Annex A
Calculation of Final Redemption Amount, Early Redemption Amount and Additional Amount

1 Final Redemption Amount

The “Final Redemption Amount” per Specified Denomination will be payable in USD and will be determined by the Calculation Agent on the relevant Rate Fixing Date as follows:

Specified Denomination *divided by* Reference Rate *plus* Additional Amount (if any),

provided that the resultant amount shall be rounded to the nearest 0.01 USD with 0.005 USD being rounded up.

2 Early Redemption Amount

The “Early Redemption Amount” per Specified Denomination will be payable in USD and will be determined by the Calculation Agent on the relevant Rate Fixing Date as follows:

Specified Denomination *divided by* Reference Rate,

provided that the resultant amount shall be rounded to the nearest 0.01 USD with 0.005 USD being rounded up.

3 Notice of Final Redemption Amount or Early Redemption Amount

The Calculation Agent shall notify the Issuer, the Agent and the Noteholders of its determination of the Final Redemption Amount (payable on the Maturity Date) or the Early Redemption Amount (payable on the Early Redemption Date), as applicable, as soon as practicable after such determination (but in no event later than the Business Day immediately following the relevant Rate Fixing Date).

4 Disruption Event Provisions

If the PTAX Rate is not available for any reason on either Bloomberg page <BZFXPTAX><INDEX> (or on any successor page) or on the web site of the Central Bank of Brazil (<http://www.bcb.gov.br/?english>) and BRL12 is also unavailable on any Rate Fixing Date, the Calculation Agent shall determine that a Price Source Disruption Event (a “Price Source Disruption Event”) has occurred, and shall promptly inform the Issuer and Agent of such occurrence. Following the determination of the occurrence of a Price Source Disruption Event, the Noteholders will not be entitled to any amounts in respect of the Notes until the earlier to occur of (i) the day falling two Business Days after the day on which the Issuer is notified by the Calculation Agent that a Price Source Disruption Event no longer subsists and (ii) the Postponed Maturity Date (as defined below), or the Postponed Early Redemption Date (as defined below), as the case may be. If on the 10th Business Day following the relevant Rate Fixing Date the PTAX Rate and BRL12 (or successor pages) are still unavailable then the Reference Rate shall be the average of firm quotes (expressed as the number of BRL per one USD) from the Reference Dealers as the Calculation Agent is able to obtain for the

sale of USD and the purchase of BRL at or about 5:00 p.m. São Paulo time on the Rate Fixing Date for settlement two New York and São Paulo Business Days thereafter, provided, however, that if fewer than four (but at least two) Reference Dealers provide such firm quotes then the average of the quotes actually obtained shall apply. If none, or only one, of the Reference Dealers provides such a firm quote, the Reference Rate will be determined by the Calculation Agent in its sole discretion, acting in good faith and in a commercially reasonable manner. For the avoidance of doubt, if payment of any amount due on the Maturity Date or the Early Redemption Date is postponed due to a Price Source Disruption Event, the Noteholders shall not be entitled to any additional sum in respect of such postponed payments.

Annex B

Reference Index Event Provisions

1 Successor Index to a Reference Index

If the Calculation Agent, acting in good faith and in a commercially reasonable manner, determines that a Reference Index is replaced by a successor index or if a Reference Index Sponsor discontinues publication of the applicable Reference Index but it is calculated and announced by a successor sponsor, provided that in either case (i) the index is calculated using, in the determination of the Calculation Agent acting in good faith and in a commercially reasonable manner, the same or a substantially similar formula for and method of calculation as used in the calculation of the applicable Reference Index and (ii) the level of the index is published or electronically displayed in internationally-recognised news sources or data displays, then such successor index will be deemed to be the applicable Reference Index.

The Calculation Agent will provide a written notice to the Issuer and the Agent of any designation of Successor Index to the applicable Reference Index and additional information that reasonably confirms any of the facts relevant to the determination of such successor index and which has been published in internationally-recognised published or electronically displayed news sources.

2 Modification or Cancellation of the Reference Index

In the event of a Reference Index Modification or Reference Index Cancellation, the Calculation Agent will compute a substitute level for the applicable Reference Index in accordance with the procedures, formula and method last in effect prior to such modification or cancellation.

“**Reference Index Modification**” will have occurred if, on or prior to any Monthly Valuation Date and/or the Final Valuation Date, a Reference Index Sponsor announces that it has made or will make a material change in the formula for, or the method of calculating, the applicable Reference Index or in any other way materially modifies the applicable Reference Index (other than a modification prescribed in that formula or method to maintain the applicable Reference Index in the event of changes in constituent securities and capitalization and other routine events) and no Successor Index to the applicable Reference Index exists.

“**Reference Index Cancellation**” will have occurred if (i) a Reference Index Sponsor discontinues publication of the applicable Reference Index and no Successor Index to the applicable Reference Index exists, or (ii) any Successor Index to the applicable Reference Index is no longer published (without any written notice from the sponsor of the Successor Index to the applicable Reference Index that any cessation in publication is temporary and will cease prior to any Monthly Valuation Date and/or the Final Valuation Date).

3 Use of Successor Index

If, in accordance with paragraphs (1) and (2) above, a Successor Index to the applicable Reference Index is selected or the Calculation Agent calculates a level as a substitute for the applicable Reference Index, the Successor Index to the applicable Reference Index or Calculation Agent-calculated level, as the case may be, will be used as a substitute for the applicable Reference Index for all purposes after such selection or substitution, including for purposes of determining whether a Market Disruption Event (as defined below) exists, even if the applicable Reference Index Sponsor elects to begin republishing the applicable original Reference Index.

4 Correction of Index levels

In the event that any relevant level of a Reference Index published by the applicable Reference Index Sponsor on any date which is utilised for any calculation or determination in connection with the Notes is subsequently corrected and the correction is published by the applicable Reference Index Sponsor by the second Business Day prior to the date on which any relevant payment may have to be made or in respect of which any relevant determination in respect of the Notes may have to be made, then the Calculation Agent may determine the amount that is payable or make any determination in connection with the Notes, after taking into account such correction.

5 Consequences of Disrupted Days

If the Calculation Agent determines that any Monthly Valuation Date or the Final Valuation Date is a Disrupted Day, then such Monthly Valuation Date or Final Valuation Date shall be the first succeeding Scheduled Trading Day in respect of the applicable Reference Index that the Calculation Agent determines is not a Disrupted Day, unless the Calculation Agent determines that each of the eight consecutive Scheduled Trading Days in respect of the applicable Reference Index immediately following the scheduled Monthly Valuation Date or Final Valuation Date (as applicable) is a Disrupted Day. In that case: (a) the last (eighth) consecutive Scheduled Trading Day in respect of the applicable Reference Index shall be deemed to be the Monthly Valuation Date or Final Valuation Date (as applicable), notwithstanding the fact that such day is a Disrupted Day; and (b) the Calculation Agent shall determine the level of the applicable Reference Index as of the Scheduled Closing Time on or in respect of that last consecutive Scheduled Trading Day in respect of the applicable Reference Index in accordance with the formula for and method of calculating the applicable Reference Index last in effect prior to the occurrence of the first Disrupted Day to occur, using such levels or values as the Calculation Agent determines to be appropriate as of the closing time on or in respect of that last consecutive Scheduled Trading Day of each Component comprised in the applicable Reference Index, and such determination by the Calculation Agent shall be deemed to be the Closing Index Level in respect of such Monthly Valuation Date or Final Valuation Date (as applicable).

The Calculation Agent shall take into account the Exchange traded or quoted price as of the Scheduled Closing Time on the last consecutive Scheduled Trading Day of each Component comprised in the applicable Reference Index (or, if an event giving rise to a Disrupted Day has occurred in respect of any relevant Component on such last consecutive Scheduled Trading Day for any relevant Component, or such last consecutive Scheduled Trading Day is not a Scheduled Trading Day for any relevant Component, as determined by the Calculation Agent, its good faith estimate of the value for the relevant Component as of the Scheduled Closing Time on the last consecutive Scheduled Trading Day).

For the purposes of determining whether a Market Disruption Event in respect of the applicable Reference Index exists at any time, if a Market Disruption Event occurs in respect of a security included in the applicable Reference Index at any time, then the relevant percentage contribution of that security to the level of the applicable Reference Index shall be based on a comparison of (x) the portion of the level of the applicable Reference Index attributable to that security and (y) the overall level of the applicable Reference Index, in each case immediately before the occurrence of such Market Disruption Event.

The Calculation Agent shall promptly notify the Issuer in writing of the occurrence of such a Market Disruption Event;
