These interventions or other governmental actions could adversely affect the value of the Notes in U.S. Dollars, as well as the actual yield (in U.S. Dollar terms) on the Notes and the amount payable at maturity. Even in the absence of governmental action directly affecting currency exchange rates, political or economic developments in the Russian Federation or elsewhere could lead to significant and sudden changes in the exchange rate between the Russian Rouble and the U.S. Dollar.

Notes are Not Liquid Instruments

There may exist at times only limited markets for the Notes resulting in low or non-existent volumes of trading in the Notes and such obligations, and therefore a lack of liquidity and price volatility of the Notes and such obligations.
