

EBRD steps up green financing

Target for green financing as a percentage of annual investments*

25%

2011-2015

40%

2016-2020

Total investment in green financing from 2016 - 2020

€18 billion

Delivering the same amount of finance in 5 years as it did in the previous 10.

To achieve this level of investment the EBRD will scale up:

renewable energy

energy efficiency

industrial energy efficiency

district heating rehabilitation

Sustainable Energy Finance Facilities

technology transfer

policy reform

#EBRDgreen

Total investment in green financing from 2006 - 2015

€18 billion

invested in over

1,000

sustainable energy and resource projects

Part of projects worth over

€97 billion

Through investing in a wide variety of projects ranging from solar plants in Jordan and Kazakhstan and wind farms in Turkey and Mongolia, to energy efficiency projects in factories and commercial and residential buildings, the EBRD has

contributed to reducing yearly carbon emissions by over

72 million tonnes

Renewable energy projects have generated

60 million MWh

Equivalent to the electricity production of

Romania 2013

*EBRD's total investments across all sectors amounted to €8.9 billion in 2014
