

ANNUAL PROCUREMENT REVIEW

2012

**Prepared by
The Procurement Department
April 2013**

European Bank
for Reconstruction and Development

Executive summary

This report, prepared by the Procurement Department (PD), reviews public sector procurement contracts signed in 2012, funded and/or administered by the Bank and procured by the Bank's clients. A separate section (2.10) is covering the procurement activities of the Nuclear Safety Department (NSD).

- A total of 207 (excluding NSD contracts) contracts were signed by Bank clients in 2012. The total value of these contracts amounted to € 1.276 billion for which EBRD's own financing totalled €761 million. In comparison with 2011, this represents a decrease in terms of the number of signed contracts (by 5 per cent) and a decrease of the total signed contract value (of 22 per cent).
- The largest contract was the construction of motorway section Demir Kapija-Smokvica in FYR Macedonia. This works contract was signed with a value of €210 million for which EBRD provided financing of €81 million (39 per cent of the total contract value).
- Public sector contracts awarded through open tendering represent 86 per cent of the number of and 95 per cent of the total contract value (excluding consultancy services contracts and contracts subject to alternative procurement procedures). These high numbers indicate that the strong emphasis of the PP&R on open tendering continued to be respected in 2012.
- A total of 615 tenders from 45 countries were received during 2012, which is a decrease in participation (24 per cent) compared with the 805 tenders received in 2011. There was an average of 3.5 tenders per contract procured (compared with 4.3 in 2011) using open tendering procedures.
- Entities from France were the most successful in winning loan funded consultancy services contracts at 56 per cent of the overall consultancy services contract value. Entities from Kazakhstan have been most successful for goods contracts; winning (54 per cent) of all goods contracts in terms of value. Entities from Slovenia have been the most successful at 35 per cent in winning supply and installation contracts. Lastly, entities from Bosnia and Herzegovina were most successful for works contracts with 21 per cent of the value of all works contracts signed during 2012.
- During 2012, 43 contracts amounting to a total value of €71.7 million were placed under the projects financed by the Nuclear Safety Funds. This represents a decrease compared to 2011 of 19 per cent in the number of contracts and of 34 per cent in value.
- PD handled 23 procurement complaints and four concerns for Bank financed or administered contracts during the course of 2012, as compared to the 11 procurement complaints and one concern in 2011. This represents an unusually high number of procurement complaints. However, an increase in complaints has also been observed by other MDBs suggesting that this can to some extent be explained by the current economic climate which leads to more aggressive competition.
- It should be noted that the statistic is very much influenced by the types of projects and contracts financed by the Bank i.e. typically a high number of smaller works contracts normally lead to predominantly local participation and therefore success.
- Last year activities show a stable high number of contracts with a slight drop in the total value which may be due to the Bank's shift of activities towards early transition countries; resulting in a drop in the number of contracts in EU countries except for Romania. As a result the emerging trend appears to be a larger number of smaller contracts. As before the highest number of contracts is in the MEI sector and the largest value in the transport sector which is explained by the nature of their projects. There is a continuous high level of participation from tenderers from different regions in the world with a high level of success by tenderers from countries of operations. This can to a large extent be attributed to successful transition of local economies towards operating in a competitive market environment.

Procurement Department activities

- Support to Banking teams and NSD is the main priority for PD and is significant in terms of the use of PD's resources. In addition to assisting the project teams in their due diligence and monitoring procurement arrangements for Bank administered projects PD's staff undertook 19 missions directly relating to operational procurement support to the Banking teams. PD delivered procurement seminars and took part in procurement related meetings directly with clients when requested by the Banking teams.
- In 2012 the Procurement Department (PD) and Office of the Chief Economist (OCE) prepared a guidance note – "Procurement and Transition in Public Sector Projects". The note sets out guiding principles for how EBRD's Procurement Policy and Rules may be integrated and recognised as part of OCE's assessment and monitoring of transition impact deriving from the Bank's investment projects.
- In 2012, the Bank signed a Memorandum of Cooperation with the Government of Serbia, paving the way for further policy dialogue with the Serbian Authorities. The dialogue focuses on the modernisation of the Serbian public procurement legal framework and practices. The signing of the Memorandum of Cooperation followed PD's participation in the revision process of the new procurement law in Serbia.
- PD together with the University of Tor Vergata (Rome) developed a pilot international (English language) version of its Master Degree in Procurement Management specifically tailored towards key procurement officials from the Bank's countries of operations. PD obtained funding from the Central European Initiative, the Italian Trust Fund and the Special Shareholders fund for up to 15 suitably qualified and eligible students.

Annual Procurement Review 2012

1. Introduction

This report, prepared by the Procurement Department (PD), reviews public sector procurement contracts signed in 2012, funded and/or administered by the Bank and procured by the Bank's clients. A separate section (2.10) covers the procurement activities of the Nuclear Safety Department (NSD). This report covers goods, works and consultancy contracts financed under public sector financing. It does not cover consultancy contracts for the Bank's own needs, those financed through Technical Cooperation (TC) funds, or those awarded by the Office of the General Counsel (OGC), or contracts for goods and services for the Bank's own needs. Information on these contracts are provided in the reports on *Engagement of Consultants by the EBRD* issued by the Technical Cooperation Team (formerly the Consultancy Services Unit), and in the *Annual Corporate Procurement Review*, issued by the Corporate Procurement Unit (CPU).

Annexes 1 to 10 of the *Annual Procurement Review 2012* contain the statistical data for these public sector procurement contracts during 2012. The analysis of this data, as well as the main procurement activities of the PD (section 4), can be found in the main body of this report. Sections 1-3 of this report (not section 4) as well as the annexes will be published on the Bank's website.

2. Analysis of public sector procurement data

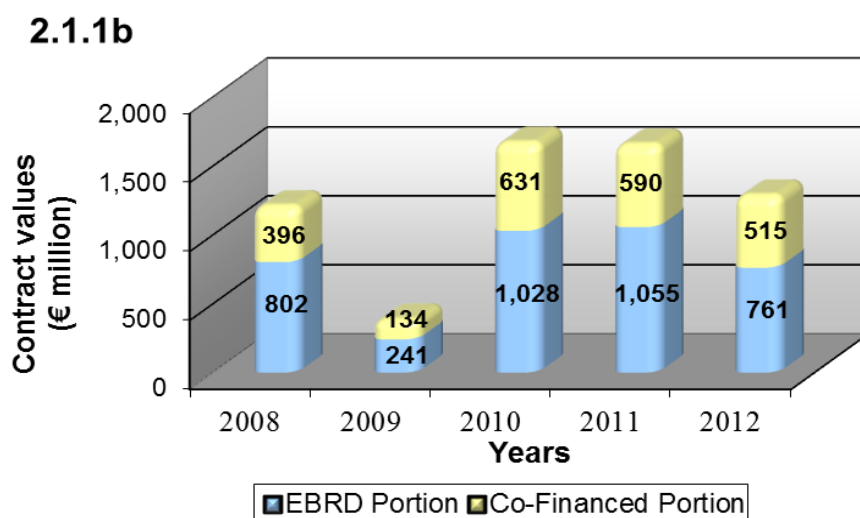

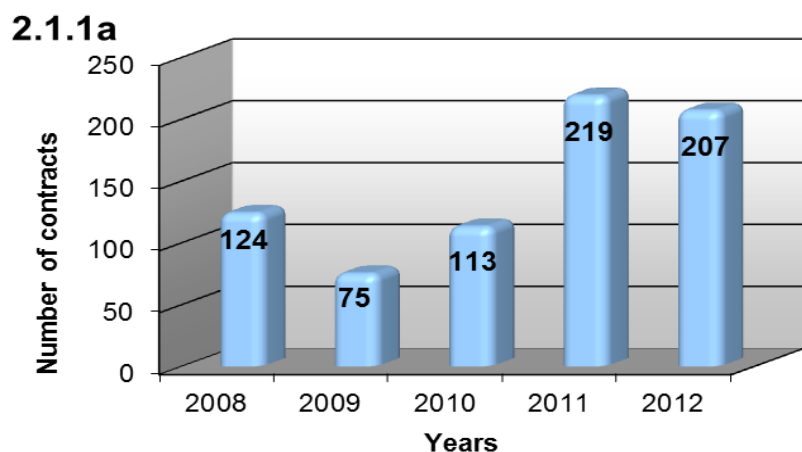

2.1 Volume and nature of contracts

A total of 207 (excluding NSD contracts) contracts were signed by the Bank's clients in 2012. The total value of these contracts amounted to € 1.276 billion for which EBRD's own financing totalled €761 million (see Annex 1 for the listing of contracts by country of operations). In comparison with 2011, this represents a decrease in terms of the number of signed contracts (by 5 per cent) and a decrease of the total signed contract value (of 22 per cent).

Table 2.1.1a illustrates the number of public sector contracts signed between 2008 and 2012.

Table 2.1.1b demonstrates the overall contract value as well as the portion financed by the EBRD between 2008-2012. Over the past five years, a total of 738 contracts have been signed with a total value of €6.152 billion of which the EBRD financed €3.886 billion.

Table 2.1.1 Annual number and value of public sector contract awards (2008-2012)

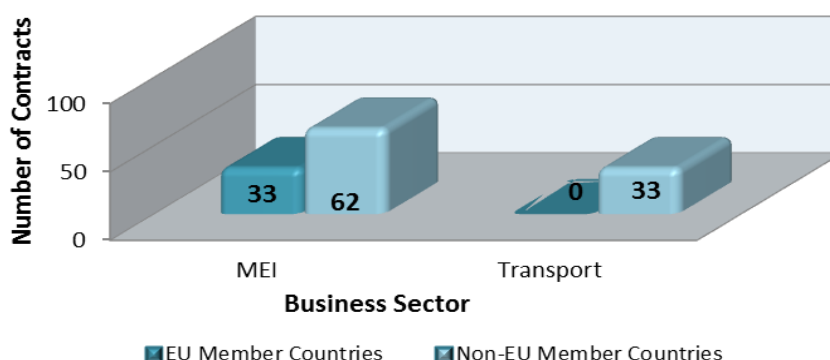

Co-Financing

Of the total contract value of €1.276 billion in 2012, the EBRD financed €761 million, whilst the balance of €515 million was provided by other sources, such as other financial institutions (IFIs, EU Agencies, bilateral donors etc.) or by the borrowers themselves. In comparison with 2011, a 13 per cent decrease of the total value provided by other sources can be noted. In 2012, 128 of the 207 contracts (62 per cent) were co-financed in comparison with 139 out of the 219 contracts (62 per cent) in 2011. The value of the 128 contracts in which co-financing was present amounted to €1.090 billion and the EBRD's portion of these contracts represents €575 million.

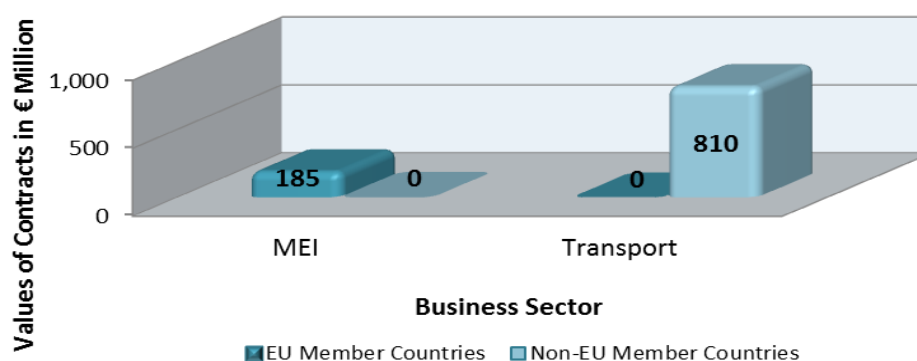

Table 2.1.2a and table 2.1.2b presents the distribution of the 128 co-financed contracts, in EU member countries and non-EU member countries by number and by value. Co-financed contracts in EU member countries represented 26 per cent of the total number of co-financed contracts and 17 per cent of the total value of all co-financed contracts. The sector with the highest co-financed contractual activity in terms of the number of contracts was the MEI sector with 95 contracts, i.e. 74 per cent of all co-financed contracts representing €281 million. In the MEI sector 62 out of 95 co-financed contracts were signed in non-EU member countries. Out of the 33 contracts signed in EU countries 26 are co-financed with EU cohesion funds. The highest overall co-financed contract value was in the Transport sector (€ 810 million representing 74 per cent of the total co-financed contract value). In the Transport sector all 33 of the co-financed contracts were signed in non EU member countries.

Table 2.1.2 Distribution of co-financed public sector contracts during 2012

2.1.2a

2.1.2b

Overall analysis

In 2012, the average contract value was €6.2 million and the average EBRD financing was €3.7 million per contract. The latter represents a decrease of 23 per cent compared to the average EBRD financing reported in 2011, where the EBRD financing averaged €4.8 million per contract. There were 27 contracts in which the total signed contract value was greater than €10 million, nine of which had a total signed contract value of more than €20 million. In 2012, there were 18 contracts in which EBRD financing was greater than €10 million, six of which had EBRD financing of more than €20 million. The largest contract was the construction of motorway section Demir Kapija-Smokvica in FYR Macedonia. This works contract was signed with a value of €210 million for which EBRD provided financing of €81 million (39 per cent of the total contract value). The contract with the highest amount of EBRD funding was the contract for the construction of the motorway section Valkovo-Tarcin in Bosnia and Herzegovina (€98 million of the total contract value of €115 million).

In total 20 investment grant financed contracts were administered by the Bank following the Bank's PP&R (in some cases with eligibility restrictions in accordance with funding agreements) representing a value of €21.3 million. Out of these contracts 11 were co-financed with EBRD and all 20 contracts are included in this report.

Also included in this report are four contracts worth €5.1 million, which were 100 per cent financed by sources other than EBRD loans or EBRD administered grants. These awards followed the application of the Bank's PP&R and were administered by the EBRD in line with the respective implementation agreements.

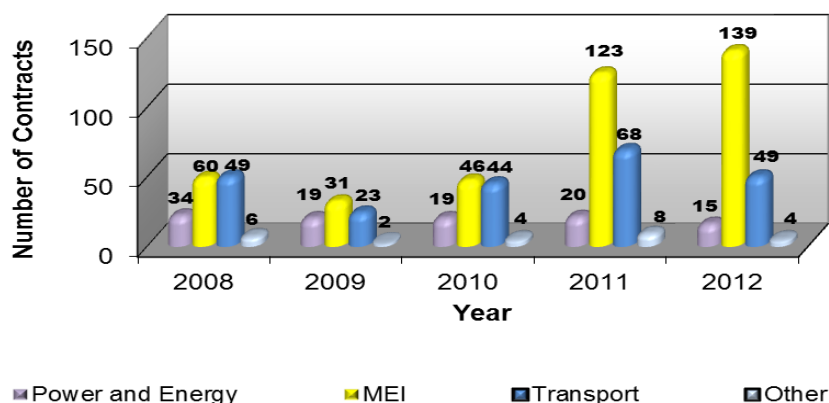

2.2 Analysis by sector

Cumulative 2008-2012 data overview

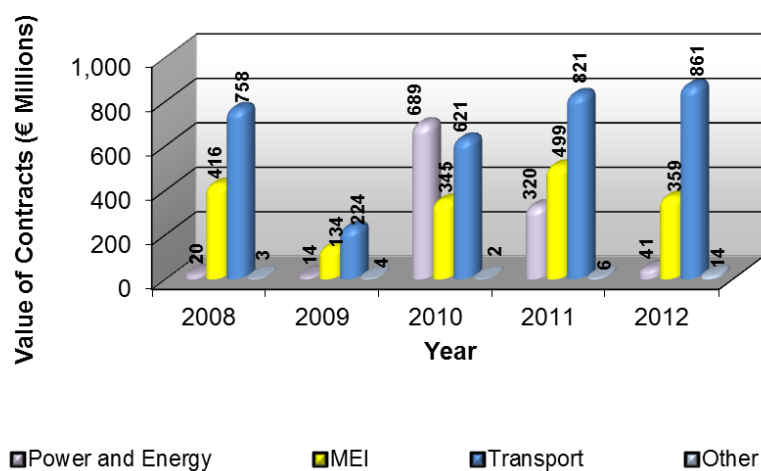

Tables 2.2.1 a and b illustrate the overall contract value and the number of public sector contracts signed between 2008 and 2012 by business sector. With a total number of 387 contracts worth €1.753 billion, the MEI sector has had the highest contractual activity in terms of number and the Transport team in terms of value (€3.285 billion) over the past five years.

Table 2.2.1 Annual number and value of public sector contract awards by business sector (2008-2012)

2.2.1a - Public Sector Contracts (number)

2.2.1b - Public Sector Contracts (Value €)

2012 analysis

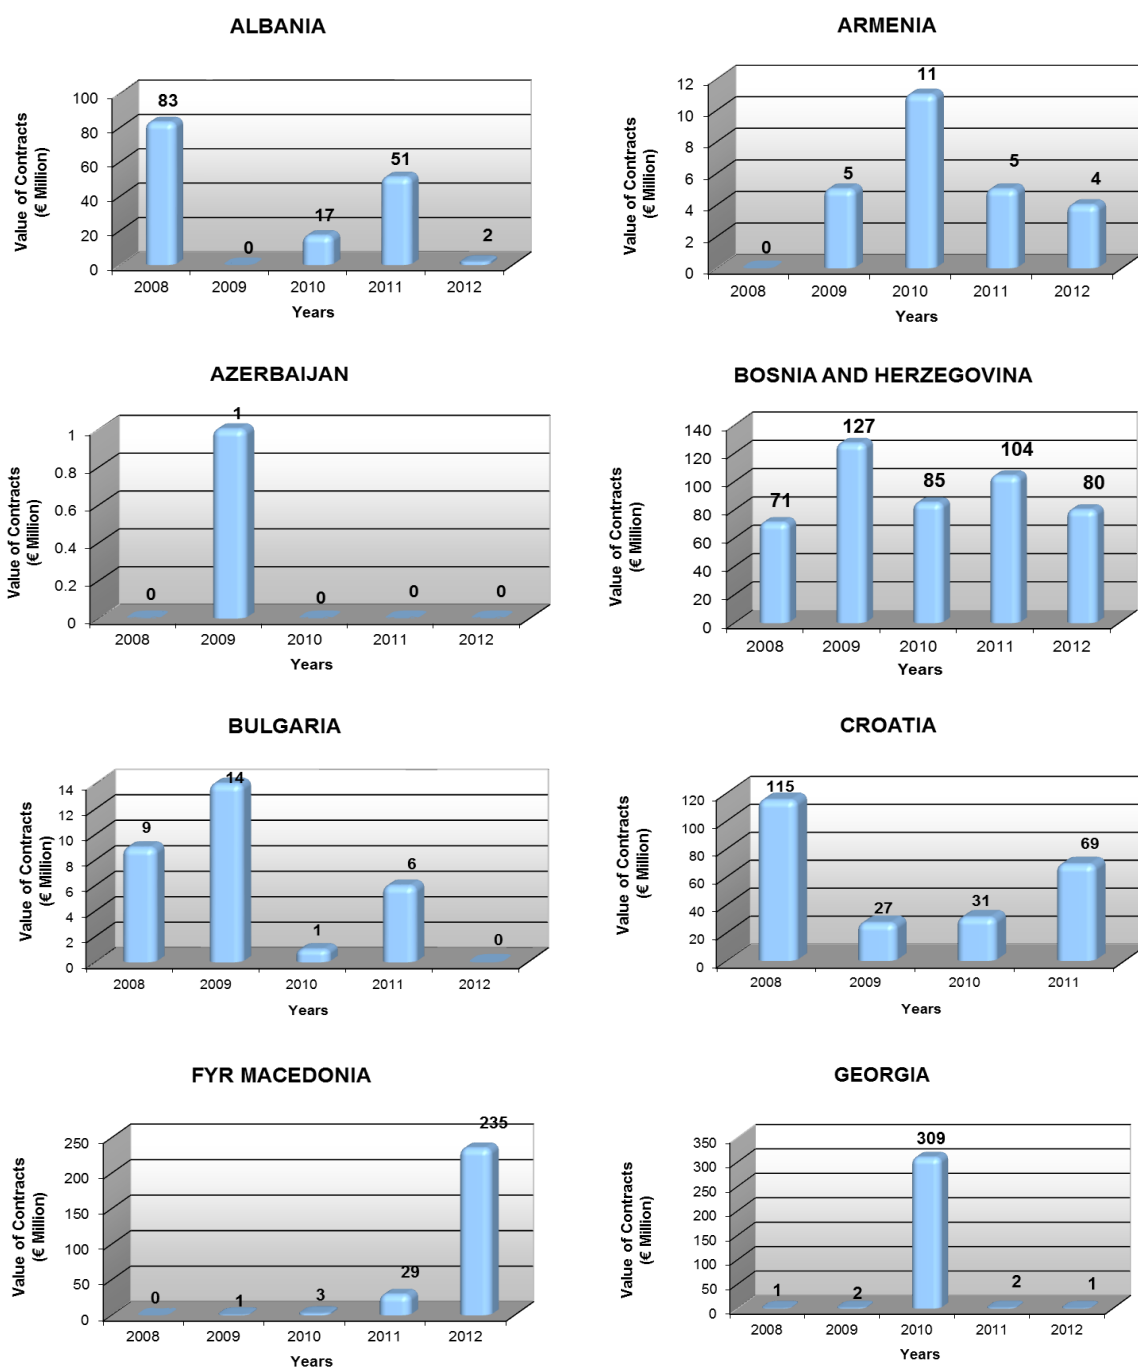

In 2012, the sector with the highest public sector contractual activity in terms of number was the MEI sector, with 67 per cent of the total number of contracts. In terms of contract value the Transport sector was the highest with 75 per cent of the overall total contract value.

2.3 Analysis by country of operations

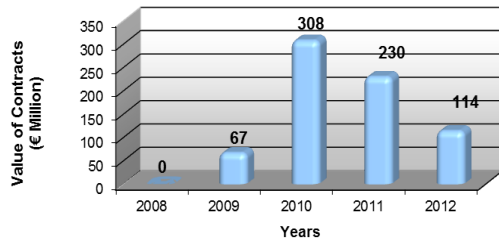

Cumulative 2008-2012 data overview

Table 2.3.1 illustrates the distribution of contracts signed between 2008 and 2012 in the countries of operation by contract value. During the past five years the countries with the highest total value of contracts were, in descending order: Ukraine (€1.051 billion), Kazakhstan (€719 million), Romania (€694 million), the Russian Federation (€517 million) and Bosnia and Herzegovina (€467 million). The contracts in these five countries add up to €3.448 billion which represents 58 per cent of the overall total contract value of the past five years (€5.967 billion). In the period 2008 to 2012, no public sector contracts were reported in Belarus, Egypt, Estonia, Hungary, Jordan, Kosovo, Mongolia, Morocco, Slovak Republic, Tunisia, Turkmenistan and Uzbekistan.

2012 analysis

Public sector contracting activities was spread across 17 countries of operation. The five countries with the highest contractual activity in terms of number of contracts signed were Romania (37), Moldova (30), the Russian Federation (22), Bosnia and Herzegovina (21) and Croatia (18). These 128 contracts represent 62 per cent of all contracts signed.

The five countries with the highest contractual activity in terms of value, are FYR Macedonia (€235 million), Romania (€191 million), Kazakhstan (€114 million), Croatia (€98 million) and Bosnia and Herzegovina (€80 million). With a total signed value of €718 million, these contracts represent 56 per cent of the total signed contract value in 2012.

2.4 Analysis by type of contract

Table 2.4.1 gives the distribution of contracts by size and type. The 88 works contracts represent the largest total value by contract type (80 per cent of the overall contract value) as well as the largest proportion in value financed by EBRD and EBRD administered grants (€540 million out of €774 million).

Table 2.4.1 Distribution of contracts by size and type (2012)

Contract Size (€ million)	Works	Supply & Installation	Goods	Consultant Services	Total
<0.3	1	3	42	11	57
0.3~7.5	68	26	17	9	120
>7.5	19	2	8	1	30
Total	88	31	67	21	207
Total Value (€)	1,017,542,428	72,937,085	158,058,635	27,259,368	1,275,797,516
Average Value (€)	11,562,982	2,352,809	2,359,084	1,298,065	6,163,273
Fund Portion* (€)	539,937,295	69,885,939	143,276,517	20,620,737	773,720,488

*Loan and grant funded

2.5 Listing of contracts by country of operation

Annex 1 provides a breakdown by country of operation of all contracts signed during 2012 (excluding NSD funded contracts) showing the winning tenderer and participating tenderers.

Annex 1a provides a list of contracts and the level of Bank financing (as per percentage shown).

Annex 1b provides a list of contracts financed by Bank administered Grants (percentage shows the grant funded portion).

2.6 Analysis of contract award by country of origin of the tenderers

Annex 2 provides a distribution by country of origin of the successful tenderers¹ and the value of contracts signed for the period 2008-2012. Tenderers from Turkey have been the most successful over the last five years as they have won a total of €736 million or 12 per cent of the overall contract value. During the past five years the countries with the highest total amount of contract value were, in descending order: Turkey (€736 million), the Russian Federation (€552 million), Austria (€549 million), Romania (€506 million) and Kazakhstan (€360 million). The contracts won by firms from these five countries amounts to €2.703 billion which represents 44 per cent of the overall total contract value for the past five years.

Annex 3 provides the same breakdown but on the basis of the total number of public sector contracts won and signed in the period 2008-2012 according to the country of origin of the tenderers. Out of the 738 contracts administered by EBRD in the period 2008-2012, the highest numbers of contracts were awarded to entities from Romania (101), Bosnia & Herzegovina (87), the Russian Federation (81), Austria (41) and Germany (41).

Annex 4 provides the total value of contracts signed in 2012, distributed by type and by country of origin of the tenderers. This annex illustrates that in 2012 entities from Bosnia and Herzegovina were the most successful overall in terms of winning Bank administered contracts (17 per cent of the total value of contracts). Entities from France were the most successful in winning loan funded consultancy services contracts at 56 per cent of the overall consultancy services contract value. Entities from Kazakhstan have been most successful for goods contracts; winning (54 per cent) of all goods contracts in terms of value. Entities from Slovenia have been the most successful at 35 per cent in winning supply and installation contracts. Lastly, entities from Bosnia and Herzegovina were most successful for works contracts with 21 per cent of the value of all works contracts signed during 2012.

2.7 Contract award process

Table 2.7.1 summarises data concerning the public procurement opportunities posted on the Bank's Internet site. It should be noted that the procurement notices were also sent to United Nation Development Business for posting in the MDB business opportunity section as well as to the EU for publishing in the Official Journal of the European Union.

¹ The successful tenderer nationality is recorded as being only the lead entity in the case of joint ventures.

Table 2.7.1 Public procurement postings on web site (2008-2012)

Year	General Procurement Notices	Invitations for Expressions of Interest	Invitations to Prequalify	Invitations for Tenders	Total
2008	86	24	18	106	234
2009	79	18	16	97	210
2010	88	29	16	94	227
2011	103	23	12	163	301
2012	113	27	26	183	349

In 2012, the Bank published a total of 349 procurement notices on its internet site. Out of 113 General Procurement Notices published in 2012, 52 were for new projects.

Table 2.7.2 Distribution of contracts by award method (2012)

Contract Size (€M)	Open	Shopping	Direct Selection	Competitive	Alternative	Total
<0.3	22	3	6	1	8	40
0.3~7.5	72	1	3	5	18	99
>7.5	54	0	1	4	9	68
Total	148	4	10	10	35	207
Total Value (€)	4,248,462,571	966,723	30,254,908	64,759,753	394,120,951	1,275,797,516
Average Value (€)	28,705,828	241,681	3,025,491	6,475,975	11,260,599	6,163,273
Fund Portion (€) *	3,120,275,556	966,723	26,188,582	45,369,345	110,046,038	773,720,488

*Loan and grant funded

Table 2.7.2² illustrates that the majority (148) of the public sector contracts were awarded through open tender. This represents 71 per cent of the total number of contracts awarded and 66 per cent of the total contract value. As open tendering only applies to goods, works and supply and installation contracts procured in accordance with the Bank's PP&R (which in 2012 was a total of 172 contracts), the public sector contracts awarded through open tendering represent 86 per cent of the number of these contracts and 95 per cent of the total contract value when consultancy services contracts and alternative procurement procedures are excluded. The numbers for 2012 indicate that the strong emphasis of the PP&R on open tendering has been respected when the PP&R apply.

Annex 5 provides the total value of contracts signed in 2012, distributed by method of procurement and by country of origin of the tenderers to whom the contracts were awarded. Entities from Bosnia & Herzegovina were the most successful at winning open tendered contracts with a total value of €198 million, followed by Turkey (€127 million), Kazakhstan (€85 million), Croatia (€80 million) and the Czech Republic (€62 million). Overall, entities from these five countries won 66 per cent of all open tendered contracts.

Annex 6 provides details of the public sector contracts awarded in 2012, by country of origin of the tenderers.

² Please refer to Procurement Policies Rules edition May 2010, for explanation of different tender processes.

2.8 Level of participation

Table 2.8.1 provides data on the rate of participation in public sector tenders by country of origin of the tenderers for contracts signed in 2012.

A total of 615 tenders from 45 countries were received during 2012, which is a decrease in participation (24 per cent) compared with the 805 tenders received in 2011. There was an average of 3.5 tenders per contract procured (compared with 4.3 in 2011) using open tendering procedures.

Entities from the following five countries were most successful in terms of highest total contract value, regardless of procurement method: Bosnia and Herzegovina (€216 million), Greece (€210 million), Romania (€159 million), Turkey (€127 million) and Kazakhstan (€86 million), which together won a total of €798 million or 63 per cent of the total contract value.

The five most successful tendering countries in terms of number of contracts were: Romania (32), Moldova (22), the Russian Federation (20), Bosnia and Herzegovina (13) and Tajikistan (13). Entities from these five countries won a total of 100 contracts (48 per cent of the total number of contracts) worth €450 million, which represents 35 per cent of the total contract value.

Entities from the five most successful countries in terms of number of contracts won, submitted 41 per cent of all tenders received by the Bank's clients.

The column "Rate of Success" seen in Table 2.8.1 provides an indication of the ratio between the award of contracts and the number of tenders submitted by entities from each country.

Table 2.8.1 Distribution of contracts by country of origin of the tenderers (2012)

Analysis by business sector

Annex 7 presents the level of interest generated by business sector.

The following analysis is based on open tendered contracts only:

Out of the total aggregate number of tenders submitted, 66 per cent was in the MEI sector. Contracts awarded represent 69 per cent of all contracts, attracting 3.3 tenders per contract.

Out of the total aggregate number of tenders submitted, 29 per cent was in the Transport sector. Contracts awarded represent 26 per cent of all contracts, attracting 3.9 tenders per contract.

Out of the total aggregate number of tenders submitted, 4 per cent was in the Power and Energy sector. Contracts awarded represent 5 per cent of all contracts, attracting 3.3 tenders per contract.

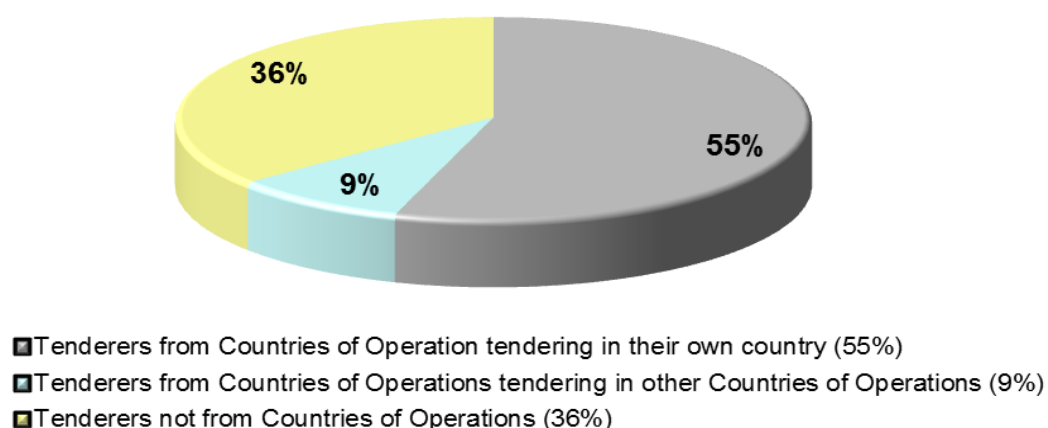

Out of the total aggregate number of tenders submitted, 1 per cent was in the Natural Resources sector. Contracts awarded represent 1 per cent of all contracts, attracting 4 tenders.

Participation of entities from countries of operations

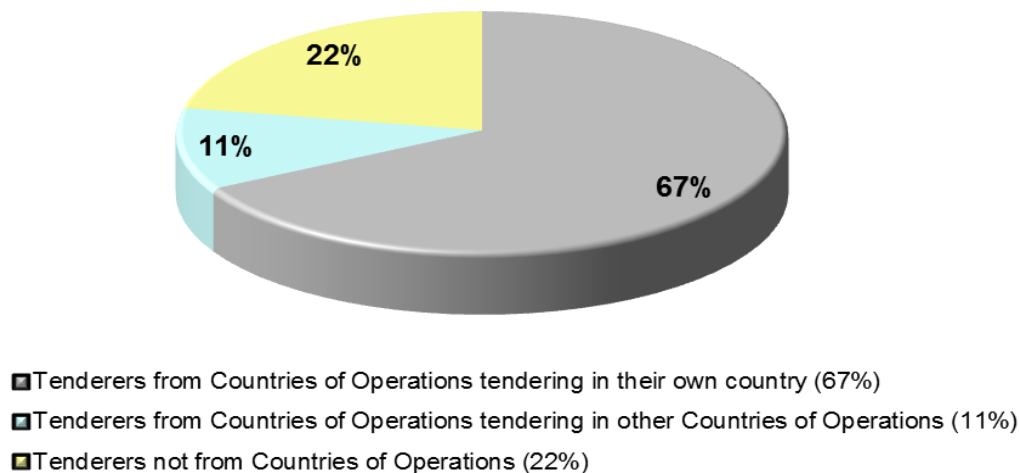

Chart 2.8.2a shows that out of the overall 615 tenders that were submitted, 64 per cent were submitted by tenderers from countries of operations. From Chart 2.8.2.b it can be seen that out of the 207 contracts awarded, 67 per cent were won by entities from countries of operations tendering in their own country and 11 per cent were won by entities from countries of operations tendering in other countries of operations. The above figures show a stable high level of participation of entities from the countries of operations in the tenders for Bank funded contracts and at the same time an increased level of success in tendering outside of their own countries as compared with 2011. The success rate of participation in the tenders in the tenderers' own countries remains high.

Chart 2.8.2 a and b Distribution of tenders by countries of operations and other countries

Chart 2.8.2a: All submitted tenders

**Chart 2.8.2b: All successful tenderers
(Number of contracts)**

Entities from EBRD's countries of operations won 159 contracts (77 per cent of all contracts) with a total value of €811 million (64 per cent of the total contract value). In most cases, entities were most successful in their own countries (winning 138 contracts for a total contract value of €626 million in their own country). There were 21 contracts worth €185 million awarded to entities from EBRD's countries of operations in countries different from the country of origin of the tenderer.

Entities from nine countries of operations won contracts in their own countries only. These countries were Armenia, Bosnia and Herzegovina, FYR Macedonia, Kazakhstan, Kyrgyzstan, Moldova, Montenegro, Serbia and Tajikistan. They won contracts worth a total amount of €326 million or 26 per cent of the overall contract value.

Country and sector tendering analysis

Annex 8 presents the distribution of tenders submitted by country of origin of the tenderers and by country of operations.

Annex 9 presents the distribution of submitted tenders by country of origin of the tenderers and by business sector.

Out of all tenderers, entities from Germany diversified their tenders to the greatest extent as they submitted tenders across 10 countries of operations and across four business sectors. German entities won nine contracts spread across the MEI sector (four), Power and Energy (two), Transport (two) and Natural Resources (one).

Contracts in Moldova generated the highest level of interest in terms of number of tenders submitted (129), followed by Bosnia and Herzegovina (80).

2.9 Public sector procurement under sub-sovereign projects

A total of 95 contracts were signed in the context of sub-sovereign public sector projects, showing a decrease of 11 per cent compared to 2011 (107) and representing 46 per cent of the total number of contracts. These contracts have a total value of €406 million or 32 per cent of the overall contract value. In these contracts the EBRD portion of financing is 53 per cent of the total contract amount.

In 2012, eight contracts were signed for projects co-financed with IPA (Croatia: Karlovac Wastewater Management Project (six) and FYR Macedonia: Corridor X (two)) and 26 contracts for projects co-financed with EU Cohesion Funds (Romania R2CF Water Framework).

2.10 Nuclear Safety Department

The EBRD manages six nuclear safety Funds with over €4 billion in pledged contributions. Each Fund is governed by specific provisions as set out in the Rules of the Fund approved by the respective Assembly of Contributors and by the EBRD Board of Directors. The Funds are managed by the Nuclear Safety Department (NSD) on behalf of the contributing countries. Procurement under the Funds must follow the EBRD's PP&R for public sector projects with the limitation that eligibility is restricted to entities from member countries of the respective Funds, the EU member states and the EBRD's countries of operations.

During 2012, 43 contracts amounting to a total value of €71.7 million were placed under the projects financed by the Funds. This represents a decrease compared to 2011 of 19 per cent in the number of contracts and of 34 per cent in value. Annex 10 provides the listing and details of all the contracts financed from Nuclear Safety Funds signed during 2012.

Table 2.10.1 provides the distribution of the NSD administered contracts by size and type. Out of the 43 contracts signed 31 were below €1 million, 18 of which were for consultancy services, representing 42 per cent of the total number of contracts and 6 per cent of the total contract value. The majority of the remaining 13 contracts signed below €1 million are for procurement of goods and represents 30 per cent of the total number of contracts and 4 per cent of the total contract value. The seven contracts with a value between €1million and €5 million accounted for 35 per cent of the total contract value and the five contracts with a value over €5 million accounted for 55 per cent of the total value of all contracts financed from the Funds. The two largest contracts, each worth more than €9 million, were for the treatment of historical waste – sludges and sorbents, and for the Project Management Consultant – Phase 6; both signed under the Bohunice International Decommissioning Support Fund (BIDSF).

Table 2.10.1 Nuclear Safety Department-distribution of contracts by size and type (2012)

Contract Size (€M)	Works	Supply & Installation	Goods	Consultant Services	Total
<0.3	1	0	9	11	21
0.3~7.5	2	5	3	9	19
>7.5	1	1	0	1	3
Total	4	6	12	21	43
Total Value (€)	13,718,385	26,968,124	11,385,673	19,577,018	71,649,198
Average Value (€)	3,429,596	4,494,687	948,806	932,239	1,666,260

Table 2.10.2 provides the distribution of the NSD-funded contracts by size and by method of award. Contracts subject to open and competitive selection procedures amounted to €56 million which is 78 per cent of the value of total contracts placed. The value of consultancy services contracts subject to direct selection has increased by 73 per cent compared to 2011 and amounted to €16 million (compared to €9 million in 2011). This increase is exclusively because of the contract signed under the Bohunice International Decommissioning Support Fund (BIDSF) with an approximate value of €9 million, which accounted for 62 per cent of the overall value of consultancy contracts awarded by direct selection. All the other contracts awarded by direct selection method represent only 8 per cent of the total value.

Table 2.10.2 Nuclear Safety Department- distribution of contracts by award method (2012)

Contract Size (€M)	Open	Shopping	Direct Selection	Competitive	Total
<0.3	0	10	8	3	21
0.3~7.5	10	0	4	5	19
>7.5	2	0	1	0	3
Total	12	10	13	8	43
Total Value (€)	51,669,172	403,010	15,598,108	3,978,910	71,649,198
Average Value (€)	4,305,764	40,301	1,199,854	497,364	1,666,260

The procurement for projects administered by NSD is carried out in full compliance with the EBRD's PP&R except for eligibility restrictions. The established procedures between NSD and PD to determine the compliance of chosen procurement methods, other than open tender, are further enhanced through reviews by the donors to the Nuclear Safety Funds. The work programmes, which include the proposed procurement methods for planned projects, are submitted to the respective Assembly in advance of its meetings. Therefore, the Assembly approval of a work programme also constitutes its approval of the respective procurement plan and any exceptions to open tendering which the procurement plan may contain.

The decisions to proceed with direct selection are mainly influenced by a specific nature of the highly regulated nuclear industry, including various security, radiation or safety requirements.

2.11 Alternative Procurement

Alternative Procurement is the categorisation given to those contracts which are co-financed with other International Financial Institutions and for which the Board has granted an exception under paragraph 2.4 of the PP&R from the use of the Bank's procurement procedures. In such cases, these contracts are procured under rules and procedures applicable to the co-financing institution and to the Bank as well as subject to acceptable alternative monitoring procedures.

Due to an increasing number of such contracts, the Contracts Review and Administration system (CRA) was updated to allow for a separate categorisation in order to improve monitoring and reporting.

Table 2.11.1 Summary of contract procured under alternative procurement procedures

Number of Contracts	35
Total Value	EUR 394,120,951
EBRD funded portion	EUR 110,046,038
Average EBRD financing percentage	28%
Largest Contract	EUR 210,148,177

Three types of co-financed contracts are represented in the data in table 2.11.1. The majority of contracts (26 of 35) were co-financed with the EU-Cohesion Fund under the Regional EU Cohesion Funds Water Co-Financing Framework R2CF Project in Romania and accounted for almost 75% of the total number of contracts. These contracts were procured under national public procurement law in accordance with EU requirements (see also Section 3.3 for the Independent Procurement Review conducted on this project). Six contracts were co-financed with the EU IPA fund in Croatia and two contracts co-financed with EU IPA and the EIB in FYR Macedonia. These contracts were procured under the EU PRAG procurement procedures. Procurement conducted under EU PRAG procedures were subject to EBRD and EU Delegation prior review.

The average co-financing percentage by EBRD was 11 per cent except for one consultancy services contract under the Corridor X project in FYR Macedonia for (€ 8,977,500) which was 100% financed by EBRD but procured under PRAG rules and the largest works contract with a value of €210,148,177 (39% EBRD financing), under the same project.

The majority of contracts (23 out of 35) were won by companies from the same country as the country of the project. However contractors from eight other countries won the largest percentage by value amounting to EUR 273,526,987, or almost 70% of the total contract value procured under alternative procedures.

3. Compliance and integrity

3.1 Complaints and concerns

PD handled 23 procurement complaints and four concerns for Bank financed or administered contracts during the course of 2012, as compared to the 11 procurement complaints and one concern in 2011³. In order to put this into context in 2012, there were 207 contracts signed in the public sector (2011: 219), 43 contracts signed under nuclear safety funds (2011: 53) and 2,747 signed consultancy contracts, which were funded from Bank administered TC funds and from the Bank's own budget (2011: 2,206). Furthermore, 647 consultancy contracts were signed by OGC for retaining outside legal counsel (2011: 571).⁴ Table 3.1.1 presents a comparison of figures for complaints/concerns reviewed between 2008 and 2012, by contract type and procurement method.

Table 3.1.1 Number of complaints/concerns 2008-2012 by contract type

Contract Type	2008	2009	2010	2011	2012
Works	7	3	7	5	8
Goods	5	4	6	5	6
Supply and Installation	8	7	6	1	8
Services	1	0	0	0	0
Consultancy (Loan or NSD Grant Funded)	0	0	1	1	3
Consultancy (TC and Bank's own funds, administered by CSU)	0	0	0	0	2
Consultancy (outside legal counsel retained by OGC)	0	0	0	0	0
Total	21	14	20	12	27

In 2012, the majority of complaints/concerns were equally related to contracts for works and contracts for supply and installation (eight each), with a further six complaints/concerns related to contracts for goods. The remaining five complaints/concerns were related to contracts for consultancy services. In 2011, the majority of complaints/concerns were equally related to contracts for works and contracts for goods (five each).

Table 3.1.2 provides a summary of the 16 complaints and four concerns that were closed in 2012. The information provided includes the nature, the business sector and the outcome of the complaint process for each of these complaints and concerns. Whilst 12 of the 16 complaints were not upheld by PCC, two complaints were upheld (no 7 Sostanj Thermal Power Plant and no 13 Duboko Solid Waste) and two complaints were closed without PCC review (no 11 and 12 Skopje Urban transport Project), as the allegations of the complainant became redundant due to the cancellation of the procurement process by the Client.

One of the four concerns was rejected by PD, predominantly on the grounds that the complainant had not participated in the prequalification process. The remaining three concerns were considered

³ A distinction is made between those issues raised by dissatisfied parties that clients can resolve themselves and complaints that are formally addressed to and require the action of the Bank. A "concern" is any minor issue that is brought to the attention of the EBRD by a tenderer regarding the procurement process or contract award. The concern is referred to the contracting authority, which is expected to address and resolve the issue with the relevant party under PD's supervision. If the two parties cannot come to an understanding or an agreement, the concern may be elevated to the status of a complaint. At that point, the EBRD freezes the procurement process and an investigation is undertaken.

⁴ The number of consultancy contracts administered by CSU (including contracts related to the Small Business Support Team (SBS) and OGC has been included in this section as the Bank's PP&R and, consequently, the Bank's procurement complaints/concerns review procedures are also applicable for these contracts.

to have become redundant as no further correspondence was received after the Client's and/or PD's explanations to the respective allegations.

The complaints/concerns raised by unsuccessful entities in 2012 varied in nature. The following issues were raised:

- Allegation that the winning tenderer failed to meet the qualification criteria.
- Challenging the result of the client's technical evaluation for a consultancy assignment.
- Allegation that a local authority interfered with the tender evaluation process.
- Allegation that the lowest priced tenderer is affiliated with the client.
- Allegation that the contract was awarded after the expiry of the tender validity period.
- Challenging the Bank's decision to consider consultancy companies for shortlisting who submitted their expressions of interest after the deadline for submitting such expressions of interest.
- Allegation that the qualification criteria were restrictive.
- Allegation that the tender documents were targeted at a particular supplier and therefore limited competition.
- Allegation that irregularities occurred during tender opening.
- Allegation that members of the evaluation committee had conflicts of interest.
- Allegation that a tender was wrongly rejected as submitted too late.
- Allegation that a tenderer had not been sent a key addendum to the tender documents.

**Table 3.1.2 Complaints and concerns by nature and by business sector
(complaints and concerns closed during 2012, presented in chronological order as received by the Bank)**

	Country of Originator of Complaint/Concern	Project	Complaint /Concern	Business Sector	Nature of Complaint/Concern	Outcome of the Complaint Process	Contract Amount €	Time-line
1.	France	Bulgaria: Kozloduy International De-commissioning Support Fund	Complaint	Nuclear Safety	The Complainant raised a complaint on the grounds of an alleged conflict of interest concerning members of the Client's tender evaluation committee. According to the Complainant, these members had been affiliated with one of the tenderers for the contract in question.	PCC agreed with PD's recommendation not to uphold this complaint as the alleged conflict of interest of the members of the Client's tender evaluation committee could not be established.	8,116,613	< 5 months
2.	Belarus	Kazakhstan: Almaty Development of Electric Transport	Complaint	MEI	One of the tenderers was concerned that the technical requirements of the Client's tender documents were targeted at a particular supplier, resulting in limiting the competition. The Complainant was also concerned that the evaluation methodology in respect of the application of any discount was ambiguous.	PCC agreed with PD's recommendation not to uphold this complaint as, amongst others, an impartial and qualified technical expert confirmed that the technical specifications were open and not restrictive for competition.	33,600,000	< 6 months
3.	Kazakhstan	Kazakhstan: KTZ Transtelecom Communication Infrastructure Modernisation	Complaint	Transport	The Complainant alleged a number of irregularities which, in the Complainant's opinion, had taken place during the 1st stage tender opening by the Client. These allegedly included the Client's failure to introduce the Committee to the tenderers prior to the opening of the 1st stage proposals; missing formal documentation for the opening of the 1st stage proposals; discrepancies of the form and substance in which the other tenderers submitted their tenders which were not properly recorded by the Client.	PCC agreed with PD's recommendation not to uphold this complaint as it was established that no material deviations had occurred during the opening of the 1 st stage proposals.	300,000	< 4 months

4.	Romania	Romania: Hidroelectrica - Rehabilitation of Stejarul HPP	Complaint	Power & Energy	The Complainant alleged that the qualification requirements, specifically previous experience, were restrictive and should be limited to those that are essential to ensure the firms' capability to perform the contract. They further alleged that the requirements conflicted with Romanian procurement legislation.	PCC agreed with PD's recommendation not to uphold this complaint as it could not be established that the qualification criteria were restrictive. It was also confirmed that the Romanian Public Procurement Law was not applicable in this case.	108,000,000	< 1 month
5.	Austria	Bosnia and Herzegovina: Corridor Vc	Complaint	Transport	The Complainant complained about an alleged undue interference by a public organisation in favour of a particular tenderer in the course of the tender evaluation process, which should lead to the rejection of this tender.	PCC agreed with PD's recommendation not to uphold this complaint as it had become redundant. This was due to the fact that the tender submitted by the allegedly favoured tenderer was rejected by the Client based on reasons unrelated to the complaint.	60,000,000	< 7 months
6.	Austria	Bosnia and Herzegovina: Regional Road Development Programme	Complaint	Transport	The Complainant complained about an alleged undue interference by a public organisation in favour of a particular tenderer in the course of the tender evaluation process, which should lead to the rejection of this tender.	PCC agreed with PD's recommendation not to uphold this complaint as it had become redundant. This was due to the fact that the tender submitted by the allegedly favoured tenderer was rejected by the Client based on reasons unrelated to the complaint. Furthermore, the contract was awarded to the Complainant as a result of the tender evaluation process.	15,000,000	< 7 months
7.	Slovenia	Slovenia: SOSTANJ Thermal Power Plant	Complaint	Power & Energy	The Complainant alleged that they considered the firm who submitted the lowest priced tender (as read out in the tender opening) as being affiliated to the Client and therefore not eligible for award as per EBRD PP&R.	PCC agreed with PD's recommendation to uphold this complaint as it was established that the tenderer who submitted the lowest priced tender was an affiliate of the Client and could therefore not be considered for contract award under a Bank financed contract.	5,100,000	< 4 months

8.	Netherlands	FYR Macedonia: Skopje Urban Transport Project	Complaint	MEI	<p>This complaint concerns the same tender as the complaints listed in this table under numbers 11 and 12.</p> <p>The Complainant alleged that the time limits for the preparation and submission of the tenders were inadequate and that the technical requirements were too restrictive as there was a heavy reliance on products from specific suppliers to be integrated by the contractor under this new contract.</p>	PCC agreed with PD's recommendation not to uphold this complaint as the extended tendering period was held sufficient for companies to prepare and submit tenders. Also, the tender requirements were considered affording equal opportunities to prospective tenderers.	2,600,000	< 2 months
9.	Austria	FYR Macedonia: Macedonian Railways - Corridor X	Complaint	Transport	The Complainant alleged that the contract had been awarded after the expiration of the tender validity and that this contravened relevant provisions of the tender documents. The Complainant demanded the suspension of the Bank's funding for this contract and the annulment of the tender procedure.	PCC agreed with PD's recommendation not to uphold this complaint as the Bank's review did not substantiate any material departure from the applicable procurement process.	10,800,000	< 6 months
10.	United Kingdom	Regional: Integrity Due Diligence Frameworks - Investigation	Complaint	All Banking Departments	After having been advised by the Bank that the Complainant was not qualified to be shortlisted for the award of a framework agreement, the Complainant submitted a complaint to the Bank. The Complainant essentially alleged that the Bank's shortlisting procedure was not transparent. The Complainant argued that it was unusual to extend the deadline for the submission of expressions of interest (EoIs) shortly before the original deadline	PCC agreed with PD's recommendation not to uphold this complaint as the Bank's review did not substantiate any material departure from the applicable procurement process.	Not applicable - framework	< 3 months

					and alleged that some of the subsequently shortlisted companies were permitted to submit expressions of interest after the extended submission deadline. The Complainant demanded that these companies should be excluded from the competition or that the competition should be cancelled altogether.			
11.	FYR Macedonia	FYR Macedonia: Skopje Urban Transport Project	Complaint	MEI	<p>This complaint concerns the same tender as the complaints listed in this table under numbers 8 and 12.</p> <p>In general, the Complainant alleged that the tender was limiting open competition because it was not allowing for alternative solutions. Furthermore, it was alleged that it was only possible for a specific company to provide the required Traffic Management System and integrate the existing software into it.</p> <p>In parallel, another company submitted a formal complaint to the Bank on similar issues. It should further be noted that the Bank had already reviewed and rejected a complaint from another complainant (see further above) concerning the same contract and on similar issues, which was not upheld by PCC.</p>	Due to the cancellation of the procurement process by the Client, the complaint had become redundant and a review by PCC was not undertaken.	2,600,000	< 5 months
12.	FYR Macedonia	FYR Macedonia: Skopje Urban Transport Project	Complaint	MEI	<p>This complaint concerns the same tender as the complaints listed in this table under numbers 8 and 11.</p> <p>In general, the Complainant alleged that the project by its definition, modelling and scope and its dependency on a third party solution and system contradicts the principle of fair competition. More</p>	Due to the cancellation of the procurement process by the Client, the complaint had become redundant and a review by PCC was not undertaken.	2,600,000	< 5 months

					<p>specifically, the complainant alleged that the total qualification of the system mainly depends on one of the tenderers.</p> <p>In parallel, another company (see above) submitted a formal complaint to the Bank on similar issues. It should further be noted that the Bank had already reviewed and rejected a complaint from another complainant (see further above) concerning the same contract and on similar issues, which was not upheld by PCC.</p>			
13.	Serbia	Serbia: Duboko Solid Waste	Complaint	MEI	<p>The Complainant alleged that the contractors that were awarded contracts under tenders for various lots were either not qualified or were not the lowest evaluated offers received. The Complainant further contested the cancellation of lots 4 and 5 and the information provided by the client during the notification that the Complainant had been unsuccessful.</p>	PCC agreed with PD's recommendation to uphold this complaint with regard to lot 6 as it was established that the firm that had been awarded the contract for this lot was unqualified. The procurement process in respect of lots 4 and 5 was considered to be consistent with the applicable procedures.	140,000	< 3 months
14.	Iran	Tajikistan: Sugd - Energy Loss Reduction project	Complaint	Power & Energy	<p>The Complainant expressed its dissatisfaction with the outcome of the evaluation of its technical proposal as part of the selection of PIU Consultants. In particular, the Complainant alleged that the technical capabilities were wrongly evaluated and that its proposal may have been erroneously rejected on the grounds of national eligibility.</p>	PCC agreed with PD's recommendation not to uphold this complaint as there were no grounds to challenge the Client's evaluation of the technical proposals and/or the overall outcome of the selection process.	1,200,000	< 1 month

15.	USA	FYR Macedonia: Corridor X	Concern	Transport	A company alleged, supposedly on behalf of another company, that they were not provided an opportunity to participate in the tender due to late notification. Neither the company nor any variations of this company or associated companies appear on the list of parties purchasing the tender documents.	Neither the company that raised the concern nor the company that the former company was allegedly acting on behalf of had participated in the tendering process. Furthermore, none of the supporting documents submitted by the company that raised this concern provided evidence that the company that raised this concern was duly authorised to do so. Consequently, the concern was rejected by PD.	15,000,000	< 1 month
16.	Italy	Croatia: Corridor Vc Completion Project	Concern	Transport	A Consortium of firms expressed their concerns in respect of the Client's actions in the course of the implementation of a contract for the construction of a bridge. Following the termination of the contract by the Client, the Consortium was particularly concerned about indications in the media that the contract may be directly awarded to one of the companies that participated in the original tendering process. The Consortium believed that a new tender should be launched.	After the Consortium was informed of the Client's decision to re-tender the contract, no further communication was received from the Consortium. The concern was therefore considered to be moot.	20,964,337	< 3 months
17.	Serbia	Serbia: Belgrade Bus Renewal Programme	Complaint	MEI	<p>This complaint concerns the same tender as the complaint listed in this table under number 18.</p> <p>The Complainant alleged that this procurement process should have been performed in accordance with the procurement law of the Republic of Serbia. The Complainant also alleged that the financial and technical specifications were discriminatory.</p>	PCC agreed with PD's recommendation not to uphold this complaint as the Complainant's views were found not to be substantiated.	57,000,000	< 2 months

18.	Serbia	Serbia: Belgrade Bus Renewal Programme	Complaint	MEI	<p>This complaint concerns the same tender as the complaint listed in this table under number 17.</p> <p>The Complainant alleged that this procurement process should have been carried out in accordance with Serbian procurement laws and regulations. The Complainant further alleged that the specifications were biased and discriminatory.</p>	PCC agreed with PD's recommendation not to uphold this complaint as the Complainant's views were found not to be substantiated.	57,000,000	< 2 months
19.	Albania	Albania: Local And Regional Roads	Concern	Transport	The Bank received a copy of a complaint to the Client about the rejection by the Client of the Complainant's application for prequalification for several road rehabilitation contracts. The Complainant alleged that they had not received information from the Client on the reasons for the rejection of their applications for prequalification. The Complainant further alleged that the Client had deliberately set certain qualification criteria and their application rules in a way to minimise competition and manipulate the outcome of the resulting tenders.	The Client responded to the Complainant in detail by informing them that the allegations were not substantiated and offered the Complainant a debriefing. As no further correspondence was received from the Complainant, PD considered this complaint moot and the case closed.	25,000,000	< 2 months
20.	Germany	Poland: Stalowa 449 MWe CCGT Lender's Engineer	Concern	Power & Energy	The Complainant alleged that the selection process for the engagement of a Lender's Engineer was not in line with EBRD's guidelines and referred to alleged missed deadlines by EBRD.	As the Complainant did not adequately substantiate these allegations, PD eventually considered this concern to be closed.	200,000	< 2 months

Table 3.1.2 also provides information on the duration of the review of complaints and concerns. Whilst the review of the majority of the cases could be finalised within a period of less than three months, some complaints could only be closed up to seven months after receipt by the Bank.

The complaints/concerns closed in 2012 were related to MEI and Transport projects (seven each), to Power & Energy Projects (four), to Nuclear Safety projects (one) and to a framework agreement benefitting all Banking teams (one). Allegations of improper tender evaluation and biased technical specifications were the principal sources of complaints.

3.2 Prohibited practices

In 2010, the Bank signed the “Agreement for Mutual Enforcement of Debarment Decisions”. The Agreement was signed by the African Development Bank Group, the Asian Development Bank, the InterAmerican Development Bank, the World Bank Group and the European Bank for Reconstruction and Development. The list of entities and individuals which are currently ineligible to become an EBRD Counterparty can be found on the Bank’s website at: <http://www.ebrd.com/pages/about/integrity/list.shtml>.

Entities (and their affiliates) or individuals may be ineligible to become a Bank Counterparty if EBRD determines, in accordance with EBRD’s Enforcement Policy and Procedures, that (a) they have engaged in any Prohibited Practice in the context of a Bank project, or (b) they are subject to a Third Party Finding or (c) they are subject to a Debarment Decision by a Mutual Enforcement Institution.

In 2012, no EBRD enforcement proceedings were instituted by the EBRD. Pursuant to the Agreement for the Mutual Enforcement of Debarment Decisions cross-debarment provisions of the EPP, the Bank cross-debarred 45 entities and 32 individuals, based on debarment notices received from the World Bank Group (21 notices), the Asian Development Bank (4 notices) and the Inter-American Development Bank (15 notices). A list of all EBRD debarred entities and persons is published on the EBRD’s web site. As at 31 December 2012: four firms are ineligible to be awarded EBRD funded contracts as a result of EBRD initiative debarment action. In addition, 81 entities and 55 individuals are ineligible as a result of mutual enforcement of debarment decisions.

3.3 Independent procurement reviews

Independent Procurement Reviews (IPRs) are carried out with the view to strengthen the ability of the Bank to fulfil its fiduciary obligation with regard to the oversight of procurement and contract implementation, to complement the prior review and post review procedures applied, and to inform the Bank’s management of the quality of the Bank’s fiduciary work on procurement. The projects for IPRs are selected based on the relevance of the project to the Bank’s likely future operations; lessons-learned potential; size of the Bank’s investment commitment/exposure; balance among countries of operations; relative priority of operation within PD’s overall work programme as well as by reference to PD’s procurement risk dashboard. PD will make a detailed presentation to the Audit Committee in 2013.

In 2012, PD conducted four independent procurement reviews (IPR) as follows:

- 1) Regional EU Cohesion Funds Water Co-Financing Framework R2CF Romania(OPID 41666)
R2CF Constanta sub-project (OPID 41177)**

The Framework encompasses a number of projects covered by an exception under 2.4 of the PP&R for use of national procurement rules due to EBRD being a minority co-financier with the EU-Cohesion

Funds. As all sub-projects under the framework are covered by the same alternative monitoring arrangements, and some are more advanced in terms of procurement and implementation than others, the review concentrated on 41177 R2CF Constanta sub-project, the largest water company in Romania, which has correspondingly a large number of contracts registered in the Bank's CRA system (13 in 2011 and 6 in 2012) and which company was subject to lengthy integrity due-diligence during project appraisal. The review, by an independent expert familiar with project auditing requirements under such projects, was completed in November 2012. The consultant concluded that the alternative procurement and monitoring procedures were conducted as set out in the project documents but made a number of recommendations to further enhance the quality of procurement and monitoring.

2) Sostanj Thermal Power Plant (OPID 40417)

The Bank is financing the construction of a new state of the art coal-fired (lignite) unit with full environmental protection systems of 600 MW capacity which consists of several large contracts for works. The review focussed on the contract implementation and makes some recommendation for improvement including the choice of contract strategy.

3) Analysis of Procurement Complaints - Bosnia and Herzegovina

In a departure from the usual subject of IPRs, this report reviewed the procurement environment in Bosnia and Herzegovina with the main objective to try to identify the reasons why so many more complaints are generated by firms from this particular country as compared with other EBRD countries of operations (13 from 44 between 2009 -2011, or 30% of all complaints) and possible mitigation measures which may be considered for future projects. The review included a brief analysis of the 13 complaints followed by a series of structured interviews with selected EBRD clients, complainants, public procurement and other BiH authorities, and other IFIs' in-country procurement staff to obtain data on complaints and their treatment within the country. The consultant concluded that the main reason for the propensity of complaints was due to the national complaint culture and the very high success rate of complaints made through the local review system, rather than any particular identifiable failure on the part of EBRD procurement processes.

4) Brasov Urban Transport Project (OPID 36843)

The IPR was carried out on one project, which was the subject of two loans, namely the Brasov Urban Transport Project City Loan (Rehabilitation of City Streets) and Brasov Urban Transport City Loan Extension. The Loans were €15 million and €7.3 million respectively for a comprehensive street rehabilitation programme along key public transport corridors in the city centre. The review highlighted certain deficiencies in the procurement process and provided a number of recommendations for improvement. In addition, a 'red flag' was raised by the consultant concerning the conduct during the tender evaluation, which was referred to the Office of the Chief Compliance Officer (OCCO) for review. The OCCO review was completed in October 2012 and the matter closed with no determination against the client or the contractor in this case.
