**Name of Tenderers who did not pass post-qualification:**

None

**Name of Tenderers rejected and reasons for rejection:**

JVCA TC SV METEX EUROPE LTD

(SV METEX EUROPE LTD-Leader of association, Revicond - Associate 1, TC Eligibil-CON - Associate 2)

**Reasons:**

The detailed examination of the tender from JVCA TC SV METEX EUROPE LTD revealed a material non-compliance with the Employer's Requirements for the proposed polypropylene (PP) pipe materials. The tenderer proposed profiled-wall PP pipes, notwithstanding the requirement that the PP pipes shall be with smooth internal and external walls, as per Part 2 – Section VI: Requirements, ii. Particular Requirements, 4. Proposed Materials, 4.1.2 Pipe Material. Further clarifications confirmed the Tenderer's intention to use the non-compliant PP pipes, which cannot be accepted by the Employer for the proposed works. It was also noted, that the Tenderer did not provide mobilization and construction schedules, while the information provided in method statement was considered insufficient. Further clarifications did not result in considerable improvement of the quality of tender.

Considering all stated above, the respective tender was considered materially non-compliant and rejected by the Evaluation Committee.
