Annex A

Additional Terms Relating to the Calculation of Interest Amount, Early Redemption Amount and Final Redemption Amount

The Final Redemption Amount and Early Redemption Amount, as applicable, per Specified Denomination will be payable in USD on the Maturity Date or on the Early Redemption Date, (as applicable and subject to the disruption event provisions below), and determined by the Calculation Agent on the corresponding Rate Fixing Date, as follows:

Reference GEL Amount *divided by* the Exchange Reference Rate

The Interest Amount per Specified Denomination will be determined by the Calculation Agent on the corresponding Interest Determination Date and will be calculated on a Rate Fixing Date in accordance with the formula set out below, per Specified Denomination, provided however, that the Interest Amounts will, subject to the provisions of this Annex A, be paid (subject to the disruption event provisions below) on each Interest Payment Date in USD.

As soon as possible on or after the corresponding Interest Determination Date (but in no event later than the Business Day immediately following the Interest Determination Date), the Calculation Agent shall notify the Agent and the Issuer of the Exchange Reference Rate.

The Interest Amount per Specified Denomination is calculated as follows:

$Max\{[D * (RI * N/365)] ; 0\}$ *divided by* the Exchange Reference Rate

provided that the resultant amount shall be rounded up to the nearest USD with USD 0.5 being rounded up.

Where:

D	GEL 2,398,000
RI	91 Day GEL CD Rate – 0.25% (expressed as a percentage); and
N	The actual number of days in the respective Calculation Period calculated from and including the first day of such period (being the Issue Date or the previous Interest Payment Date as applicable) to but excluding the next Interest Payment Date or the Maturity Date, as applicable.

For the purposes of these provisions:

“91 Day GEL CD Rate” means the latest rate per annum for a period of 91 days, which appears on the NBG website “Average yields of the Certificate of Deposit issued by the National Bank of Georgia according to the primary auctions” page as observed on <https://www.nbg.gov.ge/index.php?m=619&lng=eng> as of 11:00 a.m. (Tbilisi time) on an Interest Determination Date in the column “91-days”. This data can also be found on Bloomberg GGRRC9WA Index. In case of any discrepancy between the 91 Day GEL CD Rate as published on the Bloomberg page and as published on the NBG website, the 91 Day GEL CD Rate as published on the NBG website will prevail.

In case the 91 Day GEL CD Rate is not available for any reason on the NBG website, “Average yields of the Certificate of Deposit issued by the National Bank of Georgia according to the primary auctions” page on an Interest Determination Date or the following Business Day or in case the 91 Day GEL CD Rate has not been updated for a period of 30 days prior to the Interest Determination Date in respect of a Calculation Period, the rate for such Calculation Period shall be:

The Refinance loan Rate of the NBG compounded 12 times and paid on every Interest Payment Date using the following formula:

$$\left(\left\{ \prod_{i=1}^{12} \left(1 + \left(Ref_i * \frac{7}{365} \right) \right) \right\}^{1/12} - 1 \right) * \frac{365}{7}$$

"Ref_i" means the latest NBG's Refinance loan rate observed on the NBG page <https://www.nbg.gov.ge/index.php?m=539> on the Interest Determination Date for which no 91 Day GEL CD Rate was available and each preceding week for the total period of 12 weeks (using the page <https://www.nbg.gov.ge/index.php?m=554>).

In case it is not possible to establish a rate as per paragraph above, the Calculation Agent shall establish the applicable rate acting in good faith and in a commercially reasonable manner.

"Interest Determination Date" means 2 Business Days prior to the commencement of the relevant Calculation Period.

"Reference GEL Amount" means the Specified Denomination (being USD 1,000,000) multiplied by the Exchange Reference Rate as at 16 December 2015. For the avoidance of doubt, the Exchange Reference Rate was fixed at GEL 2.3980 and therefore the Reference GEL Amount per Specified Denomination is GEL 2,398,000.

The Calculation Agent shall notify the Issuer, the Agent and the Noteholders of its determination of the Final Redemption Amount, the Early Redemption Amount and Interest Amount payable per Specified Denomination on the Maturity Date, Early Redemption Rate or relevant Interest Payment Date (as applicable), as soon as practicable after such determination (but in no event later than one Business Day prior to the Maturity Date, Early Redemption Date and/or relevant Interest Payment Date).

Disruption Event Provisions

If the Exchange Reference Rate is not available for any reason under the designated source or on any successor page on any Rate Fixing Date, then the Calculation Agent shall determine that a Price Source Disruption Event (a "Price Source Disruption Event") has occurred, and shall promptly inform the Issuer, the Agent and the Noteholders of such occurrence.

The Calculation Agent shall then determine the Exchange Reference Rate on the following basis:

- (i) The Exchange Reference Rate shall be the WM Rate on the Rate Fixing Date. If the WM Rate is not available, then
- (ii) The Exchange Reference Rate shall be the arithmetic mean of such firm quotes (expressed as the number of GEL per one USD) from the Reference Dealers as the Calculation Agent is able to obtain for the sale of GEL and the purchase of USD at or about 4.00 p.m. (Tbilisi time) on the Business Day following the Rate Fixing Date, for settlement on the next Tbilisi Business Day, provided however, that if fewer than four (but at least two) Reference Dealers provide such firm quotes then the Exchange Reference Rate shall be the arithmetic mean of the quotes actually obtained.
