-related loans and equity investments stood at €35.7 billion as of end-2021.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the issuer/deal page on <https://ratings.moody's.com> for the most updated credit rating action information and rating history.

Detailed credit considerations

Our determination of a supranational's rating is based on three rating factors: capital adequacy, liquidity and funding and strength of member support. For Multilateral Development Banks, the first two factors combine to form the assessment of intrinsic financial strength, as shown on the cover page graphic. Additional factors can affect the intrinsic financial strength, such as risks stemming from the operating environment or the quality of management. The strength of member support is then incorporated to yield a rating range. For more information please see our [Supranational Rating Methodology](#).

FACTOR 1: Capital adequacy score: a3

We score the EBRD's capital adequacy at "a3", which balances the Bank's moderate leverage against a stable but relatively low development asset quality and comparatively weak and volatile asset performance.

Moderate leverage helped by high share of paid-in capital and prudent capital management...

The EBRD has one of the highest shares of paid-in capital among rated MDBs; at close to 21% of total capital its ratio is significantly higher than the standard ratio of 5%-10% for most other Aaa-rated MDBs. The bank also has accumulated significant retained earnings over the years, further bolstering its capital buffer. Its leverage – defined as development-related assets and treasury assets rated A3 or lower in relation to useable equity – was also comparatively low at 193% in 2021, down from 210.7% in 2020. The leverage ratio declined in 2021, after several years of a gradual increase, as useable equity rose faster than development-related assets. The leverage score of "a1" benefits from a one-notch uplift for EBRD's good profitability.

The high capital level provides a solid buffer against the potentially more acute credit risks from its private sector focus and its sizeable equity investments which are prone to volatility in mark-to-market valuations. The EBRD also operates with a range of prudential limits, including a maximum gearing ratio of 90% of operating assets and limits to risk-weighted economic capital usage, also set at 90% of available economic capital. Actual capital usage has historically been materially lower than the thresholds. The statutory capital utilisation was 79% at end-2021 and a similar ratio in 2020, which is comfortably below the ceiling. The bank's current 2022-24 Strategy Implementation Plan (SIP) expects the ratio to rise to 84% by the end of 2024. As of end-2021, economic capital utilisation stood at 65%, broadly stable compared to 2020 and 2019, but lower than in previous years when the ratio was generally at or above 70%. The ratio is expected to decrease marginally to 63% by the end of 2024, as per the current SIP.

...and also below the limit of 90% for economic capital Available economic capital (EUR billion), CAP utilisation (%)

Source: EBRD, Moody's Investors Service

...which supports the bank's relatively risky business profile

Strong capitalisation, moderate leverage and prudential capital management are key mitigating factors for EBRD's comparatively risky business profile given its focus on private-sector lending and equity investments. As of end-2021, 57% of operating assets were private-sector loans and 13% were equity investments, with the remainder sovereign and other public-sector loans.

The EBRD's business profile is captured by our assessment of the credit quality of its development-related assets. The DACQ score of "baa" is primarily anchored by the EBRD's stable but low weighted average borrower rating of "b2", which reflects the higher credit risk inherent in the bank's private-sector focus. However, we also take account of the EBRD's high-quality exposures in its markets of operation and its significant experience in operating within transition economies. The high degree of country and sector diversification, with no single sector accounting for more than a quarter of development-related exposure as of end-2021, is a further strength. Other concentration metrics such as the share of the Top10 exposures and single largest exposures are also strong.

Our assessment of asset performance at "baa2" reflects the bank's relatively high share of nonperforming assets (NPAs, 4% in 2021), which includes nonperforming loans (NPLs), losses on equity investments and called guarantees, with most of the NPAs resulting from the loan portfolio. The NPA ratio improved materially in 2021 compared to a year earlier, when the pandemic impact was greatest. But we expect asset performance indicators to worsen again in 2022, mostly reflecting the impact of the Russia-Ukraine conflict on the Ukrainian exposure as well as on equity valuations for the remaining exposure in Russia. In addition, contagion to neighbouring countries and more broadly the impact of higher energy and food prices will likely impact borrowers across EBRD's countries of operations. Exposures in Turkey will also remain challenging in our view, given the difficult operating environment in the country.

However, EBRD's strong risk management and prudent provisioning policies should help to limit the impact of its volatile asset performance on the overall credit profile. Provisions and loan loss reserves stand at 5.7% of total loans as of end-2021 (6.2% in 2020), equivalent to 1.1x gross impaired assets.

Underlying profitability has remained relatively stable, despite volatility in equity valuations

We assign a positive adjustment to the leverage ratio due to EBRD's strong underlying profitability. Headline financial results are heavily affected by valuation changes in its equity portfolio. At the same time, underlying realised profits – excluding valuation changes – have been relatively stable in recent years.

Last year, EBRD recorded its highest profit ever last year at €2.5 billion of which €2.4 billion were retained, adding to the already sizeable capital buffer. The largest profit driver were valuation gains from the equity portfolio, amounting to €1.5 billion compared to €0.2 billion in 2020. At the same time, income from lending operations and fees are much more stable at around €1 billion per year.

While profitability considerations are generally not a key determinant of MDB ratings, the EBRD's financial performance matters more than is the case for most peers. Shareholders have provided a solid buffer of paid-in capital, with the expectation that the bank will manage to grow its operations through retained earnings. The bank works with a Net Income Allocation Framework, which it adopted in 2016 and which – among other things – proposes that on a rolling three-year basis, at least 75% of the bank's growth in member's equity should be retained in reserves. As of end-2021, cumulative retained earnings stood at €13.3 billion, supplementing paid-in capital of €6.2 billion.

Exhibit 5

EBRD recorded its highest-ever net profit in 2021 € million

Source: EBRD, Moody's Investors Service

FACTOR 2: Liquidity and funding score: aaa

The EBRD's liquidity and funding score of "aaa" incorporates its very strong and lengthy track record of access to market funding, as well as the strong liquidity levels supported by conservative internal requirements.

EBRD benefits from a sizeable liquid asset buffer which helps to absorb shocks

We score the EBRD's liquid resources sub-factor at "aaa", reflecting the size and quality of its liquid asset base, which provides a substantial cushion to cope with macroeconomic and financial shocks. The bank's liquid assets stood at €33.9 billion in December 2021. The credit quality of the treasury portfolio is high, with 80.4% of the assets rated Aaa or Aa (as of December 2021), and asset holdings are well diversified across mostly advanced economies. As a rule, the EBRD targets an average credit rating of its treasury assets of Aa2 or better. The average maturity has declined somewhat since 2018, standing at about 1.1 years in 2021.

Our assessment of EBRD's liquidity is also supported by its prudent liquidity policies, with operational targets set comfortably above the policy minimum. Under its internal guidelines, net liquid assets must cover a minimum of 75% of projected net cash requirements over the next two years, and the bank must be able to meet its obligations for at least 12 months under an extreme stress test scenario (1 in 100-year event based on EBRD stress tests). As of December 2021, net liquid assets represented 148% (2020: 152%) of requirements, significantly above the 75% limit.

Our own liquidity coverage calculations differ somewhat from the EBRD's internal guidelines but equally show very prudent levels of liquidity. We compare the size of the available liquid assets to cash outflows in a stressed scenario over the coming 18 months, in which the EBRD has no access to markets but continues its normal business operations. EBRD's liquid assets ratio stands at around 240% of net cash outflows as of end-2021.

Strong market access provides a consistent and stable source of funding

The EBRD's quality and structure of funding is assessed at "aaa", given its strong market access which provides a consistent and stable source of funding for its operations, as reflected by the frequency and diversity of issuances. The EBRD has a long-established presence in international bond markets. It issues in a variety of markets and currencies, as well as in diverse formats and at consistently low costs. Its investor base is very diversified across both regions and types of investors, including a large share of buy-and-hold investors and central banks. Around half of its investor base is located in EMEA, with a further quarter each in the Americas and Asia, demonstrating the EBRD's ability to obtain funding in different markets.

Apart from benchmark issuances in core currency markets, the EBRD also focuses on developing capital markets in its countries of operations, issuing regularly in their local currencies. In addition, the EBRD actively uses buybacks to offer its investors a secondary market bid for all its bonds. The bank also uses private placements and innovative structures to meet specific investor demands, including exotic currencies and equity-linked structures, and the frequency of issuance allows the bank to tap existing issuances. Last year, the bank issued €9.6 billion (€12.1 billion including pre-funding), and this year's borrowing programme stands at a similar level of up to €11 billion (including an additional €1 billion in pre-funding for 2023). Total outstanding debt stands at €41.2 billion, of which around half is denominated in US dollars (before swaps).

In addition to maintaining a conservative debt maturity profile, the EBRD matches its assets and liabilities by: (1) hedging foreign-currency and interest-rate risks through swaps and derivatives; and (2) borrowing and lending in a wide range of currencies and interest-rate structures. Its local-currency issuances also support its efforts to develop the private sector and capital markets in emerging and recipient economies. As of end-2021, 24% of the EBRD's outstanding bonds were denominated in emerging market currencies, of which a third were denominated in Turkish lira and Kazakhstani tenge. After swaps, the exposure to those currencies was considerably smaller at 5.7%. Currently, EBRD has 7 Russian rouble-denominated bonds outstanding with a nominal value of around €600 million (1.3% of outstanding bonds). According to the bonds' terms & conditions EBRD would repay in US dollars in the event of a settlement disruption event. There is therefore no risk of an EBRD default because the bank cannot obtain Rouble.

Qualitative adjustments to intrinsic financial strength

Quality of management

We apply a “+1” adjustment to the EBRD's intrinsic financial strength on account of the high quality of management and particularly risk management, consistent with assessments for other large, well-established MDBs, including the [International Bank for Reconstruction and Development](#) (IBRD, Aaa stable). The adjustment reflects the EBRD's very prudent risk management framework and practices, as well as conservative treasury management policies, which have allowed the institution to successfully navigate periods of acute stress in large countries of operation, such as in Russia in 2014-15 and more recently Turkey. Similarly the strong quality of management has helped the institution to respond swiftly to shocks, as seen during the pandemic and currently in the Russia-Ukraine conflict.

More specifically, capital and liquidity are managed such that the bank preserves at all times some distance between its actual operational targets and minimum policy requirements. Its governance structures are solid and include a dedicated chief risk officer. The EBRD's policies have also been enhanced in recent years, including changes to the bank's liquidity policies in 2015 which linked liquidity requirements to the bank's own severe stress tests.

Operating environment

We do not assign a qualitative adjustment for the EBRD's operating environment, which is mainly a reflection of the good level of diversification across countries and regions, with limited correlation among them.

FACTOR 3: Strength of member support score: High

Our "High" assessment of the strength of member support provides two notches of uplift from the bank's "aa2" adjusted standalone intrinsic financial strength. The score reflects a combination of the very strong ability of shareholders to provide support, a moderate buffer of callable capital and our assessment of "High" non-contractual willingness to support.

The ability of the bank's shareholders to provide support is strong

We assess shareholder's ability to support at "a3" in line with the weighted average shareholder rating of A3, which is one of the strongest assessments among all MDBs in our rated universe. The score has recently deteriorated from "a2", given the ratings downgrades of Ukraine, Belarus and Russia, which together account for 5% of subscribed capital. 95% of the shareholder capital is held by investment-grade issuers, while 64% of the weighted shareholders are rated Aaa or Aa. Also, the shareholder base is broad and regionally diverse, limiting correlation between shareholders' creditworthiness. The largest shareholders are the [United States](#) (Aaa stable, 10.1%) and [France](#) (Aa2 stable), [Germany](#) (Aaa stable), [Italy](#) (Baa3 stable), [Japan](#) (A1 stable) and the [UK](#) (Aa3 stable) with a share of 8.6% each, while borrowing members account for just 14% of the total.

Exhibit 8

Source: Moody's Investors Service

Exhibit 9

...with a large share of EU countries and the US
% of subscribed capital

Source: Moody's Investors Service

Moderate callable capital buffer is balanced by high paid-in capital...

Our key metric for assessing contractual willingness to provide support is the ratio of callable capital to the stock of debt. The EBRD has €23.5 billion of callable capital, a contractual obligation of each shareholder to provide additional equity in the unlikely event that the EBRD encounters difficulties repaying its borrowings. The relatively low callable capital coverage reflects the EBRD's high level of paid-in capital, which is significantly higher than peers to buffer against the risks of the bank's private sector exposure.

...and non-contractual willingness to support is high

Our assessment of shareholders' non-contractual willingness to support the EBRD is set at "High", which reflects the strong track record of shareholder support as reflected by their consistent support for the EBRD's expansion into new countries and regions, and more recently in the strong support for EBRD's role in supporting Ukraine and neighbouring countries affected by the conflict. We believe that shareholders would provide further financial support in the unlikely event that EBRD were faced with significant losses as a result of the conflict. In addition, the score reflects the increase in subscribed capital that shareholders provided over the 2010-18 period. Overall, the EBRD's strategic importance for its shareholders is supported by its proven expertise in regions of political importance to shareholders.

ESG considerations

EBRD's ESG Credit Impact Score is Positive (CIS-1)

Exhibit 10

ESG Credit Impact Score

CIS-1

Positive

For an issuer scored CIS-1 (Positive), its ESG attributes are overall considered as having a positive impact on the rating. The overall positive influence from its ESG attributes on the rating is material.

Source: Moody's Investors Service

The EBRD's credit impact score is positive (**CIS-1**), reflecting a strong ESG profile and solid shareholder support.

Exhibit 11

ESG Issuer Profile Scores

ENVIRONMENTAL

E-2

Neutral-to-Low

SOCIAL

S-1

Positive

GOVERNANCE

G-1

Positive

Source: Moody's Investors Service

Environmental

EBRD has a neutral-to-low environmental issuer profile score (**E-2**). While some of its countries of operation have high exposure to physical climate and carbon transition risk, the EBRD is one of the leaders in 'green' financings, and is committed to aligning all new financings with the Paris Agreement by end-2022. The bank's Green Economy Transition strategy for 2021-25 (GET 2.1) targets a share of at least 50% of "green" investments and a reduction of at least 25 million tonnes of greenhouse gas emissions via its projects.

Social

The EBRD's positive social issuer profile score (**S-1**) reflects strengths in the area of responsible production as well as benefits from demographic & societal trends, supporting private enterprise in transition economies, often acting as anchor investor or lender. Use of public consultation processes contributes to ensure buy-in from key stakeholders. EBRD does not face any issues attracting highly skilled personnel and there are no health & safety considerations that would negatively or positively affect the issuer profile.

Governance

The EBRD's positive issuer profile score for governance (**G-1**) reflects prudent and very strong risk management, including liquidity management. The very strong credibility and track record of management reflect the very high level of transparency and quality of reporting, as well as the expansion of the bank's membership and the board's support for extending the bank's geographical remit.

All of these considerations are further discussed in the "Detailed credit considerations" section above. Our approach to ESG is explained in our cross-sector methodology [General Principles for Assessing ESG Risks](#). Additional information about our rating approach is provided in our [Supranational Rating Methodology](#). ESG Issuer Profile Scores and Credit Impact Scores for the rated entity/transaction are available on Moodys.com. In order to view the latest scores, please click [here](#) to go to the landing page for the entity/transaction on MDC and view the ESG Scores section.

Recent developments

Russia-Ukraine conflict increases risks to asset performance but also raises EBRD profile

The EBRD has reacted swiftly to the outbreak of hostilities by suspending all lending to Russia and Belarus while affirming its commitment to support Ukraine and its existing borrowers in the country. In early March it unveiled a €2 billion resilience package to support Ukraine and neighbouring countries affected by the conflict. More recently, EBRD pledged to invest an initial €1 billion this year in support of the Ukrainian economy, in a mix of donor and the bank's own funding. According to the bank, donor funding is approaching €1 billion.

We expect the conflict to have a significant adverse impact on EBRD's financial results and asset performance. Equity valuations will be under pressure, in particular for the remaining Russian exposure which is heavily geared towards equity investments. At the same time, the conflict will lead to higher non-performing loans in Ukraine and neighbouring countries, requiring higher provisioning levels. Back in 2014, when the EBRD halted new investments in Russia following the annexation of Crimea, the bank's nonperforming assets ratio rose to 7.3% from 2.5% the year before. While the portfolio composition is different today, the EBRD's nonperforming asset ratio could easily surpass the 2014 deterioration in our view. EBRD currently has around 7% of its total development-related assets in Ukraine, while exposures in Russia and Belarus account for 3.6% and 1.8% respectively.

However, as stated earlier we believe that shareholders would provide EBRD with additional capital if required. Given its long-standing presence in the region and private-sector expertise, the bank will be a key institution to support reconstruction efforts in Ukraine; in fact the bank has already been asked by shareholders to play an active role in the reconstruction of the country after the end of hostilities.

Strong financial results in 2021 strengthen already solid capital buffers

The bank has high levels of usable equity to cover for any losses that may result from the conflict. Last year's very strong financial results have further bolstered the bank's capital position. It reported net profits at €2.5 billion in 2021, the bank's highest profits ever and much higher than the €0.3 billion recorded in 2020. The main profit driver were equity gains of €1.7 billion, with around €1.5 billion being unrealised fair value increases as a result of the global recovery in equity markets. As a result of the strong financial performance, useable equity increased to €20.3 billion from €17.9 billion the previous year, as retained earnings are added to paid-in capital, providing the bank with a sizeable capital buffer to deal with the impact of the conflict as well as implications of the high energy and food prices on a broader set of countries of operations.

At the same time, the bank's net interest income was broadly stable at €0.9 billion, compared to €0.8 billion the previous year. Reflecting the recovery from the pandemic there was a net release of €0.2 billion of provisions, in contrast to the €0.5 billion charge in 2020. The non-performing loan (NPL) ratio declined to 4.9% from 5.5% in 2020. Our definition of non-performing exposures is broader and includes (small) write-downs of equity investments; given the strong performance of the equity portfolio our NPA ratio declined to 4% compared to 5.1% a year earlier. Compared to most other Aaa-rated peers, EBRD's asset performance is relatively weak and also much more volatile.

Shift towards green, low carbon financing and investment continues

The EBRD continues its shift towards more "green" financing with its latest Green Economy Transition (GET) plan, which sets out a target of increasing green financing to over 50% of its annual business volumes by 2025. It follows the EBRD's previous GET1.0 programme, which targeted 40% of green investments relative to total annual investment by 2020. As of end-2021, the bank had financed €15.9 billion in green investments under the GET initiative.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT CONSTITUTE OR PROVIDE INVESTMENT OR FINANCIAL ADVICE, AND MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT AND DO NOT PROVIDE RECOMMENDATIONS TO PURCHASE, SELL, OR HOLD PARTICULAR SECURITIES. MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS DO NOT COMMENT ON THE SUITABILITY OF AN INVESTMENT FOR ANY PARTICULAR INVESTOR. MOODY'S ISSUES ITS CREDIT RATINGS, ASSESSMENTS AND OTHER OPINIONS AND PUBLISHES ITS PUBLICATIONS WITH THE EXPECTATION AND UNDERSTANDING THAT EACH INVESTOR WILL, WITH DUE CARE, MAKE ITS OWN STUDY AND EVALUATION OF EACH SECURITY THAT IS UNDER CONSIDERATION FOR PURCHASE, HOLDING, OR SALE.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS, AND PUBLICATIONS ARE NOT INTENDED FOR USE BY RETAIL INVESTORS AND IT WOULD BE RECKLESS AND INAPPROPRIATE FOR RETAIL INVESTORS TO USE MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS OR PUBLICATIONS WHEN MAKING AN INVESTMENT DECISION. IF IN DOUBT YOU SHOULD CONTACT YOUR FINANCIAL OR OTHER PROFESSIONAL ADVISER.

ALL INFORMATION CONTAINED HEREIN IS PROTECTED BY LAW, INCLUDING BUT NOT LIMITED TO, COPYRIGHT LAW, AND NONE OF SUCH INFORMATION MAY BE COPIED OR OTHERWISE REPRODUCED, REPACKAGED, FURTHER TRANSMITTED, TRANSFERRED, DISSEMINATED, REDISTRIBUTED OR RESOLD, OR STORED FOR SUBSEQUENT USE FOR ANY SUCH PURPOSE, IN WHOLE OR IN PART, IN ANY FORM OR MANNER OR BY ANY MEANS WHATSOEVER, BY ANY PERSON WITHOUT MOODY'S PRIOR WRITTEN CONSENT.

MOODY'S CREDIT RATINGS, ASSESSMENTS, OTHER OPINIONS AND PUBLICATIONS ARE NOT INTENDED FOR USE BY ANY PERSON AS A BENCHMARK AS THAT TERM IS DEFINED FOR REGULATORY PURPOSES AND MUST NOT BE USED IN ANY WAY THAT COULD RESULT IN THEM BEING CONSIDERED A BENCHMARK.

All information contained herein is obtained by MOODY'S from sources believed by it to be accurate and reliable. Because of the possibility of human or mechanical error as well as other factors, however, all information contained herein is provided "AS IS" without warranty of any kind. MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the rating process or in preparing its Publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING, ASSESSMENT, OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay to Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$5,000,000. MCO and Moody's Investors Service also maintain policies and procedures to address the independence of Moody's Investors Service credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moody's.com under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any credit rating, agreed to pay to MJKK or MSFJ (as applicable) for credit ratings opinions and services rendered by it fees ranging from JPY100,000 to approximately JPY550,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
