

# **ANNUAL PROCUREMENT REVIEW**

**2011**

**Prepared by  
The Procurement Department  
March 2012**

**European Bank**  
**for Reconstruction and Development**

## Executive summary

This report, prepared by the Procurement Department (PD), reviews public sector procurement contracts signed in 2011, funded by the Bank and/or administered by the Bank and procured by the Bank's clients. A section is included on the procurement activities of the Nuclear Safety Department (NSD). This report includes the consultancy contracts financed under public sector Bank financing (also included in the report on *Engagement of Consultants* issued by the Consultancy Services Unit (CSU)). It does not cover consultancy contracts for the Bank's own needs or those financed through Technical Cooperation (TC) funds.

### ***Key public sector procurement statistics***

- The total number of signed contracts almost doubled in comparison to 2010. A total of 219 contracts worth €1.645 billion were signed, with EBRD's financing totalling €1.055 billion (excluding contracts administered by NSD). This compares with 113 contracts valued at €1.659 billion in 2010.
- The largest contract was the High Voltage line 750 kV in Rivne Kiev, Ukraine. This supply and installation contract was signed with a value of €130 million for which EBRD provided financing of €65 million.
- Contracts awarded through open tendering in accordance with the Bank's PP&R represent 81 per cent of the number of contracts and 87 per cent of the total contract value when contracts for consultancy services and approved alternative procurement procedures are excluded.
- A total of 805 tenders from 49 countries were received during 2011, which is a substantial increase in participation from the 458 tenders received in 2010. There was an average of 4.3 tenders per contract if contracts awarded under alternative procedures and direct selection are excluded.
- The six most successful tendering countries in terms of highest total contract value, regardless of procurement method were Italy, Ukraine, Romania, Kazakhstan, India and the Russian Federation, which together won a total of approximately €1 billion or 61 per cent of the total contract value.
- The six most successful tendering countries in terms of number of contracts were Romania, Russian Federation, Albania, Kazakhstan, Bosnia & Herzegovina and Italy. Entities from these six countries won a total of 121 contracts worth €747 million or 45 per cent of the total contract value.
- Entities from the six most successful countries in terms of number of contracts won submitted half of all tenders received by Bank clients.
- PD handled 11 procurement complaints and one concern.

The following should also be noted from this report:

Whilst compared to the previous year the total value of contracts essentially remained unchanged, the significant increase in the number of signed contracts may be explained by the trends in the public sector portfolio development. There was an increase in lending in ETC countries coupled with a relatively large number of deals in the MEI sector (especially in projects co-financed with EU Structural Funds). These two groups of projects are typically represented by a relatively large number of small value contracts covering diverse needs of the clients.

A number of countries that are shareholders of the Bank do not appear in the statistics as firms

from these countries have not participated in tenders and have not been awarded contracts.

At the same time, in some countries of operations no Bank financed public sector contracts were awarded. These countries are Azerbaijan, Belarus, Estonia, Hungary, Latvia, Lithuania, Mongolia, Turkey, Turkmenistan and Uzbekistan. The lack of the award of public sector contracts in these countries may be explained by the structure of the Bank's public sector portfolio in these countries where there are a very limited number of public sector projects. The majority of the contracts financed by the Bank are works and supply and installation contracts which by their nature require substantial local participation. This may explain why 74 per cent of all contracts were awarded to entities from the Bank's countries of operation, representing 59 per cent of the total value of all contracts. That led to the situation where a large number of works contracts were awarded to local companies in Albania, Bosnia and Herzegovina, Romania and the Russian Federation. Local participation can be achieved by either establishing a formal cooperation with local firms (such as a consortium or joint venture) or by registering a foreign firm locally or buying already existing local outfits. The nationality of a consortium will only be registered in the Bank's statistics based on the lead firm's nationality, and local firms with foreign ownership will still be registered as local. In addition to the above, representatives of foreign manufacturers of goods in Kazakhstan were awarded a large number of goods contracts, especially in the transport sector (railways projects).

The Ukrainian industry also benefited from the Bank's investment in public sector projects in the country. In particular, contracts were awarded to local manufacturers of vehicles (both in the municipal transport and railways sectors). In addition, a local contractor also benefited from the award of a large design and build contract under a railway project.

Further to the total amount of approximately €109 million for new contracts signed in 2011 under NSD projects, an additional €826 million has been approved through various contract amendments. All amendments have been approved by the relevant Fund Assemblies and are largely explained by the complexity of the sector and contract structures.

# **Annual Procurement Review 2011**

## **1. Introduction**

This report, prepared by the Procurement Department (PD), reviews public sector procurement contracts signed in 2011, funded and/or administered by the Bank and procured by the Bank's clients. A separate section is included on the procurement activities of the Nuclear Safety Department (NSD). This report includes the consultancy contracts financed under public sector financing. It does not, however, cover consultancy contracts for the Bank's own needs, those financed through Technical Cooperation (TC) funds, or those awarded by the Office of the General Counsel (OGC). Information on these other consultancy services contracts is provided in the report on *Engagement of Consultants by the EBRD* issued by the Consultancy Services Unit (CSU), and information on contracts for goods and services for the Bank's own needs is provided in the *Annual Corporate Procurement Review*, issued by the Corporate Procurement Unit (CPU).

Annexes 1 to 10 of the *Annual Procurement Review 2011* report contain the statistical data for these public sector procurement contracts during 2011. The analysis of the data, as well as the main procurement issues considered in 2011 through the activities of PD (section 4), can be found in the main body of this report. Sections 1-3 of this report as well as the annexes will be published on the Bank's website.

## 2. Analysis of public sector procurement data

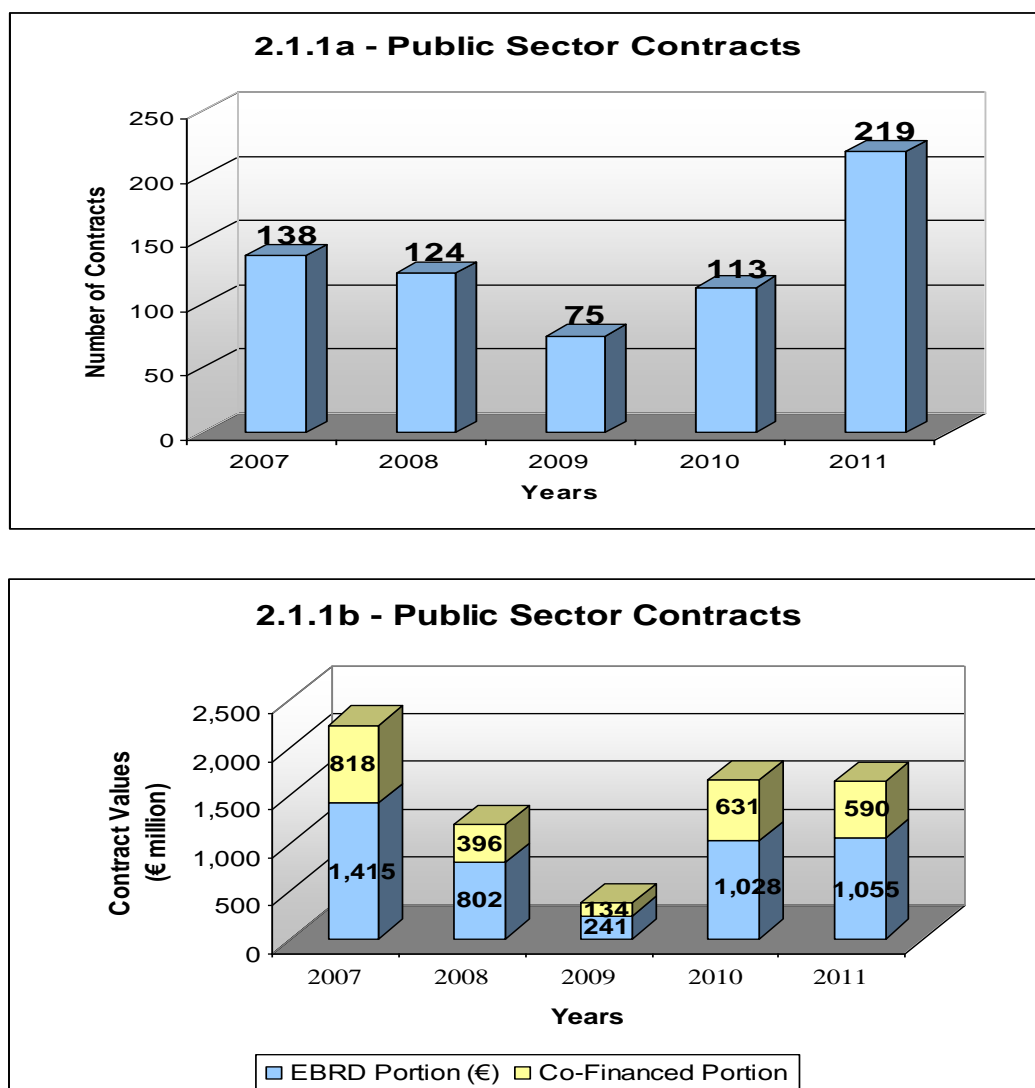

### 2.1 Volume and nature of contracts

In 2011, the total signed contract value remained at the same high level as in 2010, only decreasing marginally while the number of contracts increased significantly in comparison to 2010. In 2011, 219 contracts were signed in total. The total value of these contracts came to € 1.645 billion for which EBRD's own financing totalled €1.055 billion (see Annex 1 for the listing of contracts by country of operations). In comparison to 2010, this represents an increase in terms of the number of signed contracts (by 94 per cent) and a slight decrease of total signed contract value (of 1 per cent).

Table 2.1.1a illustrates the number of public sector contracts signed between 2007 and 2011.

Table 2.1.1b demonstrates the overall contract value as well as the portion financed by the EBRD. Over the past five years, a total of 669 contracts have been signed with a total value of €7.109 billion of which the EBRD financed €4.540 billion.

**Table 2.1.1 Annual value of public sector contract awards (2007-2011)**

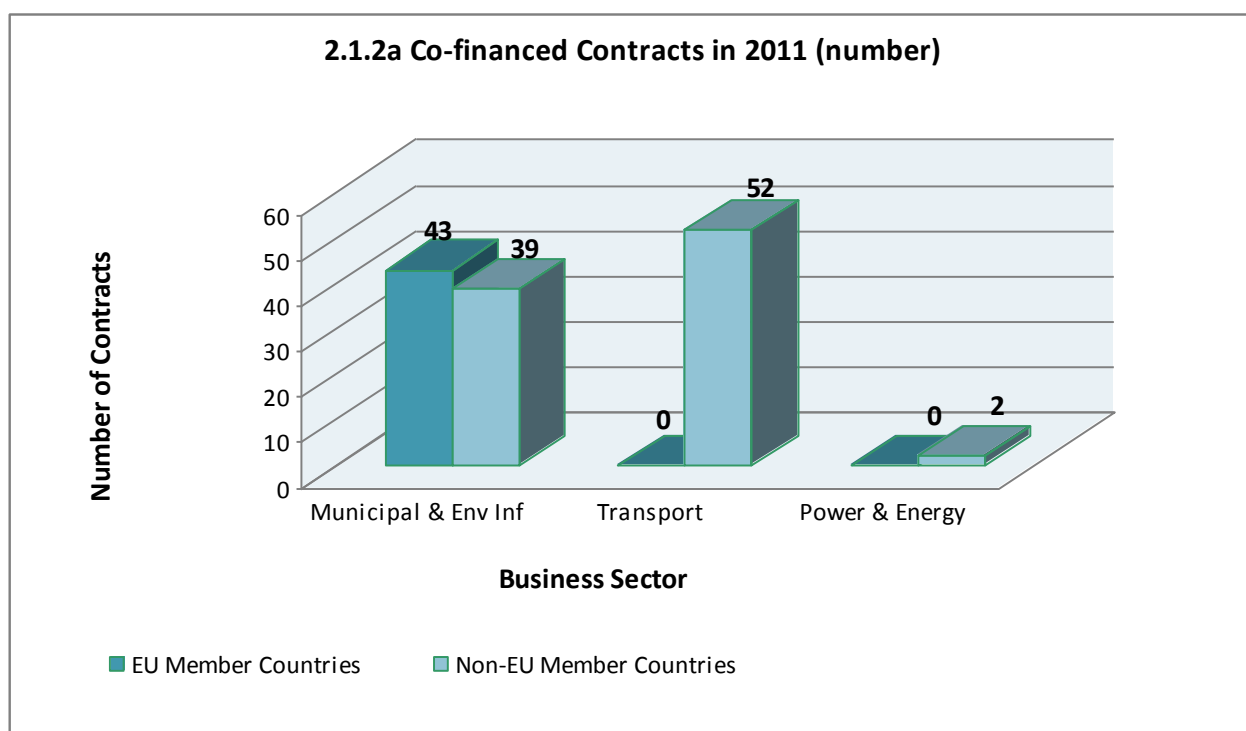

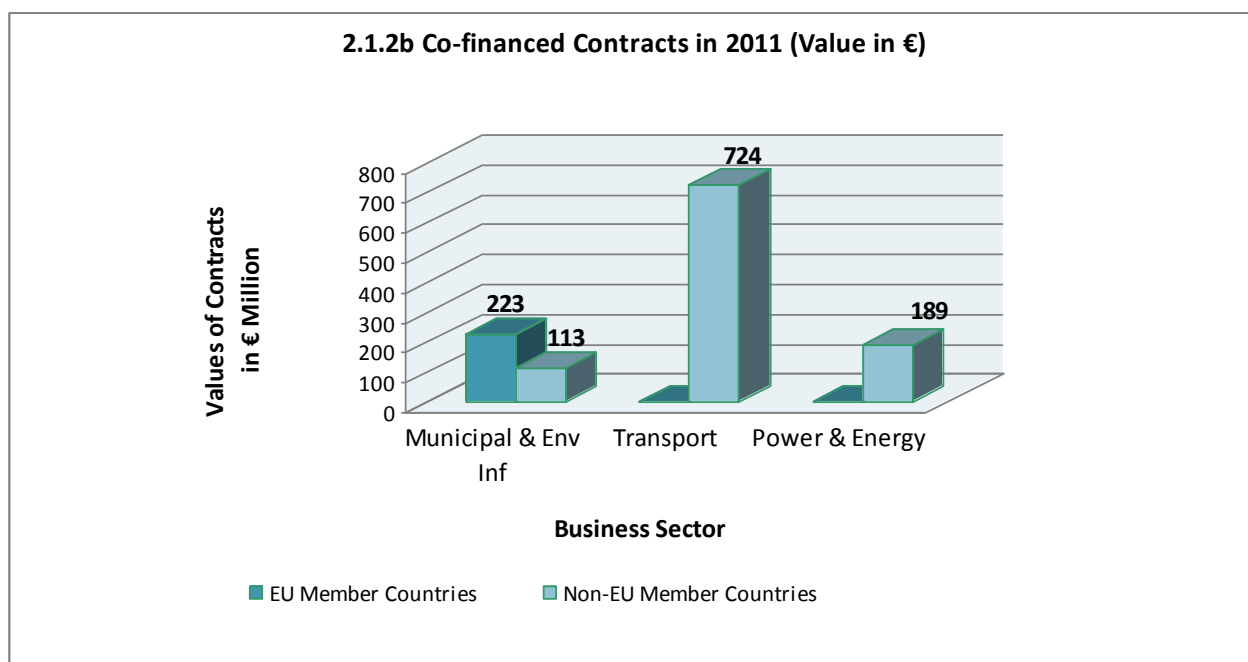

## Co-Financing

Of the total contract value of €1.645 billion in 2011, the EBRD financed €1.055 billion whilst the balance of €590 million was provided by other sources, either other financial institutions (IFIs, EU Agencies, commercial banks, bilateral donors) or the borrowers themselves. In comparison to 2010, a 6 per cent decrease of the total value provided by other sources can be noted. In 2011, 136 of the 219 contracts (62 per cent) were co-financed in comparison with 47 out of the 113 contracts (42 per cent) in 2010. The value of the 136 contracts in which co-financing was present came to €1.249 billion and the EBRD's portion of these represents €659 million.

Table 2.1.2 presents the distribution of the 136 co-financed contracts in 2011, in EU member countries and non-EU member countries. Co-financed contracts in EU member countries represented 32 per cent of the total number of co-financed contracts and 18 per cent of the total value of all co-financed contracts. The sector with the highest co-financed contractual activity in terms of the number of contracts was MEI with 82 contracts i.e. 60 per cent of all co-financed contracts representing €336 million). It should be noted that the high proportion of co-financed contracts in the MEI sector can be partly explained by the increase in the number of contracts deriving from projects co-financed with the cohesion funds. Due to this, the majority of these co-financed contracts were signed in EU member countries (43 out of 82). The highest overall co-financed contract value was in the Transport Sector (€724 million representing 58 per cent of the total co-financed contract value). In the Transport and Power & Energy sectors all 54 of the co-financed contracts were signed in non-EU member countries.

**Table 2.1.2      Distribution of co-financed public sector contracts during 2011**

### Overall analysis

In 2011, the average (overall) contract value was €7.5 million and the average EBRD financing was €4.8 million per contract. The latter represents a decrease of 47 per cent compared to the average EBRD financing reported in 2010, where the EBRD financing averaged €9.1 million per contract. In 2011, there were 40 contracts in which the total signed contract value was greater than €10 million, 17 of which had a total signed contract value of more than €20 million. In 2011, there were 30 contracts in which EBRD financing was greater than €10 million, 14 of which had EBRD financing of more than €20 million. The largest contract was the High Voltage line 750 kV in Rivne Kiev, Ukraine. This supply and installation contract was signed with a value of €130 million for which EBRD provided financing of €65 million (50 per cent of the total contract value).

23 investment grant financed contracts were administered by the Bank following the Bank's PP&R (in some cases with eligibility restrictions in accordance with funding agreements) representing a value of €24.7 million. Seven of these contracts are co-financed with EBRD and all 23 contracts are included in the statistics of this report.

In addition to contracts presented in this report, four contracts worth €9.4 million were 100 per cent financed by EIB but administered by the EBRD in line with the implementation agreements. These awards followed the application of the Bank's PP&R and were issued in relation to two transport projects in Moldova.

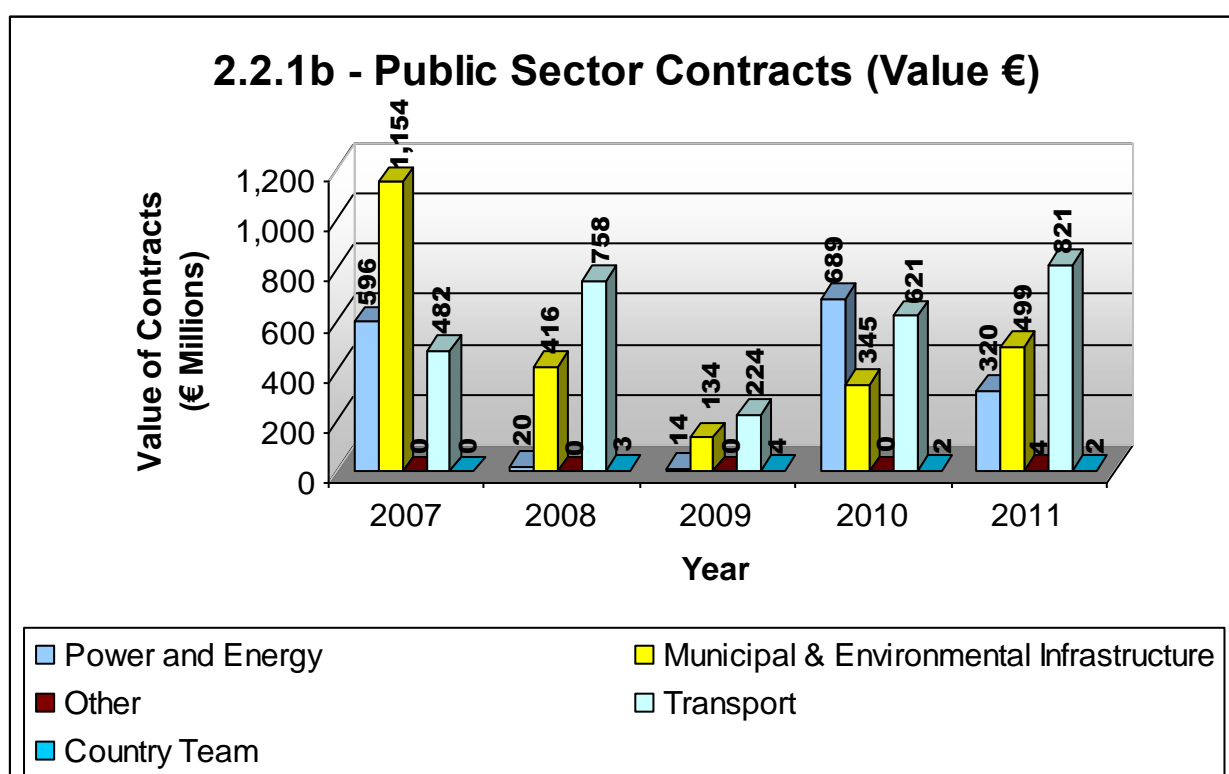

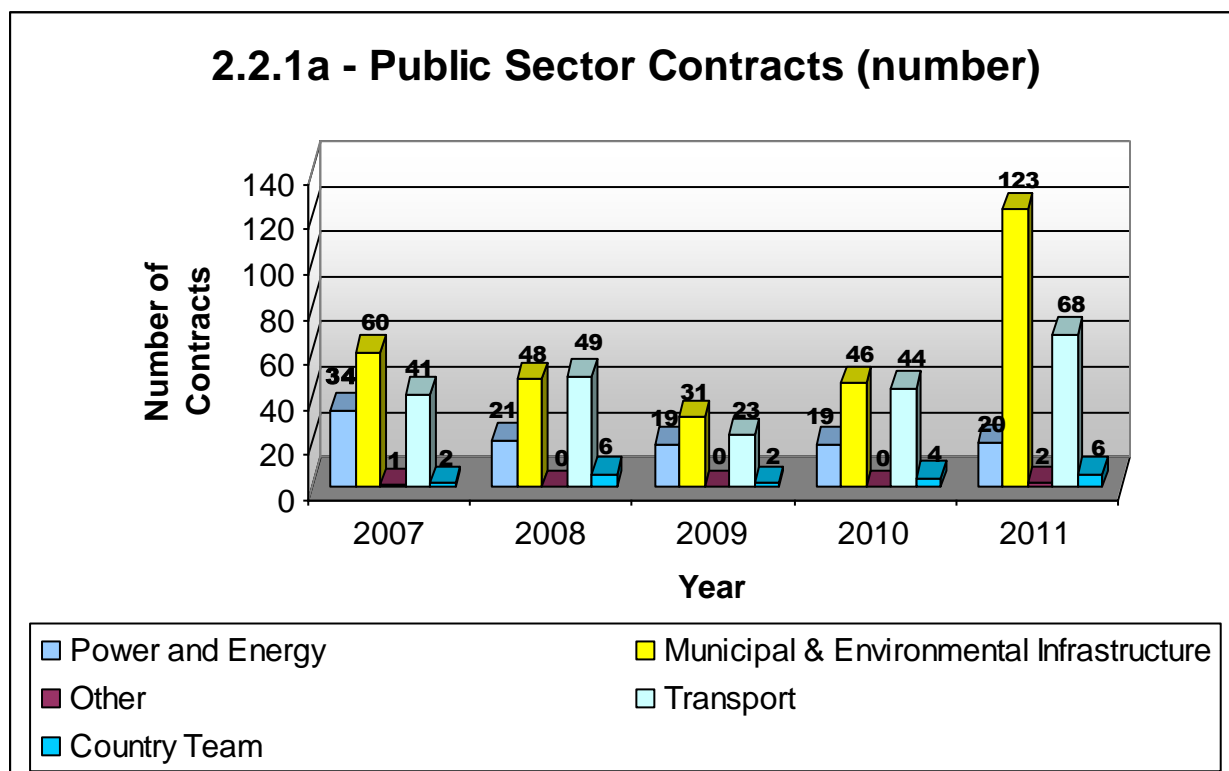

## **2.2 Analysis by sector**

### Cumulative 2007-2011 data overview

Tables 2.2.1 a and b illustrate the overall contract value and the number of public sector contracts signed between 2007 and 2011 by business sector. With a total number of 308 contracts worth €2.548 billion, the MEI sector has had the highest contractual activity in terms of number and the Transport team in terms of value (€2.906 billion) over the past five years.

Table 2.2.1 Annual number and value of public sector contract awards by business sector (2007-2011)

### 2011 analysis

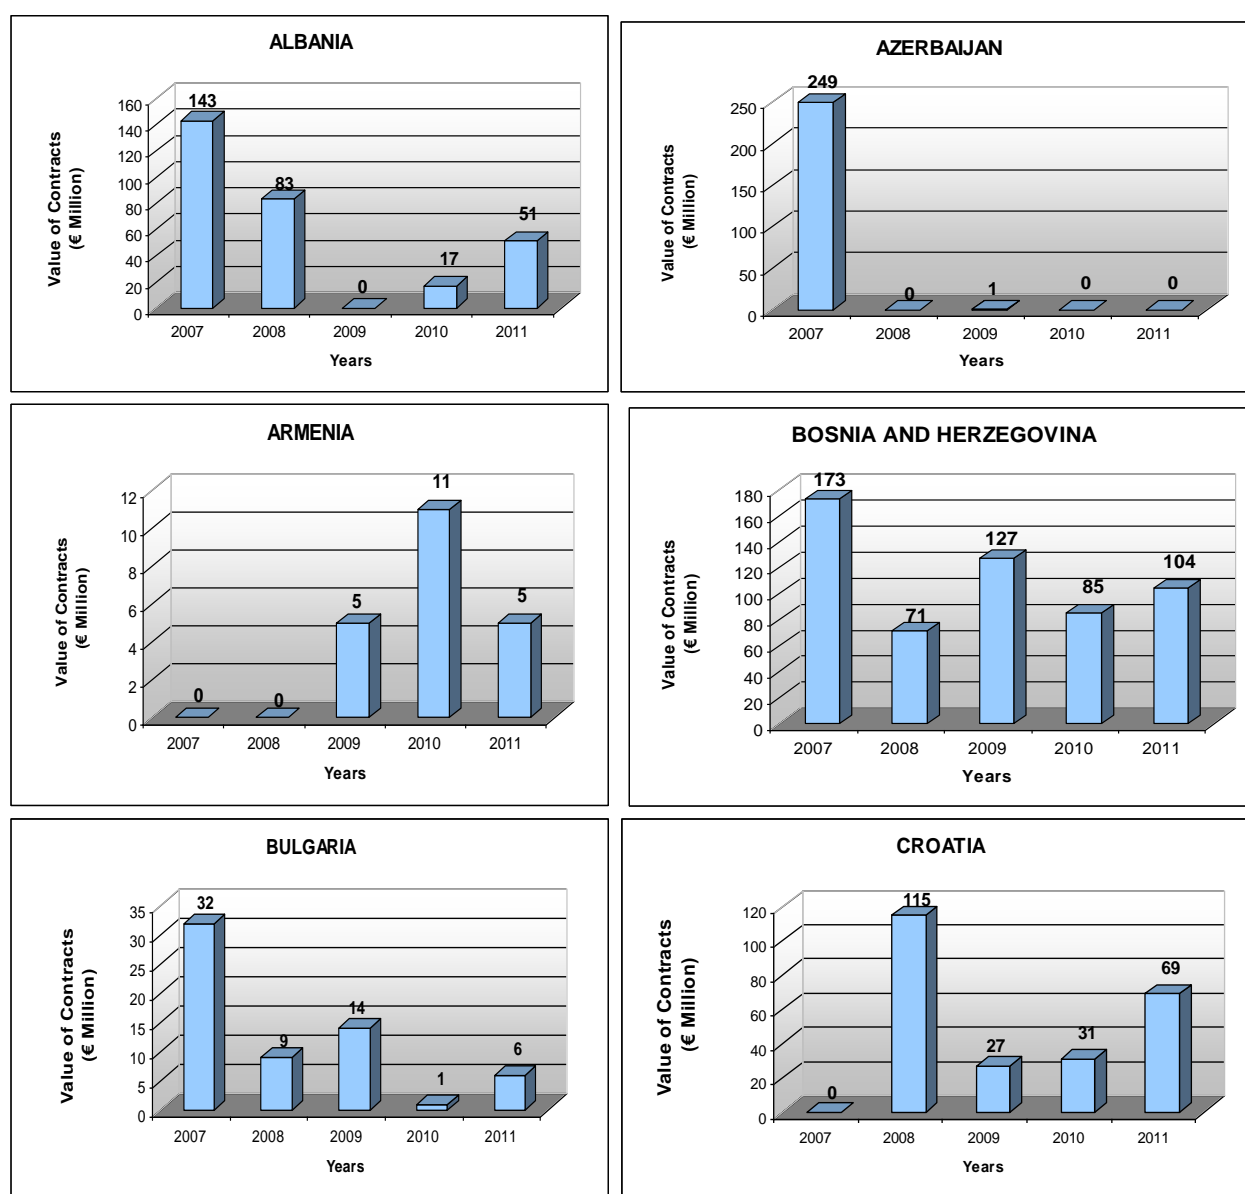

In 2011, the sector with the highest public sector contractual activity in terms of number was MEI, with 56 per cent of the total number of contracts. In terms of contract value the Transport sector was the highest with 50 per cent of the overall contract value.

## 2.3 Analysis by country of operations

### *Cumulative 2007-2011 data overview*

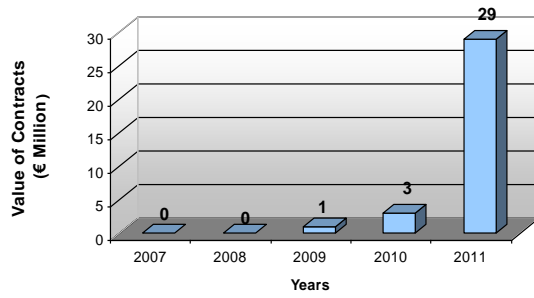

Table 2.3.1 illustrates the distribution of contracts signed between 2007 and 2011 in the countries of operations by contract value. During the past five years the countries with the highest total amount of contract value were, in descending order: the Russian Federation (€1.624 billion), Ukraine (€1.176 billion), Romania (€626 million), Kazakhstan (€605 million) and Bosnia and Herzegovina (€560 million). The contracts in these five countries add up to €4.591 billion which represents 65 per cent of the overall total contract value of the past five years (€7 billion). In the period of 2007 to 2011, no public sector contracts were financed in Belarus, Estonia, Hungary, Mongolia, Slovak Republic, Turkey and Turkmenistan.

**Table 2.3.1 Public sector contract awards in the countries of operation by value in € (2007-2011)\***

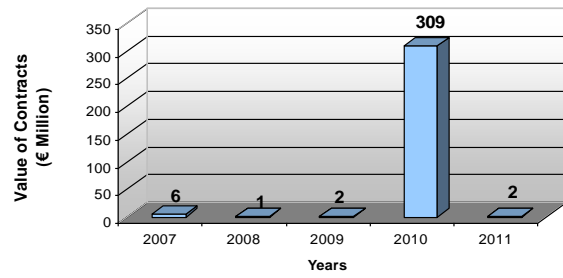

\* To add clarity, the total contract values have been rounded to millions of Euros.

### 2011 analysis

Public sector contracting activity in 2011 was spread across 19 countries of operations. The five countries with the highest contractual activity in terms of number of contracts signed were Romania (61), Ukraine (28), the Russian Federation (25), Bosnia and Herzegovina (18) and Albania (17). These 149 contracts represented nearly 68 per cent of all contracts signed.

The five countries with the highest contractual activity in terms of value, in millions of Euros, are Ukraine (€674), Romania (€237), Kazakhstan (€230), Bosnia and Herzegovina (€104) and the Russian Federation (€102). With a total signed value of €1.347 billion, these contracts represent 82 per cent of the total signed contract value in 2011.

## **2.4 Analysis by type of contract**

Table 2.4.1 gives the distribution of contracts by size and by type. The 113 works contracts represent the largest total value by contract type (52 per cent of the overall contract value) as well as the largest proportion in value financed by EBRD and EBRD administered grant funds (€554 million out of €1.078 billion).

**Table 2.4.1 Distribution of contracts by size and type (2011)**

Contract Size (€M)	Works	Supply & Installation	Goods	Consultant Services	Total
0~0.3	3	3	22	10	38

## **2.5 Listing of contracts by country of operations**

Annex 1 provides a breakdown by country of operations of all contracts signed during 2011 (excluding NSD funded contracts) showing the winning tenderer and participating tenderers.

Annex 1a provides a breakdown of contracts financed in whole or in part by EBRD (as per percentage shown)

Annex 1b provides a breakdown by contracts of operations of all EBRD administered grant funded operations (percentage shows the grant funded portion).

## **2.6 Analysis of contract award by country of origin of the tenderers**

Annex 2 provides a distribution by country of origin of the successful tenderers<sup>1</sup> and the value of contracts signed for the period 2007-2011. Tenderers from the Russian Federation have been the most successful over the last five years as they have won a total of € 1.695 billion or 24 per cent of the overall contract value. During the past five years the countries with the highest total amount of contract value were, in descending order: the Russian Federation (€ 1.695 billion), Austria (€ 612 million), Turkey (€609 million), Italy (€553 million) and Romania (€392 million). The contracts won by firms from these five countries add up to €3.861 billion which represents 54 per cent of the overall total contract value for the past five years.

Annex 3 provides the same breakdown but on the basis of the total number of public sector contracts won and signed in the period 2007 to 2011 according to the country of origin of the tenderers. Out of the 669 contracts administered by EBRD in the period 2007-2011, the highest numbers of contracts were awarded to entities from Romania (83), Bosnia & Herzegovina (77), the Russian Federation (76), Austria (41) and Germany (40).

Annex 4 provides the total value of contracts signed in 2011, distributed by type and by country of origin of the tenderers. This annex illustrates that in 2011 entities from Italy were overall the most successful in terms of winning Bank administered contracts (15 per cent of the total value of contracts). Entities from Romania were the most successful in winning loan funded consultancy services contracts at 66 per cent of the overall consultancy services contract value. Entities from Kazakhstan have been most successful for goods contract winning (43 per cent) of all goods contracts in terms of value. Entities from India have been the most successful with (44 per cent) in reference to winning supply and installation contracts. Lastly, entities from Italy were most successful for works contracts with 23 per cent of the value of all works contracts signed during 2011.

## **2.7 Contract award process**

Table 2.7.1 summarises data concerning the public procurement opportunities posted on the Bank's Internet site. It should be noted that the procurement notices were also sent to UNDB for posting in the MDB business opportunity section as well as to the EU for publishing in the Official Journal of the European Union.

---

<sup>1</sup> The successful tenderer is recorded as being only the lead entity in the case of joint ventures.

**Table 2.7.1 Public procurement postings on web site (2007-2011)**

Year	General Procurement Notices	Invitations for Expressions of Interest	Invitations to Prequalify	Invitations for Tenders	Total
2007	67	194	12	81	354
2008	86	24(*)	18	106	234
2009	79	18 (*)	16	97	210
2010	88	29(*)	16	94	227
2011	103	23(*)	12	163	301

(\*) Since 2008 only Invitations for Expression of Interest published by PD are included in this table.

In 2011, the Bank published a total of 301 procurement notices on its internet site. Out of 103 General Procurement Notices published in 2011, 65 were for new projects. It should be noted that Invitations for selection processes administered by CSU have been published separately by CSU since 2008.

**Table 2.7.2 Distribution of contracts by award method (2011)**

Contract Size (€M)	Open	Local	Shopping	Direct Selection	Competitive	Alternative	Total
0~0.3	22	0	5	5	4	1	37
0.3~7.5	93	1	0	2	11	24	131
>7.5	39	0	0	1	0	11	51
<b>Total</b>	<b>154</b>	<b>1</b>	<b>5</b>	<b>8</b>	<b>15</b>	<b>36</b>	<b>219</b>
Total Value (€)	1,384,514,516	1,380,321	358,601	35,796,555	14,772,947	212,781,082	1,645,303,736
Average Value (€)	8,990,354	1,380,321	71,720	4,474,569	984,863	5,910,586	7,512,802
Fund Portion (€)	1,020,996,371	1,380,321	343,640	16,617,962	14,772,947	25,710,643	1,048,371,445

Table 2.7.2<sup>2</sup> illustrates that the majority (154) of the public sector contracts were awarded through open tender. This represents 70 per cent of the total number of contracts awarded and 83 per cent of the total contract value. As open tendering only applies to goods, works and supply and installation contracts procured in accordance with the Bank's PP&R (which in 2011 was a total of 189 contracts), the public sector contracts awarded through open tendering actually represent 81 per cent of the number of eligible contracts and 87 per cent of the total eligible contract value when consultancy services contracts and alternative procurement procedures are excluded. The numbers for 2011 indicate that the strong emphasis of the PP&R on open tendering has been respected when the PP&R applies. Furthermore, the open tender principle was applied and accepted for contracts financed jointly by other sources thus illustrating the Bank's influence on competition in the procurement process.

Annex 5 provides the total value of contracts signed in 2011, distributed by method of procurement and by country of origin of the tenderers to whom the contracts were awarded. It reveals that in 2011, entities from Italy were the most successful at winning open tendered contracts (in accordance with the Bank's PP&R) with a total value of €239 million, followed by Ukraine (€184 million), Kazakhstan (€157), India (€130 million) and the Russian Federation (€126 million). Overall, entities from these five countries won 60 per cent of all open tendered contracts.

<sup>2</sup> Please refer to Procurement Policies Rules edition May 2010, for explanation of different tender types.

Annex 6 provides details of the public sector contracts awarded in 2011, by country of origin of the tenderers.

## 2.8 Level of participation

Table 2.8.1 provides data on the rate of participation in public sector tenders by country of origin of the tenderers for contracts signed in 2011.

A total of 805 tenders from 49 countries were received during 2011, which is a substantial increase in participation (87 per cent) from the 458 tenders received in 2010. There was an average of 4.3 tenders per contract if alternative and direct selection is excluded.

The six most successful tendering countries in terms of highest total contract value, regardless of procurement method were, in descending order: Italy (€239 million), Ukraine (€184 million), Romania (€167 million), Kazakhstan (€157million), India (€130 million) and the Russian Federation (€126 million), which together won a total of approximately €1 billion or 61 per cent of the total contract value.

The six most successful tendering countries in terms of number of contracts were: Romania (45), the Russian Federation (24), Albania (14) Kazakhstan and Bosnia & Herzegovina (13 each), Italy (12). Entities from these six countries won a total of 121 contracts (55 per cent of the total number of contracts) worth €747 million and contributing 45 per cent of the total contract value.

Entities from the six most successful countries in terms of number of contracts won submitted 50 per cent of all tenders received by Bank clients.

74 per cent of all contracts were awarded to entities from the Bank's countries of operations representing 59 per cent of the total value of all contracts.

The column "Rate of Success" seen in Table 2.8.1 provides an indication of the ratio between the award of contracts and the number of tenders submitted by entities from each country.

**Table 2.8.1 Distribution of contracts by country of origin of the tenderers (2011)**

\* "The Bank permits firms and individuals from all countries to offer goods, works and services for Bank-financed projects regardless of whether the country is a member of the Bank..." (PPR 2.6). The above list includes only those countries which have participated in the tender processes for contracts financed by the Bank.

\*\*including Kosovo

### Analysis by business sector

Annex 7 presents the level of interest generated by the invitations for tender by business sector. It can be seen that in 2011, won contracts were spread across 18 countries of operations.

Out of the total aggregate number of tenders submitted 42 per cent was in the MEI sector. Contracts won represent 56 per cent of all contracts in 2011, generating 2.7 tenders per contract.

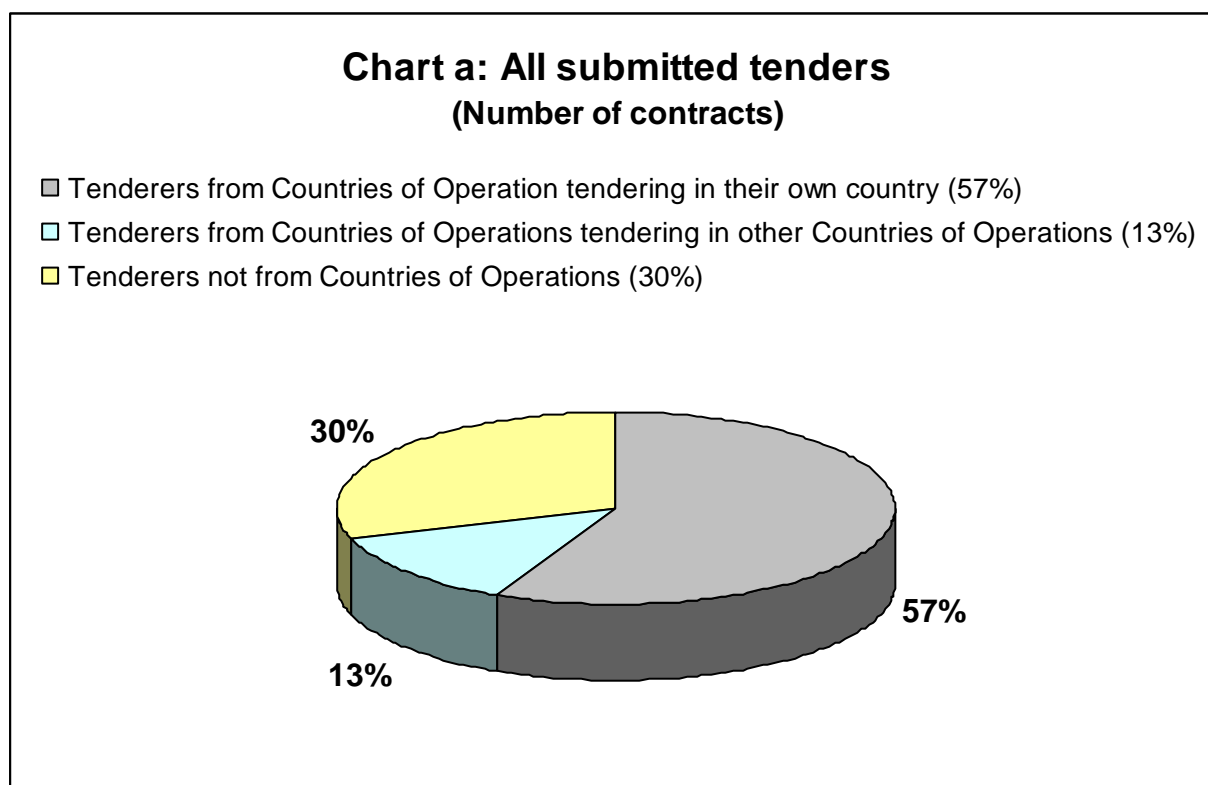

Out of the total aggregate number of tenders submitted 48 per cent was in the Transport sector. Contracts won represent 31 per cent of all contracts in 2011, generating 5.7 tenders per contract.

Out of the total aggregate number of tenders submitted 8 per cent was in the Power and Energy sector. Contracts won represent 9 per cent of all contracts in 2011, generating 3.2 tenders per contract.

### Participation of entities from countries of operations

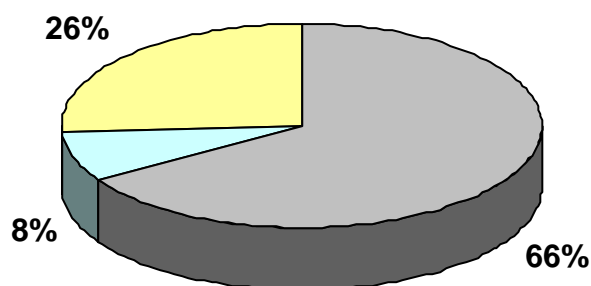

Table 2.8.2 shows that out of the overall 805 tenders that were submitted during 2011, 70 per cent were submitted by tenderers from countries of operations. From Chart B it can be seen that out of the 219 contracts awarded, 66 per cent were won by entities from countries of operations tendering in their own country and 8 per cent were won by entities from countries of operations tendering in other countries of operations. The above figures show an increase in participation of entities from the countries of operations in the tenders for Bank funded contracts and at the same time a decreased level of success in tendering outside of their own countries as compared to 2010. The success rate of participation in the tenders in the tenderers' own countries remains high.

**Table 2.8.2 Distribution of tenders by country of operations and non-country of operations**

**Chart b: All successful tenderers  
(Number of contracts)**

- Tenderers from Countries of Operation tendering in their own country (66%)
- Tenderers from Countries of Operations tendering in other Countries of Operations (8%)
- Tenderers not from Countries of Operations (26%)

Entities from EBRD's countries of operations won 162 contracts (74 per cent of all contracts) whose total value was €968 million (59 per cent of the total contract value). In most cases, entities were most successful in their own countries (winning 66 contracts for a total contract value of €737 million in their own country). There were 18 contracts worth €232 million awarded to entities from EBRD's countries of operations in countries different from the country of origin of the tenderer.

Entities from 10 countries of operations won contracts in their own countries only. These countries were Albania, Bosnia and Herzegovina, Bulgaria, FYR Macedonia, Georgia, Kazakhstan, Kyrgyzstan, Montenegro, Romania and Tajikistan. They won contracts worth a total amount of €409 million or 25 per cent of the overall contract value.

#### Country and sector tendering analysis

Annex 8 presents the distribution of tenders submitted by country of origin of the tenderers and by country of operations and Annex 9 presents the distribution of submitted tenders by country of origin of the tenderers and by business sector.

Out of all tendering countries, entities from Germany diversified their tenders to the greatest extent as they submitted tenders across 11 countries of operations and across the five business sectors. German entities won nine contracts spread across MEI (three), Power and Energy (one) and Country Team (five).

Contracts in Albania generated the highest level of interest in terms of number of tenders submitted (183), followed by the Romania (122, notably these statistics do not include tenders for contracts procured by alternative tendering methods).

## **2.9 Public sector procurement under sub-sovereign projects**

In 2011, there was a total of 107 contracts that were signed in the context of sub-sovereign public sector projects, showing an increase of 123 per cent compared to 2010 (48) and representing 49 per cent of the total number of contracts. These contracts have a total value of €606 million or 37 per cent of the overall contract value. In these contracts the EBRD portion of financing is 63 per cent of the total contract amount.

During 2011, the Contract Review and Award system (CRA) was updated to allow multi-finance accounting to correctly register contracts that are funded from more than one Bank funding source (i.e. Bank loan and Bank-administered grants) and also for ‘non-PP&R’ contracts, such as those co-financed with Cohesion Funds and the EU Instrument for Pre-Accession where exceptions have been granted by the Board under Clause 2.4 of the PP&R. This currently includes contracts co-financed with the EU Cohesion Funds, EU Instrument for Pre-Accession and EIB. The PP&R Clause 2.4 was revised in 2009 to provide guidance for when the Bank’s Board of Directors may consider, on an exceptional basis, to allow for alternative procurement procedures to apply in projects co-financed on a joint basis with other Bank’s or institutions. The clause requires the Bank to review the alternative procurement procedures to ensure that they are fair and transparent and that alternative monitoring procedures are in place that are acceptable to the Bank. Not covered by this clause but an integral part of the due diligence process is to ensure that the procedures applied do not include issues like eligibility restrictions, local preferences or similar issues that are fundamental principles of the Bank. Furthermore, the Bank’s Enforcement Policy and Procedures will apply to all public sector projects.

PD was instrumental in the preparation of a request to the FOPC for a general exception for projects co-financed with the Cohesion Funds which was supported by FOPC in April 2011. This greatly streamlines the processing of a number of projects as they can be brought directly to the Board for approval.

In 2011, one contract was entered into the CRA for projects co-financed with IPA (Croatia: Karlovac Wastewater Management Project) and 35 contracts for projects co-financed with EU Cohesion Funds (Romania R2CF Water Framework).

## **2.10 Nuclear Safety Department**

The EBRD manages six nuclear safety and decommissioning funds which have received over €2 billion in committed contributions. Each nuclear safety fund is governed by specific provisions as agreed by the respective Assembly of Contributors to each fund and approved by the EBRD Board of Directors. The funds are managed by the NSD at the EBRD on behalf of the contributing countries. Procurement under the funds must follow the EBRD’s PP&R for public sector projects with the limitation that eligibility is restricted to entities from member countries of the respective funds and the EBRD’s countries of operations.

During 2011, 53 contracts amounting to a total value of €109 million were placed under the projects financed by the funds. This represents a decrease in number compared to 2010 (5 per cent) and an increase of 25 per cent in value. Annex 10 provides a listing and details of all the contracts financed from nuclear safety funds signed during 2011.

Table 2.10.1 provides the distribution of the NSD administered contracts by size and type. 33 out of the 53 contracts signed were below €1 million, the majority of which were for consultancy services, representing 32 per cent of the total number of contracts and 2 per cent of the total

contract value. The six contracts with a value over €5 million accounted for 61 per cent of the total value of all contracts financed from the funds administered by NSD in 2011. The largest contract, worth €19 million, was for the supply of size reduction and dismantling workshops in Bulgaria signed under the Kozloduy International Decommissioning Support Fund (KIDSF).

**Table 2.10.1 Nuclear Safety Department-distribution of contracts by size and type (2011)**

Contract Size (€M)	Works	Supply & Installation	Goods	Services	Consultant Services	Total
0~0.3	1	1	8	2	15	27
0.3~7.5	7	6	2	0	5	20
>7.5	0	2	3	0	1	6
<b>Total</b>	<b>8</b>	<b>9</b>	<b>13</b>	<b>2</b>	<b>21</b>	<b>53</b>
Total Value (€)	11,983,092	45,911,209	29,534,977	200,755	21,223,115	108,853,148
Average Value (€)	1,497,887	5,101,245	2,271,921	100,378	1,010,625	2,053,833

Table 2.10.2 provides the distribution of the NSD funded contracts by size and by method of award. Contracts subject to open and competitive selection procedures amounted to €97.8 million which is 90 per cent of the value of total contracts placed. The value of consultancy services contracts subject to direct selection in 2011 has increased significantly by 129 per cent compared to 2010. Direct selection of consultants during 2011 amounted to a total contract value of €9 million (compared to €3.9 million in 2010). The two largest contracts were signed under the Bohunice International Decommissioning Support Fund (BIDSF) both valued respectively €4 million. These two contracts accounted for 89 per cent of the overall value of consultancy contracts awarded by direct selection.

**Table 2.10.2 Nuclear Safety Department- distribution of contracts by award method (2011)**

Contract Size (€M)	Open	Shopping	Direct Selection	Competitive	Selection from a Shortlist	Total
0~0.3	4	8	8	3	4	27
0.3~7.5	14	0	4	2	0	20
>7.5	5	0	0	1	0	6
<b>Total</b>	<b>23</b>	<b>8</b>	<b>12</b>	<b>6</b>	<b>4</b>	<b>53</b>
Total Value (€)	85,995,646	431,880	10,273,935	11,833,021	318,666	108,853,148
Average Value (€)	3,738,941	53,985	856,161	1,972,170	79,667	2,053,833

The projects administered by NSD are implemented in strict compliance with the EBRD PP&R, however, they are to a great extent affected by the nature of the nuclear industry. Donors to the nuclear safety funds are particularly interested that projects are tendered in a competitive manner. Therefore, NSD informs the Assemblies of Contributors if direct contracting is used and in most cases seeks additionally their prior approval or endorsement. The decisions to use direct contracting are influenced by numerous issues resulting from the established practices of the nuclear industry (such as security, radiation protection and safety requirements) with due consideration to the input coming from related bilateral projects (mainly regulatory assistance).

Further to the above total amount of approximately €109 million for new contracts signed in 2011, additional €826 million have been approved by NSD in 2011 through various contract amendments, of which there are two distinct amendments in the total amount of approximately €749 million pertaining to:

- (i) Chernobyl Interim Storage Facility for Spent Fuel Assemblies - ISF-2, contract amendment with Holtec International in the amount of €255 million, on 16 February 2011, which was subject to the Assembly's regular approval and PD Review; and

- (ii) New Safe Confinement, Design, Construction, Commissioning, amended with Novarka Joint Venture Partnership: Vinci Construction Projets and Bouygues Travaux Public, in the amount of approximately €494 million, on 1 October 2011, which was processed in line with the Assembly's decisions of its July 2011 meeting, and included the key elements of the cost, the completion schedule and procurement aspects, within additional financial resources committed by the donors.

The remaining balance of approximately €77 million pertains to various contract amendments in 2011, mainly within the Ignalina International Decommissioning Support Fund, in the cumulative amount of €36 million, as well as the Kozloduy International Decommissioning Support Fund in the cumulative amount of €40 million, all of which were subject to the corresponding Assembly's regular approval.

### 3. Compliance and integrity

#### 3.1 Complaints and concerns

PD handled 11 procurement complaints and one concern for Bank financed or administered contracts during the course of 2011, as compared to the 16 procurement complaints and four concerns in 2010<sup>3</sup>. In 2011, there were 219 contracts signed in the public sector (2010: 113), 53 contracts signed under nuclear safety funds (2010: 56) and 2,206 signed consultancy contracts, which were funded from Bank administered TC funds and from the Bank's own budget (2010: 2,290). Furthermore, 571 consultancy contracts were signed by OGC for retaining outside legal counsel (2010: 509).<sup>4</sup> Table 3.1.1 presents a comparison of figures for complaints/concerns reviewed between 2007 and 2011, by contract type and procurement method.

**Table 3.1.1 Number of complaints/concerns 2007-2011 by contract type**

<b>Contract Type</b>	<b>2007</b>	<b>2008</b>	<b>2009</b>	<b>2010</b>	<b>2011</b>
<b>Works</b>	8	7	3	7	5
<b>Goods</b>	1	5	4	6	5
<b>Supply and Installation</b>	2	8	7	6	1
<b>Services</b>	4	1	0	0	0
<b>Consultancy (Loan Funded)</b>	1	0	0	1	1
<b>Consultancy (TC and Bank's own funds, administered by CSU)</b>	0	0	0	0	0
<b>Consultancy (outside legal counsel retained by OGC)</b>	0	0	0	0	0
<b>Total</b>	<b>16</b>	<b>21</b>	<b>14</b>	<b>20</b>	<b>12</b>

In 2011, the majority of complaints/concerns were equally related to contracts for works and contracts for goods, whereas in 2010, the majority of complaints/concerns were related to contracts for works.

Table 3.1.2 provides a summary of the eight complaints that were closed in 2011. The information provided includes the nature, the business sector and the outcome of the complaint process for each of these complaints. Whilst seven of these eight complaints were not upheld by PCC, one complaint was closed without PCC review, as the allegations of the complainant could not be assessed due to the complainant's confidentiality requirements.

The complaints/concerns raised by unsuccessful entities in 2011, varied in nature. The following issues were raised:

- Challenging the responsiveness of the winning tenderer in respect of meeting the qualification criteria
- Challenging the client's determination that a tender has been deemed as "non-compliant" with the tender documents.

<sup>3</sup> A distinction is made between those issues raised by dissatisfied parties that clients can resolve themselves and complaints that are formally addressed to and require the action of the Bank. A "concern" is any minor issue that is brought to the attention of the EBRD by a tenderer regarding the procurement process or contract award. The concern is referred to the contracting authority, which is expected to address and resolve the issue with the relevant party under PD's supervision. If the two parties cannot come to an understanding or an agreement, the concern may be elevated to the status of a complaint. At that point, the EBRD freezes the procurement process and an investigation is undertaken.

<sup>4</sup> The number of consultancy contracts administered by CSU (including contracts related to the Small Business Support Team (SBS) – formerly known as TAM/BAS) and OGC has now been included in this section as the Bank's PP&R and, consequently, the Bank's procurement complaints/concerns review procedures are also applicable for these contracts.

- Allegation that restrictive qualification criteria restricted the competition to local tenderers.
- Allegation that the tender documents were targeted at a particular supplier and therefore limited competition.
- Allegation that irregularities occurred during tender opening.
- Allegation that members of the evaluation committee had conflicts of interest.

**Table 3.1.2 Complaints and concerns by nature and by business sector (complaints closed during 2011)**

Country of Originator of Complaint/Concern	Project	Complaint/Concern	Business Sector	Nature of Complaint/Concern	Outcome of the Complaint Process	Contract Amount €	Time-line
Slovenia	Russian Federation: Khanty-Mansi Municipal Services Development Programme: Pyt'Ya	Complaint	MEI	The complainant required a clarification as to why its tender was not selected. The complainant further alleged that the Client restricted the competitiveness of the procurement process to local tenderers. The complainant also requested assurances that there will be no breach of its patent rights relating to the design submitted with its tender.	It was concluded to close the complaint on the grounds of "incomplete information" received from the Complainant.	3,000,000	< 11 months
Russian Federation	Moldova: Chisinau Public Transport	Complaint	MEI	The complainant alleged that the successful tenderer could not offer trolleybuses as per the tender requirements.	PCC agreed with PD's recommendation not to uphold this complaint as it was established that the successful tenderer was fully compliant with the tender requirements	12,747,955	< 2 months
Russian Federation	Russian Federation: Sakha (Yakutia) Republican MSDP GUP ZhKH	Complaint	MEI	The complaint concerned the allegation that there was an irregularity at tender opening and that the complainant's tender should not have been rejected by the Client on technical grounds.	PCC agreed with PD's recommendation not to uphold this complaint as it was determined that there were no material irregularities at the tender opening. It was further established that the complainant had failed to meet material tender requirements	5,400,000	< 10 months
Croatia	Bosnia and Herzegovina: Gasification of Central Bosnia Canton	Complaint	Natural Resources	The complainant objected to the Client's determination that the former had not met several of the pre-qualification criteria and was therefore rejected.	PCC agreed with PD's recommendation not to uphold this complaint as it was clearly established that the complainant did not meet the contested prequalification requirements.	10,000,000	< 1 months

Bulgaria	Bulgaria: Kozloduy International De- commissioning Support Fund	Complaint	Nuclear Safety	The Complainant alleged that one of the tenderers did not comply with some of the conditions and the criteria set forth in the tender documents.	PCC agreed with PD's recommendation not to uphold this complaint as the contested inclusion of tender discount was found to be in accordance with the tender documents.	10,000,000	< 2 months
Albania	Albania: Local And Regional Roads	Complaint	Transport	The complainant disputed the rejection of its tender by the client for failure to list two non-performed contracts on the relevant tender form.	PCC agreed with PD's recommendation not to uphold this complaint as the complainant had not complied with several qualification criteria.	7,000,000	< 6 months
Austria	Bosnia and Herzegovina: Gasification of Central Bosnia Canton	Complaint	Natural Resources	The complainant alleged that a member of the winning joint venture did not fulfil some of the requirements of the invitation to prequalification and the tender documents and that the joint venture should consequently be disqualified.	PCC agreed with PD's recommendation not to uphold this complaint as it was established that the JV member in question had met the contested requirements of the tender documents.	10,000,000	< 1 months
Italy	Bosnia and Herzegovina: Gasification of Central Bosnia Canton	Complaint	Natural Resources	The complainant disputed the rejection of its tender, which the Client determined to be non-responsive.	PCC agreed with PD's recommendation not to uphold this complaint as it was determined that the complainant had not met a material requirement of the tender document.	10,000,000	< 1 months

Table 3.1.2 also provides information on the duration of the review of complaints and concerns. Whilst the review of the majority of the cases could be finalised within a period of less than two months, some complaints could only be closed up to 11 months after receipt by the Bank.

The complaint concerning the Khanty- Mansi Municipal Services Development Programme could not be fully assessed due to restrictive confidentiality requirements by the complainant. After repeated unsuccessful attempts to receive a response from the complainant concerning this issue, the complaint was closed. In the case of the complaint concerning the Sakha Yakutia project, the delay in completing the complaints procedure was partly caused by the change of the client's entire management team during the assessment period. The delay in finalising the review of the complaint concerning the Albanian Local and Regional Roads project was mainly caused by the delayed analysis and response of the lender's monitor concerning technical issues of the complaint.

In 2011, PD received no complaints on the procurement of contracts funded by TC funds and the Bank's own budget. The complaints/concerns closed in 2011 were related to MEI and Natural Resources projects (three each) and to Nuclear Safety and Transport projects (one each). Allegations of improper tender evaluation continued to be the principal source of complaints.

### **3.2 Prohibited practices**

In 2010, the Bank signed the "Agreement for Mutual Enforcement of Debarment Decisions". The Agreement was signed by the African Development Bank Group, the Asian Development Bank, the Inter American Development Bank, the World Bank Group and the European Bank for Reconstruction and Development.

The list of entities and individuals which are currently ineligible to become an EBRD Counterparty can be found on the Bank's website <http://www.ebrd.com/pages/about/integrity/list.shtml>.

Entities (and their affiliates) or individuals may be ineligible to become a Bank Counterparty if EBRD determines, in accordance with EBRD's Enforcement Policy and Procedures, that (a) they have engaged in any Prohibited Practice in the context of a Bank project, or (b) they are subject to a Third Party Finding or (c) they are subject to a Debarment Decision by a Mutual Enforcement Institution.

As of 31 December 2011, four firms have been debarred as a result of EBRD initiated actions and 36 entities and 23 individuals as a result of mutual enforcement of debarment decisions.

PD continues to work in close cooperation with the Office of the Chief Compliance Officer in cases where Prohibited Practices allegedly occurred in the context of procurement or where "red flags" have been identified in the procurement process. Red flags identified by PD are noted against projects in its Procurement Administration System and 'red flag' reports are used as a basis for determining which projects will be subject to independent procurement reviews.

### **3.3 Independent procurement reviews**

In 2011, PD finalised the following two independent procurement reviews (IPR) as follows:

- Ukraine: Chernobyl Shelter Fund and Nuclear Safety Account; and
- Russian Federation: Rosvodokanal

These IPRs were finalised in addition to those concluded by PD in 2010 as follows:

- Ukraine: Ukrainian Energy Saving Company (UkrEsco) I and II; and
- EU/EBRD Municipal Finance Loan Facility;

The outcome of all the above IPRs was reported to the Audit Committee in December 2011.

The IPRs revealed several areas of concern. In particular, the IPRs identified considerable room for improvement in relation to the Bank's fiduciary responsibility for oversight of procurement under projects where the normal oversight function by the Bank's procurement specialists had been replaced with external monitoring arrangements due to the design of the project. Based on the IPRs' findings, PD prepared an action plan including the introduction of: a) Client procurement capacity assessment and training needs toolkit; b) clarification of procedures through a revision of the Bank's Operations Manual and internal guidance notes. The outcome of all four IPRs and the action plan were presented to the Bank's Audit Committee.

Each project design needs to be considered on its own merits and different measures may be applicable in different projects. The Procurement Department reviews all projects that are submitted to the Bank's Operation Committee and provides comments as appropriate on procurement and monitoring issues.

Based on the findings in the IPR the Procurement Department has taken the following actions

- i) A Bank procurement specialist shall be appointed to all projects involving Public Sector procurement or concession arrangements (including those with intermediaries). This will be reflected in a revision of the Operations Manual;
- ii) The Procurement Department shall review and sign off on the three first subprojects in any intermediary arrangement involving Public Sector procurement. This will be reflected in a revision of the Operations Manual;
- iii) A procurement experienced Lender's Monitoring Consultant (LMC) to be appointed to projects involving intermediaries and public sector procurement and the Procurement Department shall sign off on the TOR and selection of LMC as well as consultants that have responsibility for procurement oversight in these projects. This will be reflected in a revision of the Operations Manual

PD also commissioned two independent procurement reviews as follows:

- Bosnia and Herzegovina: Analysis of procurement Complaints statistics in Bosnia and Herzegovina; and
- Romania: Brasov Urban Transport

The projects for all the above IPRs were selected based on the relevance of the project to the Bank's likely future operations; lessons-learned potential; size of the Bank's investment commitment/exposure; balance among countries of operations; relative priority of operation within PD's overall work programme as well as by reference to PD's procurement risk dashboard.

All IPRs have been carried out with the view to strengthen the ability of the Bank to fulfil its fiduciary obligation with regard to the oversight of procurement, to complement the prior review and post review procedures, and to inform the Bank's management of the quality of the Bank's fiduciary work on procurement.

## Listing of Contracts by Country of Operations (Value in €) 2011
