(e) Terms relating to calculation of Interest Amount:

During the Indexed Coupon Period only, the Interest Amount payable on each Interest Payment Date, shall be payable in JPY and determined by the Calculation Agent in accordance with the following formula:

$$12.30\% \times (\text{FX}/116.90) - 10.00\%$$

For the avoidance of doubt, the actual amount of the Interest Amount per Specified Denomination shall be:

$$\text{USD } 52,609.07 \times \text{FX} - \text{JPY } 5,000,000$$

Provided that the Interest Amount per Specified Denomination shall be rounded to the nearest whole JPY (half a JPY being rounded up), and shall not be less than zero and never be greater than JPY 1,150,000.

Where "FX" means the arithmetic mean of the bid rate and offer rate of the JPY/USD exchange rate (expressed in an amount of JPY per unit of USD) appearing on the Reuters Screen "JPNU" page (or such other page as may replace that page on such service or any successor for that service) (the "Reuters JPNU") which is typically quoted in the row marked "1500" as of 3:00 p.m. Tokyo time on the day that is 10 Business Days prior to each Interest Payment Date or the Maturity Date (the "FX Determination Date") as determined by the Calculation Agent.

If, however, no such quotation appears on the Reuters JPNU on the FX Determination Date, "FX" will be determined by the Calculation Agent as follows:

The Calculation Agent will request five leading reference banks (selected by Calculation Agent at its discretion) in the Tokyo interbank market for their mid market quotations of the JPY/USD spot exchange rate at approximately 3:00 p.m. Tokyo time on the FX Determination Date. The highest and the lowest of such quotations will be disregarded and the arithmetic mean of the remaining quotations will be the "FX".

If only four quotations are so provided, then "FX" shall be the arithmetic mean of such quotations without regard to the highest and lowest values quoted. If fewer than four quotations but at least two quotations can be obtained, the "FX" shall be the arithmetic mean of the quotations actually obtained by Calculation Agent.

If only one quotation is available, the Calculation Agent will determine that such quotation shall be the "FX", and if no such quotation is available or if Calculation Agent determines in its sole discretion that no suitable reference bank who is prepared to quote is available, Calculation Agent will determine the "FX" in its sole discretion acting in good faith and in an impartial and commercially reasonable manner in accordance with its normal procedures for determining such exchange rate (or a comparable rate) at such time.
