

MiFID II product governance / Professional investors and ECPs only target market:

Solely for the purposes of the manufacturer's product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is eligible counterparties and professional clients only, each as defined in Directive 2014/65/EU (as amended, "**MiFID II**"); and (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate. Any person subsequently offering, selling or recommending the Notes (a "**distributor**") should take into consideration the manufacturer's target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturer's target market assessment) and determining appropriate distribution channels.

For the purposes of this provision, the expression "**manufacturer**" means the Dealer.

European Bank for Reconstruction and Development (the "**Issuer**") does not fall under the scope of application of MiFID II. Consequently, the Issuer does not qualify as an "investment firm", "manufacturer" or "distributor" for the purposes of MiFID II.

Not Applicable

37 (i) Additional Information:

The provisions set out in the Annex hereto shall apply to the Terms and Conditions in accordance therewith

(ii) Investment Considerations:

Notes are not liquid instruments

There may exist at times only limited markets for the Notes resulting in low or non-existent volumes of trading in the Notes and such obligations, and therefore a lack of liquidity and price volatility of the Notes.

Georgian Lari Exchange Risk

The Final Redemption Amount, Early Redemption Amount (if applicable) and the Interest Amount on the Notes are linked to the Georgian Lari. Currency exchange rates may be volatile and will affect the return to the holder of the Notes. The National Bank of Georgia can from time to time intervene in the foreign exchange market. These interventions or other governmental actions could adversely affect the value of the Notes payable in U.S. Dollars, as well as the actual yield (in U.S. Dollar terms) on the Notes and the amounts payable on the Notes. Even in the absence of the governmental action directly affecting currency exchange rates, political or economic developments in Georgia or elsewhere could lead to significant and sudden changes in the exchange rate between the Georgian Lari and the U.S. Dollar.

Annex
Calculation of the Interest Amount, the Early Redemption Amount and the Final Redemption Amount

The Final Redemption Amount or the Early Redemption Amount, as applicable, per Specified Denomination will be payable in USD on the Maturity Date or the Early Redemption Date, as applicable, and determined by the Calculation Agent as follows, on the corresponding FX Fixing Date (or, in case of a Price Source Disruption Event, on the Business Day immediately following such FX Fixing Date):

Specified Denomination divided by the applicable FX Reference Rate, and rounded up to the nearest cent.

The Interest Amount per Specified Denomination will be payable in USD on the relevant Interest Payment Date and determined by the Calculation Agent as follows, on the applicable FX Fixing Date (or, in case of a Price Source Disruption Event, on the Business Day immediately following such FX Fixing Date):

(Specified Denomination multiplied by the Rate of Interest multiplied by the Floating Day Count Fraction) divided by the applicable FX Reference Rate, rounded up to the nearest cent.

As soon as possible on each Interest Determination Date (but in no event later than the Business Day immediately following the applicable Interest Determination Date), the Calculation Agent shall notify the Issuer and the Agent (who will in turn inform the Noteholders) of the relevant Rate of Interest.

The Calculation Agent shall notify the Issuer and the Agent (who will in turn inform the Noteholders) of its determination of the Final Redemption Amount, the Early Redemption Amount and the Interest Amount payable per Specified Denomination on the Maturity Date, the Early Redemption Date or the relevant Interest Payment Date (as applicable), as soon as practicable after such determination but in no event later than the Business Day immediately following the relevant FX Fixing Date.

Disruption Event Provisions

In the event the FX Reference Rate (as defined below) is not available for any reason under the designated source or on any successor page on any FX Fixing Date, then the Calculation Agent shall determine that a price source disruption event (a "**Price Source Disruption Event**") has occurred, and shall promptly, on such FX Fixing Date, inform the Issuer and the Agent (who will in turn inform the Noteholders) of such occurrence.

Following the determination of the occurrence of a Price Source Disruption Event, the Calculation Agent shall determine the FX Reference Rate on the following basis. The FX Reference Rate shall be:

- 1) the arithmetic mean of such firm quotes (expressed as the amount of GEL per one USD) as the Issuer is able to obtain from four Reference Dealers for the sale of GEL and the purchase of USD at any time after 3 p.m. (Tbilisi time) on the relevant FX Fixing Date or the following Business Day, for settlement on the Maturity Date, Early Redemption Date or the relevant Interest Payment Date (as applicable), as calculated by the Calculation Agent. If fewer than four but at least two such firm quotes are obtained, the arithmetic mean of the quotes actually obtained shall be used. If only one of the Reference Dealers provides such a firm quote, such quote shall be the FX Reference Rate. If none of the Reference Dealers provides such a firm quote, then
- 2) the relevant FX Reference Rate shall be determined by the Calculation Agent in its discretion, acting in good faith and in a commercially reasonable manner.

TIBR Fallback Provisions

A. If, in respect of any Interest Determination Date, the Calculation Agent determines that the TIBR3M is not available, then the TIBR shall be equal to the “**Compounded TIBR**” which will be calculated on the relevant Interest Determination Date by the Calculation Agent in accordance with the following formula, and the resulting percentage will be rounded (if necessary) to the second decimal place, with 0.005 being rounded upwards:

$$\left[\prod_{i=1}^{d_0} \left(1 + \frac{TIBR_i \times n_i}{365} \right) - 1 \right] \times \frac{365}{d}$$

For the avoidance of doubt, the formula for the calculation of Compounded TIBR only compounds TIBR in respect of days within a Reference Period, which are Tbilisi Business Days. The TIBR applied to a day that is a non-Tbilisi Business Day takes TIBR for the previous Tbilisi Business Day but without compounding. Furthermore, Compounded TIBR determined in accordance with the Rate of Interest Fallback Provisions are calculated for the Reference Period, and not for a given Interest Period. Accordingly, such rates may differ from rates calculated for the Interest Period.

If, in respect of any Tbilisi Business Day in the relevant Reference Period, the Calculation Agent determines that the TIBR is not available on the Relevant Screen Page or the Successor Screen Page (as appropriate), such TIBR shall be:

(i) NBG’s refinancing rate (the “**Base Rate**”) prevailing at close of business on the relevant Tbilisi Business Day (as published on the NBG’s website: <https://www.nbg.gov.ge/index.php?m=2> as “Refinancing rate”); plus
(ii) the mean of the spread of the TIBR to the Base Rate over the previous five days on which a TIBR has been published, excluding the highest spread (or, if there is more than one highest spread, one only of those highest spreads) and the lowest spread (or, if there is more than one lowest spread, one only of those lowest spreads) to the Base Rate; or

if the Base Rate is not published by the NBG at close of business on the relevant Tbilisi Business Day, the TIBR published on the Relevant Screen Page, or if such page is unavailable, as displayed on the Successor Screen Page, for the first preceding Tbilisi Business Day on which the TIBR was published on the Relevant Screen Page or the Successor Screen Page (as appropriate).

Notwithstanding the provisions above, if the NBG publishes guidance as to (i) how the TIBR is to be determined or (ii) any rate that is to replace the TIBR, the Calculation Agent shall, to the extent that it is reasonably practicable, follow such guidance in order to determine TIBR for the purpose of the Compounded TIBR for so long as the TIBR is not available or has not been otherwise published by NBG or by a successor administrator.

B. If the TIBR ceases to exist or to be an industry accepted successor base rate for debt market instruments during the life of the Notes, and the Calculation Agent determines that there is no industry accepted successor base rate for debt market instruments linked to the TIBR, and that no substitute or other successor base rate is comparable to the TIBR, the Rate of Interest will be determined by the Calculation Agent in its sole discretion and acting in good faith and in a commercially reasonable manner.
